Empire of the Sum: The Rise and Reign of the Pocket Calculator Keith Houston,2023-08-22 The hidden history of the pocket calculator—a device that ushered in modern mathematics, helped build the atomic bomb, and went with us to the moon—and the mathematicians, designers, and inventors who brought it to life. Starting with hands, abacus, and slide rule, humans have always reached for tools to simplify math. Pocket-sized calculators ushered in modern mathematics, helped build the atomic bomb, took us to the bottom of the ocean, and accompanied us to the moon. The pocket calculator changed our world, until it was supplanted by more modern devices that, in a cruel twist of irony, it helped to create. The calculator is dead; long live the calculator. In this witty mathematic and social history, Keith Houston transports readers from the nascent economies of the ancient world to World War II, where a Jewish engineer calculated for his life at Buchenwald, and into the technological arms race that led to the first affordable electronic pocket calculators. At every turn, Houston is a scholarly, affable guide to this global history of invention. Empire of the Sum will appeal to math lovers, history buffs, and anyone seeking to understand our trajectory to the computer age.

Formulas for the E6-B Air Navigation Computer Frank Hitchens,2013-06-11 Formulas for the Air Navigation Computer is written for pilots and air navigators at all levels of experience from the novice to the professional. The book is self-help on how to use the E6-B Air Navigation Computer. An E6-B Air Navigation Computer is a circular slide rule with a wind slide on the reverse side. It is dedicated to performing all calculations related to pre-flight planning and in-flight air navigation. Every pilot has an E6-B Air Navigation Computer, which is supplied with a very brief instructional booklet when the E6-B is purchased. However, the booklet only covers a few basic formulas, and many more formulas are required for passing the pilot navigation exams at various levels and, of course, for all operational flying. Obtaining all these different formulas from various sources is time consuming, as this author has discovered over the years. They are not readily available in one book. This is the reason for writing Formulas for the Air Navigation Computer; it is a unique collection of air navigation computer formulas. The formulas are written as they appear when set up on the E6-B Air Navigation Computer. A full description on how to solve each formula is included, along with a worked example and also the methods for using the wind slide to calculate wind triangle and other navigational problems associated with the wind slide. The book is easy to follow by the novice pilot and a convenient reference source for the more experienced pilot. The book is complete with all the formulas a pilot of any level should need to know. It is laid out in a simple way with over 122 formulas and methods, covering Time, Speed & Distance, Air Speed, Altitude Navigation, VNAV, One-in-Sixty Rule, Wind triangle Calculations, Wind Finding methods, Fuel Calculations, Pressure Pattern Navigation and more.

An Eagle Tells Flying Stories with Associated Drivel John Murphy,2012-10-15 This book is about a shy boy, who learned discipline from strict parents and seven years of Parochial School. My ten years in a band taught marching. A graduate mechanical engineer, who loved to fly control line model airplanes, was commissioned a 2nd Lieutenant, and found the Air Force a piece of cake. The Air Force taught me to fly, although I had little desire to do so, and pushed me to be an extremely aggressive pilot. Skill, knowledge, and

training allowed me to advance through the highest performance jet aircraft during the time period of 1955 through 1984. Jet aircraft flown were the T-33A, F86F (Sabre), F100 (Series A, D & F Super-Sabre), F105 (B & D Thunderchief), and the F110 (F4D Phantom). My stories progress from Primary Flight School, through all training and missions in the above aircraft as Pilot, Test Pilot, Instructor, and Air to Air Fighter Pilot. Few understand the training and life of an Air Force Pilot, so the Drivel shows a portion of life with these interesting, actual flying stories. A most enjoyable read!
