Written in the Snows Lowell Skoog,2021-10-01 Century of Northwest wilderness skiing stories by noted expert 150 black-and-white and color photographs Celebrates the friluftsliv, or open-air living spirit, of backcountry skiing In *Written in the Snows*, renowned local skiing historian Lowell Skoog presents a definitive and visually rich history of the past century of Northwest ski culture, from stirring and colorful stories of wilderness exploration to the evolution of gear and technique. He traces the development of skiing in Washington from the late 1800s to the present, covering the beginnings of ski resorts and competitions, the importance of wild places in the Olympic and Cascade mountains (including Oregon's Mount Hood), and the friluftsliv, or open-air living spirit, of backcountry skiing. Skoog addresses how skiing has been shaped by larger social trends, including immigration, the Great Depression, war, economic growth, conservation, and the media. In turn, Northwest skiers have affected their region in ways that transcend the sport, producing local legends like Milnor Roberts, Olga Bolstad, Hans Otto Giese, Bill Maxwell, and more. While weaving his own impressions and experiences into the larger history, Skoog shows that skiing is far more than mere sport or recreation.

Northwest Forest Plan, the First 10 Years (1994-2003): Timber and nontimber resources, 2006 The socioeconomic monitoring report addresses two evaluation questions posed in the Northwest Forest Plan (the Plan) Record of Decision and assesses progress in meeting five Plan socioeconomic goals. Volume I of the report contains key findings. Volume II addresses the question, Are predictable levels of timber and nontimber resources available and being produced? It also evaluates progress in meeting the goal of producing a predictable level of timber sales, special forest products, livestock grazing, minerals, and recreation opportunities. The focus of volume III is the evaluation question, Are local communities and economies experiencing positive or negative changes that may be associated with federal forest management? Two Plan goals are also assessed in volume III: (1) to maintain the stability of local and regional economies on a predictable, long-term basis and, (2) to assist with long-term economic development and diversification to minimize adverse impacts associated with the loss of timber jobs. Progress in meeting another Plan goal--to promote agency-citizen collaboration in forest management--is evaluated in volume IV. Volume V reports on trends in public values regarding forest management in the Pacific Northwest over the past decade, community views of how well the forest values and environmental qualities associated with late-successional, old-growth, and aquatic ecosystems have been protected under the Plan (a fifth Plan goal), and issues and concerns relating to forest management under the Plan expressed by community members. Volume VI provides a history of the Northwest Forest Plan socioeconomic monitoring program and a discussion of potential directions for the program.
