Pakistan's Stability Paradox Ashutosh Misra, Michael E. Clarke, 2013-03 Pakistan, with the second largest Muslim population in the world, is a crucial country in the international system. It is an ally of the United States in the global 'war on terror' but is also regarded as a major bastion of some of the most active jihadist organisations. This book highlights and explores the paradoxes that characterise contemporary Pakistan from the simultaneous democratization and Islamization of civil society to the schizophrenic US-Pakistan relationship. The central theme of the book looks at Pakistan's stability paradox. Commentators and analysts have over recent years often suggested that Pakistan was on the verge of state 'failure' or collapse resulting from a myriad of dilemmas. Yet, remarkably the Pakistani state has proven to be more resilient. This book identifies not only the factors that are contributing to Pakistan's perceived instability but also those factors that have contributed to the state's resilience. Chapters explore this central paradox through three core dimensions of Pakistan's contemporary dilemmas – the domestic, regional and international dimensions.

Media Imperialism in India and Pakistan Farooq Sulehria, 2018-01-02 Examining anew the notions of media imperialism and globalization of media, this book disrupts the generalised consensus in media scholarship that globalization of media has put an end to media imperialism. One elemental aspect of media imperialism is the structural dependency of television systems in the global South on the imperial North. Taking India and Pakistan as its case studies, this book views globalization of media as the unleashing of processes that have translated into the liberalization of air waves and privatization of television systems whereby commercialization of television is privileged over public interest television. Additionally, it argues that the globalization of media has contributed to corruption, tabloidization, and marginalization of subaltern classes in the Indian and Pakistani media.

The Making of Terrorism in Pakistan Eamon Murphy, 2012-12-12 This book explains the origins and nature of terrorism in Pakistan and examines the social, political and economic factors that have contributed to the rise of political violence there. Since 9/11, the state of Pakistan has come to be regarded as the epicentre of terrorist activity committed in the name of Islam. The central argument of this volume suggests that terrorism in Pakistan has, in essence, been manufactured to suit the interests of mundane political and class interests and effectively debunks the myth of 'Islamic terrorism'. A logical consequence of this argument is that the most effective way of combating terrorism in Pakistan lies in addressing the underlying political, social and economic problems facing the country. After exploring the root causes of terrorism in Pakistan, the author goes on to relate the historical narrative of the development of the Pakistani state to the theories and questions raised by Critical Terrorism Studies (CTS) scholars. The book will therefore make an important contribution to CTS scholarship as well as presenting an analysis of the many complex factors that have shaped the rise of Pakistani terrorism. This book will be of great interest to students of Critical Terrorism Studies, Asian history and politics, Security Studies and IR in general.

The UK's foreign policy approach to Afghanistan and Pakistan Great Britain: Parliament: House of Commons: Foreign Affairs Committee, Richard Ottaway, 2011-03-02 In this report the Foreign Affairs Committee calls on the British Government to use its influence to persuade the US to engage more fully, and swiftly, with the process of political reconciliation in Afghanistan if the US wishes to disengage its forces there. Although the current international emphasis favours intense military pressure, aimed at defeating the insurgency, it is clear that military pressure alone is not enough to bring security and stability to Afghanistan. The evidence presented to the Committee has suggested that the current full-scale and highly-intensive ISAF counter-insurgency campaign is not succeeding. The Committee questions the fundamental assumption that success in Afghanistan can be 'bought' through a strategy of 'clear, hold and build'. The distinction between al-Qaeda and the Taliban is crucial to generating appropriate policy responses in Afghanistan. The Committee says that despite the significant resources that have been invested in Afghanistan, and the enduring, wholehearted and admirable commitment and sacrifices of British personnel, the UK has not yet achieved its stated goals. There is also evidence that the core foreign policy justification for the UK's continued presence

in Afghanistan, namely that it is necessary in the interests of UK national security, may have been achieved some time ago, given the apparently limited strength of al-Qaeda in Afghanistan. The security rationale behind the UK Government's decision to announce the 2015 deadline for the unconditional withdrawal of UK combat forces remains unclear and there are a number of potential risks inherent in such an approach.

