*Meditations of My Heart* Shirley L. Hudson,2009-05 Meditations of My Heart is a collection of soliloquies composed by Shirley Hudson. Interacting with happenings in her life, she finds analogies that speak to the territory of Christian experience. Seeking to provide greater practical and devotional application, she has assembled an index in the back of the book listing the various scriptural passages that figured in each meditation. The soliloquies were sent out on a weekly basis via email to an ever-increasing audience. Many who received them expressed appreciation and suggested that they be

published in book form in order to have them at hand and to share them with a wider audience. Her first hundred meditations were published in a book entitled *He Awakens Me*. This volume contains her second hundred. The author hopes and prays that they will not only reach a wider audience, but that they will prove to be helpful in promoting that quality of life that truly honors and glorifies her Savior, the Lord Jesus Christ.

**Spectral Analysis of Musical Sounds with Emphasis on the Piano** David M. Koenig, 2015 This book addresses the analysis of musical sounds from the viewpoint of someone at the intersection between physicists, engineers, piano technicians, and musicians. The study is structured into three parts. The reader is introduced to a variety of waves and a variety of ways of presenting, visualizing, and analyzing them in the first part. A tutorial on the tools used throughout the book accompanies this introduction. The mathematics behind the tools is left to the appendices. Part Two provides a graphical survey of the classical areas of acoustics that pertain to musical instruments: vibrating strings, bars, membranes, and plates. Part Three is devoted almost exclusively to the piano. Several two- and three-dimensional graphical tools are introduced to study various characteristics of pianos: individual notes and interactions among them, the missing fundamental, inharmonicity, tuning visualization, the different distribution of harmonic power for the various zones of the piano keyboard, and potential uses for quality control. These techniques are also briefly applied to other musical instruments studied in earlier parts of the book. For physicists and engineers there are appendices to cover the mathematics lurking beneath the numerous graphs and a brief introduction to MatlabRG which was used to generate these graphs. A website accompanying the book (<https://sites.google.com/site/analysisofsoundsandvibrations/>) contains: - Matlab® scripts - mp3 files of sounds - references to YouTube videos - and up-to-date results of recent studies

**Sounding Human** Deirdre Loughridge, 2023-12-15 An expansive analysis of the relationship between human and machine in music. From the mid-eighteenth century on, there was a logic at work in musical discourse and practice: human or machine. That discourse defined a boundary of absolute difference between human and machine, with a recurrent practice of parsing “human” musicality from its “merely mechanical” simulations. In *Sounding Human*, Deirdre Loughridge tests and traverses these boundaries, unmaking the “human or machine” logic and seeking out others, better characterized by conjunctions such as and or with. *Sounding Human* enters the debate on posthumanism and human-machine relationships in music, exploring how categories of human and machine have been continually renegotiated over the centuries. Loughridge expertly traces this debate from the 1737 invention of what became the first musical android to the creation of a “sound wave instrument” by a British electronic music composer in the 1960s, and the chopped and pitched vocals produced by sampling singers’ voices in modern pop music. From music-generating computer programs to older musical instruments and music notation, *Sounding Human* shows how machines have always actively shaped the act of music composition. In doing so, Loughridge reveals how musical artifacts have been—or can be—used to help explain and contest what it is to be human.
