Contemporary Identity and Memory in the Borderlands of Poland and Germany Aleksandra Binicewicz,2018-09-30 The book analyses issues associated with the contemporary and memory in the Polish-German borderlands – a complex, multidimensional cultural and geographic area. The first section of the book, which focuses on contemporary issues, is divided into three parts: namely, a theoretical body, records of conversations with the inhabitants of the borderlands who are engaged in social activities, and records of workshops and conversations that brought together teenage inhabitants of the borderlands. Close cooperation with the inhabitants of two borderland towns resulted in several interesting perspectives on the borderlands, which are seen as a physical space, as well as a mental, intimate, close, and sometimes frustrating space subject to micro- and macro-scale transformations. In this book, the borderlands are viewed from these two perspectives. The micro-scale, is marked out by the individual experience of the inhabitants of the borderlands, and the macro-scale by the institutional framework established for the purpose of constructing an integrated community on the border.

Designing and Implementing Public Policy in Contemporary Society Dorota Szaban,Magdalena Zapotoczna,Piotr Pochyły,2022-12-12 Public policies are an arena of collective actions that respond to the main problems of society. They are understood as a cycle of decisions and actions of public administration aimed at achieving the desired benefits in the future. They are mostly used when market mechanisms fail and are not able to deal with the problem on their own, or when they do not work effectively enough. The multiplicity of problems and the inadequacies in their solutions create opportunities for the emergence of new sectoral policies and interventions that address both entirely new and traditional phenomena of social life, but require a new approach that recognizes the special importance of political factors. The main objective of sectoral policies is to support the development of the identified key areas of development. This anthology presents the ways of creating and implementing public policies related to educational, demographic and social problems.