Faith-Based Violence and Deobandi Militancy in Pakistan Jawad Syed, Edwina Pio, Tahir Kamran, Abbas Zaidi, 2016-11-09 This book documents and highlights the Deobandi dimension of extremism and its implications for faith-based violence and terrorism. This dimension of radical Islam remains largely ignored or misunderstood in mainstream media and academic scholarship. The book addresses this gap. It also covers the Deobandi diaspora in the West and other countries and the role of its radical elements in transnational incidents of violence and terrorism. The specific identification of the radical Deobandi and Salafi identity of militants is useful to isolate them from the majority of peaceful Sunni and Shia Muslims. Such identification provides direction to governmental resources so they focus on those outfits, mosques, madrassas, charities, media and social media channels that are associated with these ideologies. This book comes along at a time when there is a dire need for alternative and contextual discourses on terrorism.

The Routledge Handbook of the Responsibility to Protect W. Andy Knight, Frazer Egerton, 2012-06-25 This Handbook offers a comprehensive examination of the Responsibility to Protect norm in world politics, which aims to end mass atrocities against civilians. The Responsibility to Protect (R2P) is amongst the most significant norms in global politics. As the authoritative guide to R2P, this edited volume gathers together the most respected and insightful voices to address key issues related to this emerging norm. The contributing authors do this over the course of three parts: Part I: The Concept of R2P Part II: Developing and Operationalising R2P Part III: The view from Over Here This book will be of much interest to students of R2P, humanitarian intervention, genocide, human rights, international law, peace studies, international organisations, security studies and IR.

Humanitarian Crises and Migration Susan F. Martin, Sanjula Weerasinghe, Abbie Taylor, 2014-04-24 Whether it is the stranding of tens of thousands of migrant workers at the Libyan-Tunisian border, or the large-scale displacement triggered by floods in Pakistan and Colombia, hardly a week goes by in which humanitarian crises have not precipitated human movement. While some people move internally, others internationally, some temporarily and others permanently, there are also those who become trapped in place, unable to move to greater safety. Responses to these crisis migrations are varied and inadequate. Only a fraction of crisis migrants are protected by existing international, regional or national law. Even where law exists, practice does not necessarily guarantee safety and security for those who are forced to move or remain trapped. Improvements are desperately needed to ensure more consistent and effective responses. This timely book brings together leading experts from multi-disciplinary backgrounds to reflect on diverse humanitarian crises and to shed light on a series of exploratory questions: In what ways do people move in the face of crisis situations? Why do some people move, while others do not? Where do people move? When do people move, and for how long? What are the challenges and opportunities in providing protection to crisis migrants? How might we formulate appropriate responses and sustainable solutions, and upon what factors should these depend? This volume is divided into four parts, with an introductory section outlining the parameters of crisis migration, conceptualizing the term and evaluating its utility. This section also explores the legal, policy and institutional architecture upon which current responses are based. Part II presents a diverse set of case studies, from the earthquake in Haiti and the widespread violence in Mexico, to the ongoing exodus from Somalia, and environmental degradation in Alaska and the Carteret Islands, among others. Part III focuses on populations that may be at particular risk, including non-citizens, migrants at sea, those displaced to urban areas, and trapped populations. The concluding section maps the global governance of crisis migration and highlights gaps in current provisions for crisis-related movement across multiple levels. This valuable book brings together previously diffuse research and policy issues under the analytical umbrella of crisis migration. It lays the foundations for assessing and addressing real challenges to the status quo, and will be of interest

to scholars, policy makers, and practitioners committed to seeking out improved responses and ensuring the dignity and safety of millions who move in the context of humanitarian crises.

