A Guide to Teaching in the Active Learning Classroom Paul Baepler, J. D. Walker, D. Christopher Brooks, Kem Saichaie, Christina I. Petersen, 2023-07-03 While Active Learning Classrooms, or ALCs, offer rich new environments for learning, they present many new challenges to faculty because, among other things, they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different

from traditional classrooms and lecture halls. This book provides an introduction to ALCs, briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based, practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are: • How can instructors mitigate the apparent lack of a central focal point in the space? • What types of learning activities work well in the ALCs and take advantage of the affordances of the room? • How can teachers address familiar classroom-management challenges in these unfamiliar spaces? • If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central focus point? • How do instructors balance group learning with the needs of the larger class? • How can students be held accountable when many will necessarily have their backs facing the instructor? • How can instructors evaluate the effectiveness of their teaching in these spaces? This book is intended for faculty preparing to teach in or already working in this new classroom environment; for administrators planning to create ALCs or experimenting with provisionally designed rooms; and for faculty developers helping teachers transition to using these new spaces.

Organisation Studies and Human Resource Management Kate Black,Russell Warhurst,2021-11-10 This book advances educational understanding and practice in Organisation Studies and Human Resource Management (OSHRM). It develops new theoretical perspectives on learning in OSHRM and introduces and evaluates a range of educational approaches, methods and techniques to advance teaching and assessment and student learning in the field. Chapters are evidence-based and provide practical advice for enhancing the effectiveness of OSHRM programmes and courses in universities, colleges and human resource development settings globally. With contributions from leading educators in OSHRM, the book both advances understanding and provides practical guidance for the design of programmes, courses and classes. Importantly, it illustrates innovative classroom and virtual learning experiences that will secure student engagement; cultivate critical and creative thinking; and enhance students' employability, leadership and enterprise capabilities. A distinctive contribution of the book lies in the inclusion of student viewpoints on the understandings and educational advances proposed by the authors. Significantly, the book demonstrates how recent changes affecting higher education, such as globalisation, mass participation and marketisation, and, most recently, the pandemic crisis, can be embraced as opportunities to advance both educational understanding and educational policy and practice in OSHRM. This book will be invaluable for university educators internationally in the fields of OSHRM and for HR developers working in management and leadership development, and the book has relevance to both groups whatever their career stage, from absolute beginners through to advanced practitioners.
