**Slavery in the United States [2 volumes]** Junius P. Rodriguez, 2007-03-20 A comprehensive, contextual presentation of all aspects—social, political, and economic—of slavery in the United States, from the first colonization through Reconstruction. For 250 years, slavery was part of the fabric of American life. The institution had an enormous economic impact and was central to the wealth of the agrarian South. It had as great an impact on American culture, cementing racism and other attitudes that echo into the present. This encyclopedia is an ambitious examination of all the issues surrounding slavery: the origins, the justifications, the controversies, and the human drama. These volumes represent the work of 75 distinguished scholars from around the world. Ten thematic essays present a thorough examination of slavery and slave culture, including a rare treatment of slavery from the slave's point of view. Three hundred A–Z entries provide instant access to specific people, issues, and events. Today, slavery's immorality seems obvious. This encyclopedia provides the student or general reader with an in-depth explanation of how the practice evolved and was normalized, then anathematized and abolished.

**China Maritime Force-Navy, Coast Guard, MSA and Maritime Militia** YU-PING SU, 2024-02-05 Introduction to 2024 most updated Chinese Naval force, including People liberation Army Navy, China People's Armed Police's Coast Guard corps, MSA fleet, Maritime Militia. If you want to know this growing force who might challenge US Navy's global power, it must be Chinese. If you know nothing on Chinese Naval Force, you will certainly consider US navy as number one in the world. Once you know how powerful the Chinese naval force is today, you will worry and can not sleep. To tackle the challenge, US need to regain the upraising spirit after Pearl Harbor in 1941, do more research and then start to build ships like making hamburger, a ship a week. Pretend that China doesn't exist will not improve the situation.

Early Aviation in Long Beach Gerrie Schipske, 2009 By 1920, when Amelia Earhart attended Earl S. Daugherty's air circus and then took her first airplane ride with Long Beach Poly High School graduate Frank Hawks, Long Beach was already a key part of the golden age of aviation. Balloonists had parachuted onto the city's beaches in 1905 near the Pine Avenue Pier, and stunt pilots such as Frank Stites took off and landed on its sands in 1908. The Long Beach Chamber of Commerce sponsored the altitude contest won by Arch Hoxsey in the second Los Angeles Air Meet in 1910. Cal Rodgers ended the first transcontinental flight in the water near Linden Avenue on December 10, 1911. A former Army Air Corps flight instructor, Earl Daugherty was known as the greatest stunt pilot and owned the area's first non-beach airfield. This volume offers glimpses of early aviation at one of its core development locales,

including photographs never before published of Earhart's flight instructor, John G. Montijo.

**Pop Culture Places [3 volumes]** Gladys L. Knight, 2014-08-11 This three-volume reference set explores the history, relevance, and significance of pop culture locations in the United States—places that have captured the imagination of the American people and reflect the diversity of the nation. Pop Culture Places: An Encyclopedia of Places in American Popular Culture serves as a resource for high school and college students as well as adult readers that contains more than 350 entries on a broad assortment of popular places in America. Covering places from Ellis Island to Fisherman's Wharf, the entries reflect the tremendous variety of sites, historical and modern, emphasizing the immense diversity and historical development of our nation. Readers will gain an appreciation of the historical, social, and cultural impact of each location and better understand how America has come to be a nation and evolved culturally through the lens of popular places. Approximately 200 sidebars serve to highlight interesting facts while images throughout the book depict the places described in the text. Each entry supplies a brief bibliography that directs students to print and electronic sources of additional information.

**Special Edition Using Mac OS X, V10.3 Panther** Brad Miser, 2004 The Panther release of Mac OS X continues the development of the Macintosh operating system. Mac OS X has become the dominant OS on the Macintosh platform and is currently the default OS on all new Macintosh computers. Mac OS X is a complex and powerful operating system for which no documentation is provided by Apple outside of the Apple Help system, which contains very limited information. Special Edition Using Mac OS X Panther provides the in-depth, wide ranging coverage that enables Mac users to get the most out of the operating system and included tools. This book explains how to get the most out of the core OS, including the Finder, desktop, and system customization. The book also shows readers how to use OS X's Internet applications for email, Web surfing, and .mac for publishing content on the Net. One of the book's major strengths is the extensive coverage of iTunes, iPhoto, iDVD, and iMovie. QuickTime and QuickTime Pro are also covered. The book helps readers understand and configure the technologies to expand their systems.

*Making Model Railway Buildings* Andy McMillan,2014-04-30 This invaluable book is essential reading for all railway modellers, whatever their level of expertise. The author provides an overall understanding of the purpose of making buildings for a model railway and covers their construction, their positioning and how to light them. Topics covered include railway and non-railway buildings, explaining how the latter can also enhance your trains; modelling attitudes, the use of scale, levels of detail and both regional vernacular and railway architecture; ready-made buildings and how you can adapt them to your own particular purposes; different materials available for building structures and ways of choosing, finding, measuring and recording suitable prototypes; step by step construction of a cardboard building kit to illustrate the use of basic modelling tools and to explain essential procedures and techniques; using and modifying 'out-of-the-box' model buildings. Also explores the subtleties of making model railway buildings from scratch without the use of a kit, or anything more than hand-tools and a few sheets of suitable material, giving guidance on the appropriate use of texture and colour, and shows how walls, doors, windows, roofs and chimneys can be created, painted, detailed and finished off. Discusses the many aspects of lighting, including external lighting, such as street and platform lights, and the internal lighting of buildings, the problems they pose and how they can be resolved. Lighting can create dramatic effects with reference, for example, to the installation of illuminated ground signals in N-gauge using the latest 'surface-mount' technology, and by producing brilliantly illuminated back-lit sunsets. Superbly illustrated with 622 colour photographs.