International Law and Drone Strikes in Pakistan Sikander Ahmed Shah, 2014-11-13 While conventional warfare has an established body of legal precedence, the legality of drone strikes by the United States in Pakistan and elsewhere remains ambiguous. This book explores the legal and political issues surrounding the use of drones in Pakistan. Drawing from international treaty law, customary international law, and statistical data on the impact of the strikes, Sikander Ahmed Shah asks whether drone strikes by the United States in Pakistan are in compliance with international humanitarian law. The book questions how international law views the giving of consent between States for military action, and explores what this means for the interaction between sovereignty and consent. The book goes on to look at the socio-political realities of drone strikes in Pakistan, scrutinizing the impact of drone strikes on both Pakistani politics and US-Pakistan relationships. Topics include the Pakistan army-government relationship, the evolution of international institutions as a result of drone strikes, and the geopolitical dynamics affecting the region. As a detailed and critical examination of the legal and political challenges presented by drone strikes, this book will be essential to scholars and students of the law of armed conflict, security studies, political science and international relations.

The China Pakistan Axis Andrew Small, 2015-11-25 China and Pakistan, India's two most powerful neighbours, share an 'all-weather' relationship that is as reputed for its depth as it is layered in secrecy. Based on years of research and interviews, Andrew Small has put together the story of China and Pakistan's growing, and in parts troubled, friendship. The China-Pakistan Axis is essential to understanding the economic, political and security map of Asia, especially India's neighbourhood. It explains Beijing's extraordinary support to Pakistan's nuclear programme and defence planning, their strategic cooperation on India, the United States and Afghanistan, and the implications for counter-terrorism efforts. A special chapter for this Indian edition brings the book up to date on China's involvement in the Taliban talks.

Pakistan William J. Topich, 2018-06-15 This single-volume work documents Pakistan's troubled history, which has led to current global insecurities and created a breeding ground for radical insurgency and terrorism. Why is the volatile political status of Pakistan so critical to world security? How did the tribal region of northwest Pakistan become home to numerous insurgent factions, including the Pakistani Taliban and Al Qaeda? Is the government of Pakistan actively combating or facilitating terrorism and the growth of extremism? *Pakistan: The Taliban, Al Qaeda, and the Rise of Terrorism* addresses and answers these questions and more, providing a current and comprehensive examination of the terrorist and insurgent groups that use Pakistan as their global base of operation. Readers of this book will better understand how the activities of terrorist groups such as the Pakistan Taliban, Lashkar-e-Taiba, and Al Qaeda in Pakistan threaten the future of the state and why the situation in Pakistan is considered by many to be more vital to American interests than Afghanistan. Author William J. Topich evaluates the changing nature of U.S. policy in the region, including analysis of policy regarding drone strikes that target various radical groups, of state stabilization options, and of ongoing United States-Pakistan relations. His assessment of Pakistan's key role in global security accounts for the country's longstanding conflict with India, the Afghanistan wars, and the impact of the attacks of September 11, 2001, and identifies possible future scenarios for Pakistan and the accompanying implications for security.

Peacebuilding in Pakistan Heike Ruhland, 2019 When Pakistan was carved out of India in 1947 as a homeland for the Muslims of the subcontinent, it was envisioned as a secular state where non-Muslims would be granted freedom of religion and equal citizenship. However, the subsequent historical events led to a fast Islamization of nearly every part of public life and discrimination against the country's religious minorities, who today make up less than 4 per cent of the overall population. Based on extensive field work involving more than 100 non-structured qualitative interviews, this study explores the situation of the religious minorities and the dynamics of interfaith peacebuilding in the Islamic Republic of Pakistan. Primary focus was laid on the practice of interfaith dialogue, which -

given the draconic blasphemy laws - differs from interfaith dialogue as conceived of in the West. Additionally, other peacebuilding measures, as offered by various non-governmental organizations, were taken into account, be they advocacy, promotion of human rights and unbiased education, or policy negotiation with the government. Heike Ruhland holds two master's degrees, one in Islamic Studies (University of Zurich) and one in International Information Management (University of Hildesheim). She attained her PhD from the Academy of World Religions, University of Hamburg.

