

Consolidation Policies in Federal States Dietmar Braun, Christian Ruiz-Palmero, Johanna Schnabel, 2016-12-19 The Global Financial Crisis has led to a renewed attention for the management of public debt and deficits of advanced and developing industrial states. To successfully deal with such problems of public finances raises particular concerns in federal states where fiscal competencies are split between two levels of government. This book offers comparative in-depth knowledge of political struggles related to fiscal consolidation policies in eleven federal states since the 1990s, including the Global Financial Crisis and its aftermath. It identifies conditions that lead to robust solutions that can both commit federal actors to prudent fiscal policy-making and avoid conflicts between federal actors that cause federal instability. This text will be of key interest to scholars and students of political economy and comparative politics in general and comparative federalism and EU Politics in particular.

Beziehungen und Identitäten Gisela Holfter, Marieke Krajenbrink, Edward Moxon-Browne, 2004 Die Hauptthemen dieses Bandes sind Fragen der Identität in Österreich und der Schweiz, sowie die Beziehungen zwischen diesen beiden Ländern und Irland. Dieser Sammelband, der ausgewählte Beiträge der 3. Limericker Konferenz für deutsch-irische Studien (4.-6. April 2002) enthält, versteht sich als Beitrag zur kontinuierlichen Erkundung und Hinterfragung europäischer Befindlichkeiten und Verbindungen im Wandel der Zeit. Gemeinsam ist den genannten Ländern u.a. die Auseinandersetzung mit größeren, bisweilen übermächtigen Nachbarn, welche historisch, linguistisch und politisch ihre Spuren hinterlässt. Thematisiert werden außerdem literarische Verbindungen, Fragen der Mehrsprachigkeit, der jeweilige Umgang mit der Neutralität und die facettenreichen Beziehungen, die weit in die Vergangenheit zurückreichen. The principal themes of the volume are questions of identity in Austria and Switzerland, as well as relationships between both these countries and Ireland. This volume contains selected contributions to the 3rd Limerick conference in Irish-German Studies (4-6 April 2002). The contributors, collectively and individually, explore and analyse distinctive European mentalities as well as their connections, and evolution, over time. The three countries share the experience of hugely influential and at times overpowering neighbours, neutrality in foreign policy, and links at many levels that reach far into the past.

EU Enlargement and Socialization Stefan Engert, 2010-02-25 The European Union's enlargement has been considered a success story – apart from Cyprus and Turkey. This book looks at the EU's expansion and examines its effectiveness in terms of international socialization and compliance, focussing specifically on the socialization of Turkey and Cyprus into the Western community. Although NATO-member Turkey submitted its membership application long before the end of the Cold War, the Kemalist state still struggles to become the first Muslim EU member state. Cyprus was allowed to join the organization in 2004, but the island remains a divided entity. Providing a comprehensive theoretical perspective, the book is divided into three parts and investigates three questions: Why expand? From an EU / international organizations perspective. Why join? From an applicants' perspective. Why comply? Exploring why a state would choose to adapt to the EU's fundamental norms and rules from a candidates' perspective. Contradicting the impression that the latest round of EU enlargement has been a model story of smooth and effective socialization from top to bottom, this book will be of interest to students and scholars of the EU, European politics, international relations and particularly those interested in Turkey and Cyprus.

E-Government: Towards Electronic Democracy Michael Böhlen, Johann Gamper, Wolfgang Polasek, Maria A. Wimmer, 2005-01-28 The TCGOV 2005 international conference on e-government was held at the Free University of Bozen-Bolzano during March 2–4, 2005. The conference was initiated by the working group “Towards Electronic Democracy” (TED) of the European Science Foundation and was jointly organized by the Free University of Bozen-Bolzano, the Municipality of Bozen-Bolzano, the TED Working Group, and the IFIP Working Group 8.5. The conference addressed a large spectrum of issues that are relevant and have to be investigated for a successful transition from the traditional form of government to a new form known as e-government. The main focus was on the following topics: – improving citizen participation and policy making (e-democracy) – government application integration – semantic Web technologies for e-government – security aspects for e-government services Two sessions were dedicated to e-democracy, an emerging area within government that seeks to enhance democratic processes and provide increased opportunities for individuals and communities to be involved in governmental decisions. The contributions of these two sessions cover more fundamental results and insights as well as experiences from different countries. Another focus was on government application integration and the use of semantic Web technologies, which are important technical aspects on the agenda of e-government research. Different architectures for the integration and orchestration of distributed services and processes were presented along with two case studies. Three papers about Semantic Web technologies discussed the use of ontologies in e-government.

