The Faraway Nearby Rebecca Solnit, 2013-06-13 A New York Times Notable Book Finalist for the National Book Critics Circle Award A personal, lyrical narrative about storytelling and empathy, from the author of *Orwell's Roses* and *Apricots*. Her mother's disintegrating memory. An invitation to Iceland. Illness. These are Rebecca Solnit's raw materials, but *The Faraway Nearby* goes beyond her own life, as she spirals out into the stories she heard and read—from fairy tales to Mary Shelley's *Frankenstein*—that helped her navigate her difficult passage. Solnit takes us into the lives of others—an arctic cannibal, the young Che Guevara among the leprosy afflicted, a blues musician, an Icelandic artist and her labyrinth—to understand warmth and coldness, kindness and imagination, decay and transformation, making art and making self. This captivating, exquisitely written exploration of the forces that connect us and the way we tell our stories is a tour de force of association, a marvelous Russian doll of a book that is a fitting companion to Solnit's much-loved *A Field Guide to Getting Lost*.

The Nearby Faraway David Petersen, 1997 earth writers, *The Nearby Faraway* reads like an abridged autobiography of the writer's life and travels (both geographical and spiritual). A dedicated naturalist and writer's writer, David Petersen spends a lot of time outdoors in the Rocky Mountain West. His most recent titles include *Ghost Grizzlies* and *A Hunter's Heart*.

Luminous Stars in Nearby Galaxies Roberta M. Humphreys, 2020-12-10 Studies on the populations of luminous stars in nearby resolved galaxies have revealed a complex distribution in the luminosity-temperature plane (the HR diagram). The

fundamentals of massive star evolution are mostly understood, but the roles of mass loss, episodic mass loss, rotation, and binarity are still in question. Moreover, the final stages of these stars of different masses and their possible relation to each other are not understood. The purpose of this volume is to provide a current review of the different populations of evolved massive stars. The emphasis is on massive stars in the Local Group, the Magellanic Clouds, and the nearby spirals M31 and M33.

Someone Always Nearby Susan Wittig Albert, 2023-11-07 In 1940, art-world icon Georgia O’Keeffe bought a house in a mountain-rimmed New Mexico desert, planning to live there for six months every year. To manage her remote household while she paints, O’Keeffe invited Maria Chabot—a young and naïve would-be writer—to join her. Their tempestuous relationship endured throughout the chaotic years of WW2; the death of Georgia’s domineering, philandering husband (famed photographer Alfred Stieglitz); and Maria’s design and building of a remarkable adobe house and studio for the artist in the native village of Abiquiú—a generous gift from an exceptional friend. An evocative story that explores the dimensions of friendship and the debts we incur to those who make our lives easier, *Someone Always Nearby* is based on research into a massive collection of over 700 letters, documents, media reports, and historical accounts. Readers will be fascinated by this intimate, revealing portrait of the artist’s daily life during her first decade at her New Mexico ranch—a mysterious, enigmatic O’Keeffe that only one woman, Maria Chabot, ever fully knew. Bonus Reader’s Guide. The story behind the story: research, sources and hyperlinked resources, curated extras, author commentary, questions and discussion topics. Mapping the Galaxy and Nearby Galaxies Keiichi Wada, Françoise Combes, 2007-12-20 Readers with any kind of an interest in astronomy will find this work fascinating, detailing as it

does the proceedings of the symposium of the same name held in Japan in 2006. The symposium focused on mapping the interstellar media and other components in galactic disks, bulges, halos, and central regions of galaxies. Thanks to recent progress in observations using radio interferometers and optical/infrared telescopes in ground and space, our knowledge on structures of our Galaxy and nearby galaxies has been growing for the last decade.

Birds Nearby John Eastman, 2015-03-01 This new bird guide collects naturalist John Eastman's writings focusing on the birds we see around us in our yards, parks, and neighborhoods every day, and includes stunning new color photos. • Explains in clear language how each bird nests, mates, feeds, and migrates • Features 45 species of birds, each identified with a beautiful color photograph • Includes evolutionary adaptations, name origins, nature lore, and more

Effect of Highway Landscape Development on Nearby Property John H. Brinton, Joel N. Bloom, 1969 Data were collected and disturbances were measured to determine the effects of physical disturbances by limited access highways on nearby property values. 3 types of analyses were made on the collected data: major-variable analysis, economic analysis, and interview analysis. In the major-variable analysis, relationships and correlations were examined between sound levels and sound level reductions at specific measurement points, and other variables such as sound level perception, present tree diversity, and homeowners' attitudes of buying another house next to the highway. The economic analysis evaluated the effect of highway disturbances and landscape/landforms on property values. The interview analysis was used to evaluate specific complaints or disturbances.

Groups of Galaxies in the Nearby Universe Ivo Saviane, Valentin D. Ivanov, Jordanka Borissova, 2007-08-01 For every galaxy in the field or in clusters, there are about three galaxies in groups. The Milky Way itself resides in a group. Groups

in the local universe offer the chance to study galaxies in environments characterized by strong interactions. In the cosmological context, groups trace large-scale structures better than clusters; the evolution of groups and clusters appears to be related. All these aspects of research are summarized in this book.

A Nearby Country Called Love Salar Abdoh, 2023-11-07 A sweeping, propulsive novel about the families we are born into and the families we make for ourselves, in which a man struggles to find his place in an Iran on the brink of combusting. Amid the alleyways of the Zamzam neighborhood of Tehran, a woman lights herself on fire in a desperate act of defiance, setting off a chain reaction of violence and protest. Haunted by the woman's death, Issa is forced to confront the contradictions of his own family history, throughout which his late brother Hashem, a prominent queer artist in Tehran's underground, defied their father, a skilled martial artist bound to traditional notions of honor and masculinity. Issa soon finds himself thrown into a circle of people living on the margins of society, negotiating a razor-like code of conduct that rewards loyalty and encourages aggression and intolerance in equal measure. As the city explodes around him, Issa realizes that it is the little acts of kindness that matter most, the everyday humanity of individuals finding love and doing right by one another. Vibrant and evocative, intimate and intelligent, *A Nearby Country Called Love* is both a captivating window into contemporary Iran and a portrait of the parallel fates of a man and his country—a man who acknowledges the sullen and rumbling baggage of history but then chooses to step past its violent inheritance.
