**Net, Blogs and Rock 'n' Roll** David Jennings,2007-09-13 Today's consumers are turning the tables on traditional media. They cannot be herded towards some Next Big Thing but switch their attention in a heartbeat if they catch the buzz of something new and exciting. Fans forage for new discoveries, pursuing personal interests while leaving trails and clues for others to follow. Savants, Enthusiasts and Originators play influential roles in the fan economy recording their finds, expressing their opinions and leading communities of fellow fans. As a result, discovery is the big challenge in a wiki, Web 2.0 world where blog culture, social networks like MySpace and personalized recommender systems have changed the way we perceive, create and consume media. Net, Blogs and Rock 'n' Roll is the first book to dissect a new generation of discovery-oriented services such as Last.fm the social music revolution and is for anyone who spreads the word about entertainment and is interested in expanding audiences through the new channels of our always-connected culture. By explaining how discovery works in this groundbreaking book, David Jennings shows how creators can support discoveries by maximizing the ways buzz can develop. He introduces the three strands of digital discovery - Trying Out, Links, Community - explaining how the history, culture and technology of media are interwoven with the rise of personalization and mobile players. He profiles groups of consumers and their different approaches to discovery, and examines how media intermediaries filter cultural content and connect it to audiences. Anything goes in this new world of discovery which embodies a rock 'n' roll ethos that resists neat and clean orderliness. Consumers make discoveries from any and every source, all media can co-exist, but no one retains 'gatekeeper' status. Professionals are adjusting to a new role complementing bloggers and facilitating audience discoveries rather than controlling them. Net Blogs and Rock 'n' Roll reveals the role of consumers in the fan economy, the latest technologies and techniques at their disposal and shows intermediaries how to connect creators with communities of fans and consumers.

**Mastering One Voice** Toby Murdock,Zoë Randolph,2020-02-10 A practical field guide for your journey to impactful content operations. Capitalize on the biggest opportunity facing modern marketing teams: To unite revenue teams to speak in one voice across every customer journey and accelerate revenue through content.

**Tomorrow's Cthulhu** Scott Gable,C. Dombrowski,2016-01-21 Super science. Madness. Transhumanism. This is the dawn of posthumanity. Some things can't be unlearned. Gleaming labs whirl with the hum of servers as scientists unravel the secrets of the universe. But as we peel away mysteries, the universe glances back at us. Even now, terrors rise from the Mariana Trench and drift down from the stars. Scientists are disappearing or worse. Experiments take on minds of their own. Some fight back against the unknown, some give in, some are destroyed, and still others are becoming more. The human and inhuman are harder and harder to distinguish. Mankind is changing, whether it wants to or not, with brand new ways of thinking. What havoc is wreaked by those humans trying to harness and control their discoveries? As big science progresses and the very fundamentals of this universe are understood, what stories are being hushed up? Of course, the Old Ones laugh at our laws, scientific and otherwise. These are transhumanist near-future science fiction tales of the Cthulhu Mythos. These are tales of more than merely cosmic dread. They exist in our world of the next couple years. This is the era of big science and what is that? We'll be right back... **If You Like the Beatles...** Bruce Pollock,2011-10-01 (Book). The Beatles came up in the rock and-roll era, when Chuck Berry, Little Richard, and Elvis Presley defined cool. Their early shows were big beat bacchanals, the Brit interpretation of that crazy American sound. But it wasn't long before they were absorbing and creating more and more music from folk to experimental, to psychedelia and hard rock, quite literally changing music forever and influencing hundreds of great bands in the process. This is the first book for music lovers that begins with the simple premise, If you like the Beatles..., and takes off from there, digging into their influences and everything that came after them, opening up new doors for listeners looking for no-risk discs to expand their collection. Beginning with the Beatles' lesser-known roots in rockabilly and Tin Pan Alley, and working through American R&B, the British Invasion, California folk, and the Summer of Love, and to the great pop and rock bands of the '80s, '90s, and the 21st century, this is a must-have for anyone who likes the Beatles, which is...everyone.

**Data Management, Analytics and Innovation** Neha Sharma,Amlan Chakrabarti,Valentina Emilia Balas,Jan Martinovic,2020-09-18 This book presents the latest findings in the areas of data management and smart computing, big data management, artificial intelligence and data analytics, along with advances in network technologies. Gathering peer-reviewed research papers presented at the Fourth International Conference on Data Management, Analytics and Innovation (ICDMAI 2020), held on 17-19 January 2020 at the United Services Institute (USI), New Delhi, India, it addresses cutting-edge topics and discusses challenges and solutions for future development. Featuring original, unpublished contributions by respected experts from around the globe, the book is mainly intended for a professional audience of researchers and practitioners in academia and industry.

**Investigating Explanation-Based Learning** Gerald DeJong,2012-12-06 Explanation-Based Learning (EBL) can generally be viewed as substituting background knowledge for the large training set of exemplars needed by conventional or empirical machine learning systems. The background knowledge is used automatically to construct an explanation of a few training exemplars. The learned concept is generalized directly from this explanation. The first EBL systems of the modern era were Mitchell's LEX2, Silver's LP, and De Jong's KIDNAP natural language system. Two of these systems, Mitchell's and De Jong's, have led to extensive follow-up research in EBL. This book outlines the significant steps in EBL research of the Illinois group under De Jong. This volume describes theoretical research and computer systems that use a broad range of formalisms: schemas, production systems, qualitative reasoning models, non-monotonic logic, situation calculus, and some home-grown ad hoc representations. This has been done consciously to avoid sacrificing the ultimate research significance in favor of the expediency of any particular formalism. The ultimate goal, of course, is to adopt (or devise) the right formalism.
