Dismantling the League of Nations Jane Mumby,2023-11-30 The League of Nations, one of the world's first multi-function intergovernmental organisations, was also one of the first to undergo liquidation. This book unveils the last chapter in its story, showing how complex and time-consuming the end of this 'great experiment' truly was. Starting with the signing of the Charter of the United Nations in 1945 - the death knell of the League - Mumby traces the closure process that followed. From the final meeting of the Assembly in April 1946, the transfer of assets and functions to the UN, the liquidation of the Secretariat, and the last acts of business through 1948, this book follows the story through the eyes of those who made it happen. It demonstrates why this process took longer than expected, highlights the importance of human agency in even the most bureaucratic of institutions, and points to the lingering impact of the League on international organisations today. Uncovering both the institutional and personal aspects of the League of Nations' final chapter, this book furthers our understanding of this famous institution, shedding light on those that continue to dominate contemporary international relations, and exposing the unavoidable complexity of dismantling an intergovernmental organisation.

Loss Reserving Gregory Taylor,2012-12-06 All property and casualty insurers are required to carry out loss reserving as a statutory accounting function. Thus, loss reserving is an essential sphere of activity, and one with its own specialized body of knowledge. While few books have been devoted to the topic, the amount of published research literature on loss reserving has almost doubled in size during the last fifteen years. Greg Taylor's book aims to provide a comprehensive, state-of-the-art treatment of loss reserving that reflects contemporary research advances to date. Divided into two parts, the book covers both the conventional techniques widely used in practice, and more specialized loss reserving techniques employing stochastic models. Part I, Deterministic Models, covers very practical issues through the abundant use of numerical examples that fully develop the techniques under consideration. Part II, Stochastic Models, begins with a chapter that sets up the additional theoretical material needed to illustrate stochastic

modeling. The remaining chapters in Part II are self-contained, and thus can be approached independently of each other. A special feature of the book is the use throughout of a single real life data set to illustrate the numerical examples and new techniques presented. The data set illustrates most of the difficult situations presented in actuarial practice. This book will meet the needs for a reference work as well as for a textbook on loss reserving.

Hershman, 2017-04-11 Co-edited and written by an interdisciplinary team of experts in oncology and cardiology, this book is a clinically useful resource on these overlapping topics: • Cardiac complications in patients receiving cancer therapy • The treatment of cancer in patients with cardiovascular disease • The treatment of cardiovascular disease in patients with cancer When relevant to medical practice, epidemiology and basic science are also included in the discussion and each chapter is written by an oncologist and a cardiologist. Additionally, the chapters follow a similar format to make the book truly interdisciplinary, user-friendly, and clinically applicable to specialists and non-specialists who care for patients with both cancer and cardiovascular disease.
