Another chapter discusses aspects of court management, corrections, and crime prevention. The court- management discussion focuses on delay reduction in case processing. Two aspects of corrections addressed are the use of programmed instruction as a rehabilitation aid, and the use of statistical techniques to aid in correctional decisionmaking. Auto ignition redesign and street lighting are discussed as technological means to reduce crime opportunities. A chapter examines the uses of systems analysis for the study of the entire criminal justice system as an integrated whole. One chapter considers the potential role of modern information technology in the development of an integrated criminal justice information system.