Managing Interdependencies in Federal Systems Johanna Schnabel, 2020-02-18 Intergovernmental councils have emerged as the main structures through which the governments of a federation coordinate public policy making. In a globalized and complex world, federal actors are increasingly interdependent. This mutual dependence in the delivery of public services has important implications for the stability of a federal system: policy problems concerning more than one government can destabilize a federation, unless governments coordinate their policies. This book argues that intergovernmental councils enhance federal stability by incentivizing governments to coordinate, which makes them a federal safeguard. By comparing

reforms of fiscal and education policy in Australia, Canada, Germany, and Switzerland, this book shows that councils' effectiveness as one of federalism's safeguards depends on their institutional design and the interplay with other political institutions and mechanisms. Federal stability is maintained if councils process contentious policy problems, are highly institutionalized, are not dominated by the federal government, and are embedded in a political system that facilitates intergovernmental compromising and consensus-building.

The Swiss Air Power Fiona Lombardi, 2007 Through this comprehensive inquiry, the dissertation has highlighted a series of doctrinal inadequacies since the very beginning of air power in Switzerland and some deficiencies regarding current operational capabilities, which must be rectified so as not to jeopardise homeland security in the long run. Do Exclusionary Rules Ensure a Fair Trial? Sabine Gless, Thomas Richter, 2019-04-17 This open access publication discusses exclusionary rules in different criminal justice systems. It is based on the findings of a research project in comparative law with a focus on the question of whether or not a fair trial can be secured through evidence exclusion. Part I explains the legal framework in which exclusionary rules function in six legal systems: Germany, Switzerland, People's Republic of China, Taiwan, Singapore, and the United States. Part II is dedicated to selected issues identified as crucial for the assessment of exclusionary rules. These chapters highlight the delicate balance of interests required in the exclusion of potentially relevant information from a criminal trial and discusses possible approaches to alleviate the legal hurdles involved.

Societies, Social Inequalities and Marginalization Raghubir Chand, Etienne Nel, Stanko Pelc, 2017-04-04 This book provides an overview of marginality or marginalization, as a concept, characterizing a situation of impediments – social, political, economic, physical, and environmental – that impact the abilities of many people and societies to improve their human condition. It examines a wide range of examples and viewpoints of societies struggling with poverty, social inequality and marginalization. Though the book will be especially interesting for those looking for insights into the situation and position of ethnic groups living in harsh mountainous conditions in the Himalayan region, examples from other parts of the world such as Kyrgyzstan, Israel, Switzerland and Finland provide an opportunity for comparison of marginality and marginalization from around the world. Also addressed are issues such as livelihood, outmigration and environmental threats, taking into account the conditions, scale and perspective of observation. Throughout the text, particular attention is given to the context and concept of 'marginalization', which sadly remains a persistent reality of human life. It is in this context that this book seeks to advance our global understanding of what marginalization is, how it is manifested and what causes it, while also proposing remedial strategies.

Controlling Immigration James Hollifield, Philip L. Martin, Pia Orrenius, 2014-07-30 The third edition of this major work provides a systematic, comparative assessment of the efforts of a selection of major countries, including the U.S., to deal with immigration and immigrant issues— paying particular attention to the ever-widening gap between their migration policy goals and outcomes. Retaining its comprehensive coverage of nations built by immigrants and those with a more recent history of immigration, the new edition pays particular attention to the tensions created by post-colonial immigration, and explores how countries have attempted to control the entry and employment of legal and illegal Third World immigrants, how they cope with the social and economic integration of these new waves of immigrants, and how they deal with forced migration.

The Economic, Social and Political Elements of Climate Change Walter Leal Filho, 2010-11-23 A unique feature of this book is its strong practice-oriented nature: it contains a wide range of papers dealing with the social, economic and political aspects of climate change, exemplifying the diversity of approaches to climate change management taking place all over the world, in a way never seen before. In addition, the book describes a number of projects and other initiatives happening in Africa, Asia, Europe, Latin American and the Australasian region, providing a profile of the diversity of works taking place today.