Al Qaeda's Global Crisis V. G. Julie Rajan, 2015-01-30 This book focuses on the crises facing Al Qaeda and how the mass killing of Muslims is challenging its credibility as a leader among Islamist jihadist organizations. The book argues that these crises are directly related to Al Qaeda's affiliation with the extreme violence employed against Muslims in Iraq, Syria, Afghanistan and Pakistan in the decade since 9/11. Al Qaeda's public and private responses to this violence differ greatly. While in public Al Qaeda has justified those attacks declaring that, for the establishment of a state of 'true believers', they are a necessary evil, in private Al Qaeda has been advising its local affiliates to refrain from killing Muslims. To better understand the crises facing Al Qaeda, the book explores the development of Central Al Qaeda's complex relationship with radical (mis)appropriations and manifestations of takfir, which allows one Muslim to declare another an unbeliever, and its unique relationship with each of its affiliates in Iraq, Syria, Afghanistan and Pakistan. The author then goes on to consider how the prominence of takfir is contributing to the deteriorating security in those countries and how this is affecting Al Qaeda's credibility as an Islamist terror organization. The book concludes by considering the long-term viability of Al Qaeda and how its demise could allow the rise of the even more radical, violent Islamic State and the implications this has for the future security of the Middle East, North Africa and Central/South Asia. This book will be of much interest to students of political violence and terrorism, Islamism, global security and IR.

The Routledge Handbook of Poverty in the Global South Rajendra Baikady, John Gal, Varoshini Nadesan, Sajid S.M., Gao Jianguo, 2023-12-01 This handbook initiates fresh debates on poverty and its impact in a constantly changing Global South society. It studies the concept, theories, and causes of poverty, as well as the design and delivery of social welfare policies related to specific groups, such as women, children, and the elderly. The chapters are theoretical, evidence-based, and empirical in nature and bring together a holistic understanding of social problems and issues in developing countries. The volume brings together researchers, educators, and practitioners from across the globe to develop a hands-on reference work that will be requisite for several social science disciplines concerned with poverty and the welfare of poor people. The first of its kind, the handbook will be indispensable for scholars and researchers of development studies, economics, social work, political studies, poverty studies, population and demographic studies, sociology, social anthropology, public policy, and political economy, especially those concerned with the Global South.

Civil Society and Pakistan's Economy Fayyaz Baqir, 2023-03-17 This book analyses the paradoxes of Pakistan's economy, meritocratic domestic policy, and the role of the state and the civil society. It argues that the transition in the country's foreign policy from geo-politics to geo-economic depends on a fundamental domestic policy transition from kleptocracy to meritocracy. *Civil Society and Pakistan's Economy* discusses how the prevalence of rent-seeking practices has undermined merit-based practices by increasing the cost of doing business and converting public loss into private profit by awarding inappropriate subsidies and imposing regressive taxes. The analyses are supported by describing the instruments and mechanisms used for rent-seeking practices and the creation of public awareness of options available to change these practices through citizen's action and civil society engagement. The book also shows the path of transformation and the role of participation and argues that aspiring for and capturing power is not the only way to transform Pakistan. A novel analysis depicting macro-micro linkages of encroachment of socio-economic space by the power elites and effective strategies used for its reappropriation by the people, the book will be of interest to academics researching South Asian Studies, in particular South Asian economics and politics.

Afghanistan, Pakistan and Strategic Change Joachim Krause, Charles King Mallory, IV, 2014-01-03 The region encompassing Afghanistan and Pakistan (Af/Pak region) is undergoing a

fundamental strategic change. This book analyses the nature of this strategic change, in order to seek possible future scenarios and to examine policy options. It also undertakes a critical review of the basic elements of the Western strategic approach towards dealing with regional conflicts in all parts of the world, with special emphasis on the Af/Pak region. Dealing with the political developments in one of the most volatile regions in the world – Afghanistan and Pakistan – the volume focuses on Western strategic concerns. The withdrawal of ISAF by 2014 will change the overall political setting and the work addresses the challenges that will result for Western policymakers thereafter. It examines the cases of Afghanistan and Pakistan separately, and also looks at the broader region and tries to identify different outcomes. This book will be of much interest to students of Central and South Asian politics, strategic studies, foreign policy and security studies generally.

