From Ultrasound to Army Hanni Mann-Shalvi,2018-05-11 Daring to gaze directly into the core of parenting in Israel, this book presents, for the first time, a study that focuses on the conscious and unconscious aspects of the Israeli parenting experience when raising sons is overshadowed by the knowledge that at 18 years old, these sons will be drafted into inherently life-endangering compulsory military service. Exposing the emotional drama, hidden from open view until now, and against a background of a uniquely intertwined Jewish and Israeli history, Hanni Mann-Shalvi explores the dynamics that shape Israeli parenting norms, and simultaneously impact the couple relationship as sons grow up and develop their masculine Israeli identity. From Ultrasound to Army delves into the developmental processes experienced by the young Israeli male up until military recruitment, his image as a cadet and later as a commando, his changing relationship with his parents, and his experiences on being discharged, all of which affect his development from boy to man.

Methods for Risk Assessment of Transgenic Plants Klaus Ammann, Yolande Jacot, Gösta Kjellsson, Vibeke Simonsen, 2012-12-06 The Berne Symposium invited leading scientists of risk assessment research with transgenic crops on an international level in order to enhance the

discussion regulators and members of the biotech industry. The goal was to determine the status quo and also to make progress in times of a first global spread of transgenes in agrosystems about risk assessment. The dialogue between scientists, regulators and industry representatives also revealed some lacunes of risk assessment research, which will have to be filled in the future: We still lack longterm experience, for which we will have to collect data with scientific precision. The symposium concluded asking for a risk-oriented longterm monitoring system based on critical science and hard data. This volume presents the discussion sessions as well as the scientific contributions and thus mirrors the risk assessment debate, based not on exaggerated negative scenarios but on critical science and hard data.