Social Security in India and China Silvan Siefert, 2015-11-26 In der vorliegenden Studie wird eine umfassende vergleichende Analyse der Sozialpolitik mit Fokus auf die Soziale Sicherheit in Indien und China vorgelegt. Für dieses Vorhaben wird die politische Performanz Indiens und China im Politikfeld der Sozialen Sicherheit verglichen, um in einem nächsten Schritt die gefundenen empirischen Ergebnisse anhand der gängigen theoretischen Ansätze zu erklären. Die geleistete empirisch und theoretisch vergleichende Studie zwischen einer Demokratie und einer Autokratie eröffnet einen neuen Blick auf die Faktoren der Sozialpolitik in unterschiedlichen politischen, wirtschaftlichen und sozialen Kontexten.

The Chancellor Guide to the Legal and Shari'a Aspects of Islamic Finance Humayon A. Dar, Umar F. Moghul, 2012-01-09 Unprecedented economic growth and wealth accumulation in predominately Muslim countries have prompted many financial institutions in the US and Europe to position their investment teams across the Middle East and Asia to be closer to the markets in which they invest, and to take advantage of asset-gathering opportunities. This growth has also encouraged an increasing number of western industrialised countries to adopt legislation that responds to the requirements of the Muslim investment community. To be effective in these markets it is essential that professionals have an understanding of how Shari'a legal principles are applied in the financial sector. Failure to do so exposes them and their clients to potential financial, legal and reputational pitfalls. The Chancellor Guide to the Legal and Shari'a Aspects of Islamic Finance is the first professional reference to focus specifically on the legal dimension

of Islamic Finance. The guide brings together nineteen Islamic Finance legal practitioners and advisers to provide a comprehensive yet practical legal perspective on the subject. Each contributor draws on several years' hands-on experience in Islamic Finance product development and advice to leading financial institutions to provide a real-world, contemporary assessment of the key legal issues in Islamic Finance. The guide's hands-on approach and accessible style make it required reading for everyone with a professional interest in Islamic Finance, be they lawyers, accountants, regulators, bankers or investors. It is also a unique reference for academic institutions worldwide.

International Socialization in Europe F. Schimmelfennig, S. Engert, H. Knobel, 2006-09-04 At the end of the Cold War, the Western international community embarked on a large-scale project of promoting democratic change and consolidation in Eastern Europe. This book explains its mixed results. It examines the strategies of European organizations and the conditions of their success and failure.

Biopolitics and Structure in Legal Education Luca Siliquini-Cinelli, Thomas Giddens, 2023-06-30 Taking up the study of legal education in distinctly biopolitical terms, this book provides a critical and political analysis of structure in the law school. Legal education concerns the complex pathways by which an individual becomes a lawyer, making the journey from lay-person to expert, from student to practitioner. To pose the idea of a biopolitics of legal education is not only to recognise the tensions surrounding this journey, but also to recognise that legal education is a key site in which the subject engages, and is engaged by, a particular structure—and here the particular structure of the law school. This book explores that structure by addressing the characteristics of the biopolitical orders engaged in legal education, including: understanding the lawyer as a commodity, unpicking the force relations in legal education, examining the ways codes of conduct in higher education impact academic freedom, as well as putting the distinctly Western structures of legal learning within a wider context. Assembling original, field-defining essays by both leading international scholars and emerging researchers, it constitutes an indispensable resource in legal education research and scholarship that will appeal to legal academics everywhere.

Russia's Agro-Food Sector Peter Wehrheim, Klaus Froberg, Eugenia Serova, Joachim von Braun, 2012-12-06 This book analyzes the transition of Russia's agro-food sector from a centrally planned system to a market-oriented one. The chapters set out to explain the initial conditions of transition, describe the measures undertaken, survey the current situation, and offer perspectives on how best to continue with the reform. Hence, the book not only provides insights into Russia's food economy, it also gives very valuable information about the process of transition and the question: What next? Within the Russian context, the food economy is of special importance, due to the relatively high share it represents in the economy and its importance for employment. Furthermore, the privatization and the restructuring of the country's agro-food sector is one of the most controversial issues in the ongoing domestic political debate about the reform process. Russia is also important in that its reintegration into the world economy is at stake. Russia's Agro-Food Sector: Towards Truly Functioning Markets should increase the understanding of the issues causing the cumbersome implementation of reform measures and, in so doing, might provide scholars and policymakers with advice on how to improve the transition process. In fact, one of the most important lessons from the book is that markets will continue to malfunction as long as institutions are not functioning properly.

