Digital Snaps Jonas Larsen,Mette Sandbye,2020-08-12 Photography as an everyday practice is once again changing dramatically. At this moment of transition from analogue to digital, Digital Snaps aims to develop a new media ecology that can accommodate these changes to photography 'as we know it'. Expert contributors representing varied disciplines demonstrate how and to what extent the traditional social practices, technologies and images of analogue photography are being transformed with the movement to digital photography. They zoom in on typical, vernacular, everyday practices: the development of the family photo album from a physical object in the living room to a digital practice on the Internet; the use of mobile phones in everyday life; photo communities on the Internet; photo booth photography;

studio photography; and fine arts' appropriation of amateur photography. They explore how this media convergence transforms the media ecology - the networks, objects, performances, meanings and circulations - of vernacular photography, as we research it through ordinary people's use of such new cameras and interactive Internet spaces as part of their everyday lives.

Google+ for Photographers Colby Brown, 2012-03-21 Prior to Google+, Photographers relied on a mix of Twitter, Facebook, Flickr, and other services to display their work and interact with others. No single service provided photographers with a complete set of tools that allowed them to connect with others in a rich, meaningful way--until now. Unlike other social networks, Google+ allows photographers to upload, personalize, and update images easily. The Google+ interface is intuitive and attractive--images appear large and uncropped in the stream, preserving their original integrity; and the infinite scrolling feature creates a fluid, enjoyable photo browsing experience. In addition, the Google+ interface is built to encourage social interaction, not in miniature sound bites, but in full-length discussions with diverse groups of people. Users can build circles to connect with just those they want to include in different conversations, and they can use the Hangouts feature to talk with other users in real time from anywhere in the world. With this book, you'll see why Google+ has quickly become the most inspiring and interactive social network for photographers, and you'll learn how to leverage Google+ to build a following and connect with other photographers--and potential customers. Explains how to effectively showcase your work for the vibrant and growing Google+ photography community Shows how to upload, organize, and share your images; and hone your skills through photo-critique circles Features interviews with leading photographers who share their own photos and tips on how to make the most of Google+ to build an online presence

Negotiating the Religious in Contemporary Everyday Life in the “Islamic World” Roman Loimeier,2021 The contributions to the present volume show that the countries that are often presented in the literature as forming part of a stereotypical and seemingly monolithic “Islamic world” in fact represent

considerable diversity. From Iran to Senegal, we encounter a vast array of social and religious structures, historical trajectories, political regimes and relative positions of societies and individuals. We encounter also, in many different and often unexpected ways, the individual in multiple contexts. The present volume presents perspectives on everyday life in Muslim societies beyond the spectacular. From a broad academic background in Islamic and Iranian studies, social anthropology, sociology, philosophy and history, its contributors show that everyday life as well as religious practice in countries as diverse as Senegal, Niger, Egypt, Tunisia and Iran is not informed by one single "Islamic" tradition, but rather by multiple and often surprisingly different modes of religiosity and non-religiosity.

One Example Bee Smith, 2019-07-03 Bee, who has a tendency of theorizing a bit too much on the hidden social experiment she is a part of, wrote this particular second book, *One Example*, in 2017. She developed quite an obsession with the group monitoring her and discovered more about what the experiment entails. She discovered that it's a full-on social study, which is more than what she thought it was in her first book. Enjoy! The series of books written so far by Bee Smith are as follows: Book 1—Experimenting with Basic Tasks Book 2—One Example Book 3—The Crow Report Book 4—Queen Bee's Party Book 5—The Diary's in a Good Place But there's more that might be on the horizon for which you should be on the lookout: Book 6—Picnic Blanket for One

Streaming Music Sofia Johansson, Ann Werner, Patrik Åker, Greg Goldenzwaig, 2017-08-24 Streaming Music examines how the Internet has become integrated in contemporary music use, by focusing on streaming as a practice and a technology for music consumption. The backdrop to this enquiry is the digitization of society and culture, where the music industry has undergone profound disruptions, and where music streaming has altered listening modes and meanings of music in everyday life. The objective of Streaming Music is to shed light on what these transformations mean for listeners, by looking at their adaptation in specific cultural contexts, but also by considering how online music platforms and streaming services guide music listeners in specific ways. Drawing on case studies from Moscow and Stockholm, and providing analysis of Spotify, VK and YouTube as popular but distinct sites for music, Streaming Music discusses, through a qualitative, cross-cultural, study, questions around music and value, music sharing, modes of engaging with music, and the way that contemporary music listening is increasingly

part of mobile, automated and computational processes. Offering a nuanced perspective on these issues, it adds to research about music and digital media, shedding new light on music cultures as they appear today. As such, this volume will appeal to scholars of media, sociology and music with interests in digital technologies.