Changing Patterns of Warfare between India and Pakistan Rizwana Abbasi, Muhammad Saeed Uzzaman, 2023-05-12 Changing Patterns of Warfare between India and Pakistan analyzes how advanced nuclear technologies and the advent of disruptive technologies have affected the evolving conflict between India and Pakistan. Advanced nuclear technologies such as nuclear submarines, aircraft carriers, ballistic missile defence systems (BMDs), multiple independently targetable re-entry vehicles (MIRVs), anti-satellite weapons (ASAT); and disruptive technologies such as hypersonic weapons, artificial intelligence (AI), lethal autonomous weapons (LAWs), unmanned aerial vehicles (UAVs) / drones and space-based and cyber technologies have all complicated crisis dynamics and the domain of warfare in the region. Further, the employment of India's compellence strategy is an indication of a change in its stance that demonstrates smart/surgical strikes are now more likely. The phenomenon of surgical strikes raises the question of how disruptive technologies will be used to gain direct/indirect military control and hence challenge the existing status quo and deterrence stability. Against this backdrop, the authors predict how this conflict may develop in the future and evaluate the ways to stabilize deterrence and regulate the militarization of artificial intelligence and disruptive technologies between India and Pakistan. This book will be of interest to all those researching and working in the fields of security studies, strategic studies, nuclear policy, deterrence thinking and proliferation/non-proliferation aspects of the nuclear weapons programme within South Asia and beyond. It will also be relevant for the academic community, policy-makers, diplomats, members of international non-governmental organizations (INGOs), professional research institutes and organizations working on India-Pakistan relations.

No End in Sight Nathan E. Busch, 2014-10-17 The global threat of nuclear weapons is one of today's key policy issues. Using a wide variety of sources, including recently declassified information, Nathan E. Busch offers detailed examinations of the nuclear programs in the United States, Russia, China, Iraq, India, and Pakistan, as well as the emerging programs in Iran and North Korea. He also assesses the current debates in international relations over the risks associated with the proliferation of nuclear weapons in the post-Cold War world. Busch explores how our understanding of nuclear proliferation centers on theoretical disagreements about how best to explain and predict the behavior of states. His study bridges the gap between theory and empirical evidence by determining whether countries with nuclear weapons have adequate controls over their nuclear arsenals and fissile material stockpiles (such as highly enriched uranium and plutonium). Analyzing the strengths and weaknesses of various systems of nuclear weapons regulation, Busch projects what types of controls proliferating states are likely to employ and assesses the threat posed by the possible theft of fissile materials by aspiring nuclear states or by terrorists. No End in Sight provides the most comprehensive and up-to-date analysis of issues at the forefront of contemporary international affairs. With the resurgence of the threat of nuclear terrorism, Busch's insights and conclusions will prove critical to understanding the implications of nuclear proliferation.

The Shias of Pakistan Andreas Rieck, 2016-01-15 The Shias of Pakistan are the world's second largest Shia community after that of Iran, but comprise only 10-15 per cent of Pakistan's population. In recent decades Sunni extremists have increasingly targeted them with hate propaganda and terrorism, yet paradoxically Shias have always been fully integrated into all sections of political, professional and social life without suffering any discrimination. In mainstream politics, the Shia-Sunni divide has never been an issue in Pakistan. Shia politicians in Pakistan have usually downplayed their religious beliefs, but there have always been individuals and groups who emphasised their Shia identity, and who zealously campaigned for equal rights for the Shias wherever and whenever they perceived these to be threatened. Shia 'ulama' have been at the forefront of communal activism in Pakistan since 1949, but Shia laymen also participated in such organisations, as they had in pre-partition India. Based mainly on Urdu sources, Rieck's book examines, first, the history of Pakistan's Shias, including their communal organisations, the growth of the Shia 'ulama' class, of religious schools and rivalry between orthodox ulama and popular preachers; second, the outcome of lobbying of successive Pakistan governments by Shia organisations; and third, the Shia-Sunni conflict, which is increasingly virulent due to the state's failure to combat Sunni extremism.