Sixty Years of Double Beta Decay H. V. Klapdor-Kleingrothaus, 2001 Nuclear double beta decay is one of the most promising tools for probing beyond-the-standard-model physics on beyond-accelerator energy scales. It is already now probing the TeV scale, on which new physics should manifest itself according to theoretical expectations. Only in the early 1980s was it known that double beta decay yields information on the Majorana mass of the exchanged neutrino. At present, the sharpest bound for the electron neutrino mass arises from this process. It is only in the last 10 years that the much more far-reaching potential of double beta decay has been discovered. Today, the potential of double beta decay includes a broad range of topics that are equally relevant to particle physics and astrophysics, such as masses of heavy neutrinos, of sneutrinos, as SUSY models, compositeness, leptoquarks, left-right symmetric models, and tests of Lorentz symmetry and equivalence principle in the neutrino sector. Double beta decay has become indispensable nowadays for solving the problem of the neutrino mass spectrum and the structure of the neutrino mass matrix O_{Co} together with present and future solar and atmospheric neutrino oscillation experiments. Some future double beta experiments (like GENIUS) will be capable to be simultaneously neutrino observatories for double beta decay and low-energy solar neutrinos, and observatories for cold dark matter of ultimate sensitivity. This invaluable book outlines the development of double beta research from its beginnings until its most recent achievements, and also presents the outlook for its highly exciting future. Contents: Double Beta Decay O_{Co} Historical Retrospective and Perspectives; Original Articles: From the Early Days until the Gauge Theory Era; The Nuclear Physics Side O_{Co} Nuclear Matrix Elements; The Nuclear Physics Side O_{Co} Nuclear Matrix Elements; Effective Neutrino Masses from Double Beta Decay, Neutrino Mass Models and Cosmological Parameters O_{Co} Present Status and Prospects; Other Beyond Standard Model Physics: From SUSY and Leptoquarks to Compositeness and Quantum Foam; The Experimental Race: From the Late Eighties to the Future; The Future of Double Beta Decay; Appendices: Ten Years of Heidelberg O_{Co} Moscow Experiment; The Potential Future O_{Co} GENIUS. Readership: Particle physicists, nuclear physicists and astrophysicists.

Re-shaping Cities Michael Guggenheim, Ola Söderström, 2009-12-04 This original collection examines how architectural ideas, social models and building forms circulate round the world and become mediated and adapted to local conditions. The book shows how types such as skyscrapers,

mosques or living history museums are imported, adapted and contested in different societies and how urban landscapes are reshaped by the global circulation of models drawn from elsewhere. Written by scholars from different disciplinary backgrounds –architecture, anthropology, geography, linguistics, science studies and sociology – the book draws its inspiration from a series of different approaches and offers both original theoretical reflection and carefully crafted case-studies.

Encoding the Olympics Luo Qing,Giuseppe Richeri,2013-09-13 Encoding the Olympics assembles a uniquely representative international team of media experts to provide a comprehensive review of the global impact of media and cultural communications associated with the Beijing 2008 Olympics. Commissioned by the IOC, this pioneering comparative study – the largest in Olympic Games research –provides a ground-breaking, panoramic, cross-cultural perspective on media responses to the leading sports event of the modern world. The representative team that undertook the study includes media commentators and political analysts, sport and media journalists, Sinologists and observers of the Asian Pacific Rim, academics in Olympic Studies and media and communication studies, scholars of the cultural and sociology studies of sport and festival and events managers. Encoding the Olympics provides a unique, encyclopaedic study that will serve as a versatile resource at several levels – as a textbook or source reference for academic institutions, media public relations agencies that facilitate the work of inter-cultural exchange organisations, and international communication departments of multinational enterprises and international NGOs. This volume analyses global media responses to a mega-sport event on a scale never before attempted. This book was previously published as a special issue of the International Journal of the History of Sport.

Insurance Systems in Times of Climate Change Cornel Quinto,2011-10-22 Natural disasters such as large-scale flooding are on the increase. Climate change directly affects our basis of existence. This includes residential buildings, and commercial and industrial properties. The author highlights the requirements that will have to be met by a protection system for buildings in the future. Insurance against natural hazards lies at the heart of such a system. The insurance systems of Germany, France, Spain, Switzerland and the USA are presented. The author explains what type of insurance system is best suited to meet the challenge of climate change. The starting point of the legal section is statutory insurance with a monopoly. The question of whether such insurance is compatible with Swiss and EU law is examined. Keywords in this respect are economic freedom, competition, services of general interest and universal service.
