Return to Volcano Town R. Wally Johnson,Neville A. Threlfall,2023-10-24 Wally Johnson and Neville Threlfall re-examine the explosive volcanic eruptions that in 1937–43 killed more than 500 people in the Rabaul area of East New Britain, Papua New Guinea. They reassess this disaster in light of the prodigious amount of new scientific and disaster-management work that has been undertaken there since about 1971, when strong tectonic earthquakes shook the area. Comparisons are made in particular with volcanic eruptions in 1994–2014, when half of Rabaul town was destroyed and then abandoned. A striking feature of historical eruptive periods at Rabaul is the near-simultaneous activity at Vulcan and Tavurvur volcanoes, on either side of Rabaul Harbour. Such rare ‘twin’ eruptions are interpreted to be the result of a common magma reservoir beneath the harbour. This interpretation has implications for ongoing hazard and risk assessments and for volcano monitoring in the area.

Pacific Islanders Under German Rule Peter J. Hempenstall,2016-06-01 This is an important book. It is a reprint of the first detailed study of how Pacific Islanders responded politically and economically to their rulers across the German empire of the Pacific. Under one cover, it captures the variety of interactions between the various German colonial administrations, with their separate approaches, and the leaders and people of Samoa in Polynesia,

the major island centre of Pohnpei in Micronesia and the indigenes of New Guinea. Drawing on anthropology, new Pacific history insights and a range of theoretical works on African and Asian resistance from the 1960s and 1970s, it reveals the complexities of Islander reactions and the nature of protests against German imperial rule. It casts aside old assumptions that colonised peoples always resisted European colonisers. Instead, this book argues convincingly that Islander responses were often intelligent and subtle manipulations of their rulers' agendas, their societies dynamic enough to make their own adjustments to the demands of empire. It does not shy away from major blunders by German colonial administrators, nor from the strategic and tactical mistakes of Islander leaders. At the same time, it raises the profile of several large personalities on both sides of the colonial frontier, including Lauaki Namulau'ulu Mamoe and Wilhelm Solf in Samoa; Henry Nanpei, Georg Fritz and Karl Boeder in Pohnpei; or Governor Albert Hahl and Po Minis from Manus Island in New Guinea.

A Many-Valued Approach to Deduction and Reasoning for Artificial Intelligence Guy Bessonet,2007-07-23 This book introduces an approach that can be used to ground a variety of intelligent systems, ranging from simple fact based systems to highly sophisticated reasoning systems. As the popularity of AI related fields has grown over the last decade, the number of persons interested in building intelligent systems has increased exponentially. Some of these people are highly skilled and experienced in the use of AI techniques, but many lack that kind of expertise. Much of the literature that might otherwise interest those in the latter category is not appreciated by them because the material is too technical, often needlessly so. The so called logicians see logic as a primary tool and favor a formal approach to AI, whereas others are more content to rely on informal methods. This polarity has resulted in different styles of writing and reporting, and people entering the field from other disciplines often find themselves hard pressed to keep abreast of current differences in style. This book attempts to strike a balance between these approaches by covering points from both technical and nontechnical perspectives and by doing so in a way that is designed to hold the interest of readers of each persuasion. During recent years, a somewhat overwhelming number of books that present general overviews of AI related subjects have been placed on the market. These books serve an important function by providing researchers and others entering the field with progress reports and new developments.

Australia's First Campaign Robert Stevenson, 2021-02-03 The Australian campaign to seize German New Guinea in 1914 is one of the forgotten episodes of the First World War. Preceding the Gallipoli landings by seven months, this remarkably successful amphibious operation was the very first of its kind undertaken by the Royal Australian Navy and the Australian Army. The campaign was also everything the Gallipoli campaign was not: the New Guinea operations were planned and executed by Australian officers, the fighting was short, sharp and successful, and it was a highly effective use of military force, achieving its operational objectives at a remarkably low cost and serving Australian strategic interests in a direct and tangible way. This volume of the Army History Unit's Campaign Series describes how a novice navy and army planned, mounted and launched a complex joint operation over 3300 kilometres from their mounting base and defeated or forced the withdrawal of German naval and land forces posing a direct threat to Australia and New Zealand. Australia's First Campaign presents a fresh examination of the evidence from a range of participants, providing a thoroughly researched and readable account of the Australian military's first joint operation. The volume is supported by more than 100 illustrations and includes a useful guide for those wishing to visit the battlefield today.
