The Race for the 2012 Olympics Mike Lee,2012-09-30 London bid leader and British Olympic hero Sebastian Coe, Tony Blair and David Beckham all played a part in winning the most competitive race for the Games in Olympic history. But it was far from plain sailing and the campaign was a rollercoaster ride of emotions: full of drama, controversy and tears from the moment businesswoman Barbara Cassani was given the task of launching the bid in 2003, to the fateful day in Singapore when her successor, Lord Coe, and the rest of the world was told London had won. Mike Lee was at the heart of this intriguing journey through the entangled world of International Olympic Committee politics, international sport, British politics and the media as he travelled the world with Coe and other team members to present London's bid.

London 2012 and the Post-Olympics City Phil Cohen,Paul Watt,2017-09-20 This book brings together a body of new research which looks both backwards and forwards to consider how far the London 2012 Olympic legacy has been delivered and how far it has been a hollow promise. Cohen and Watt consider the lessons that can be learnt from the London experience and aptly apply them to other host cities, specifically Rio 2016 and Tokyo 2020. The Olympics are often described as a 'mega-event' in a way that assumes the host cities have no other existence outside, before or beyond the contexts imposed by the Games themselves. In terms of regeneration, the London 2012 Olympics promised to trigger a mega-regeneration project that was different to what had come before. This time the mistakes of other large-scale projects like London Docklands

and Canary Wharf would be put right: top-down planning would be replaced by civic participation, communication and ‘the local’. This edited collection questions how far the 2012 London legacy really is different. In so doing, it brings fresh evidence, original insights and new perspectives to bear on the post-Olympics debate. A detailed and well-researched study, this book will be of great interest to scholars of urban geography, sociology, urban planning, and sports studies.

The 2012 Olympics: Who Will Win at the London Olympics? Jack Westerfil, 2012-07-30 ABOUT THE BOOK I am not an athletically inclined person, and my own understanding of what the Olympic movement is about didn't happen until 2009 when I was part of a group of several hundred American entrepreneurs selected to be a part of British Airways' Face to Face program. All members of the group had been given a free round trip ticket to travel anywhere in the world. The objective was to make it possible for us to meet face to face with other companies around the globe, and score business opportunities that we would not ordinarily have access to. The day of our arrival in London, was a whirlwind of activities that included networking sessions and dinner at the Radisson Edwardian Heathrow hotel. Sir Clive Ronald Woodward, the British Olympic Association's Director of Elite Performance gave a presentation that resonated with many in the audience. He talked about sports principles as they apply to life and business: How there are certain qualities like “teachability” that will determine whether or not you will become an elite performer in any field. When I returned to my home in Atlanta, I challenged myself to expand the reach of my business, E-graphX Omnimedia. I applied as a supplier of writing and design services to bid on Olympic contracts on CompeteFor.com, the UK based portal for researching and bidding on contracts for the 2012 Olympics. My application was accepted. Being a part of CompeteFor gave me a dynamic perspective regarding elite performance, competition and the Olympic movement that I did not have before. I witnessed the precision and attention to detail carried out by the London Olympics machinery, which asked relevant, holistic questions about workplace diversity, balanced finances, quality assurance, and fair hiring practices. Vendors from all over the world with specialities that varied from fine art to web design and waste management gathered at the cyber market place to put the name of their company in the hat for the 2012 Olympics contracts. The process of building the London Olympics was an exercise in elite performance in competition. Through democratization of the building process, the city of London exemplified fair and open competition, which is a major aspect of the Olympic spirit. The Olympic torch sheds a light that teaches the principles of peace and racial equality. This aspect was highlighted in the recent death of Olympic pioneer LeRoy T. Walker, whom the New York Times described as “first African-American to coach a United States men's Olympic track team and to serve as the president of the United States Olympic Committee.” One of the greatest Olympic “teachability” moments occurred during the 1936 Olympics in Nazi Germany. Thirteen African American athletes won medals. EXCERPT FROM THE BOOK The Kuwait chapter was suspended in 2010. The International Sports Federations administer one or more sports on an international level. The IFs are responsible for the integrity of their sport(s) internationally. How Olympic Host Countries Are Chosen There are three basic steps to becoming a host city for the Olympics: 1. The country that wants to host the Olympics has to first submit its name to the IOC and become an “applicant city.” 2. Over a period of 10 months, the IOC examines the applicant city to see if it is big enough to handle the expansive influx of patrons and create the kind of infrastructure that will allow this international event to proceed smoothly and safely. The residents of the city must be able to support the costs of an Olympic venture. The city has to maintain a positive profile. A city cannot be a hot bed for terrorists and expect to win an Olympic bid. If the city can meet these criteria, it then progresses to the stage of being a “candidate city.” ...buy the book to continue reading!
