Rad American Women A-Z Kate Schatz, 2015-08-31 The New York Times Bestseller! This is The Most Inspiring Children's Book We've Ever Seen.--Refinery29.com The very first kids' book released by the iconic publishing house City Lights, Rad American Women A-Z navigates the alphabet from Angela Davis to Zora Neale Hurston with colorful illustrations and short, powerful narratives. The perfect gift for the junior riot grrl in your life.--Bust Magazine The History of Feminism--in an Awesome Picture Book. The ABCs just got a major girl-power upgrade.--Chantal Strasburger, Teen Vogue Like all A-Z books, this one illustrates the alphabet—but instead of A is for Apple, A is for Angela—as in Angela Davis, the iconic political activist. B is for Billie Jean King, who shattered the glass ceiling of sports; C is for Carol Burnett, who defied assumptions about women in comedy; D is for Dolores Huerta, who organized farmworkers; and E is for Ella Baker, who mentored Dr. Martin Luther King and helped shape the Civil Rights Movement. And the list of great women continues, spanning several centuries, multiple professions, and 26 diverse individuals. There are artists and abolitionists, scientists and suffragettes, rock stars and rabble-rousers, and agents of change of all kinds. The

book includes an introduction that discusses what it means to be rad and radical, an afterword with 26 suggestions for how you can be rad, and a Resource Guide with ideas for further learning and reading. American history was made by countless rad—and often radical—women. By offering a fresh and diverse array of female role models, we can remind readers that there are many places to find inspiration, and that being smart and strong and brave is rad. Rad American Women will be appreciated by various age groups. It is Common Core aligned for students grades 3 - 8. Pre-school and young children will be captured by the bright visuals and easily modified texts, while the subject matter will stimulate and inspire high-schoolers and beyond. This is not a book. This is a guest list for a party of my heroes. Thank you for inviting us. —Lemony Snicket, author of A Series of Unfortunate Events books I feel honored to be included in this book. Women need to take radical steps to become feminists, and to be strong to fight for their rights and those of others facing oppression and discrimination. The world needs rad women to create a just society. —Dolores Huerta, Labor Leader, Civil Rights Activist It's almost always with a chuckle that I view a cartoon image of myself. But to see cartoon-me positioned (alphabetically) amongst so many of my women heroes

and role models . . . well, I just broke down and cried. Happy tears. I surely hope that this one-of-a-kind collection of radical American women reaches the hands of all children who want to grow up and become amazing women. —Kate Bornstein, author of *My New Gender Workbook* I was totally in rapture reading this book. Bold women, bold colors, and fierce black paper cutouts. I cheer these histories of women who fight not for war or country or corporation, but for EVERYONE! I can't wait for my son to read this. —Nikki McClure, Illustrator of *All in a Day*

Empire State Adam Christopher, 2011-12-27 THE EMPIRE STATE IS THE OTHER NEW YORK. A parallel-universe, Prohibition-era world of mooks and shamuses that is the twisted

magic mirror to our bustling Big Apple, a place where sinister characters lurk around every corner while the great superheroes that once kept the streets safe have fallen into dysfunctional rivalries and feuds. Not that its colourful residents know anything about the real New York... until detective Rad Bradley makes a discovery that will change the lives of all its inhabitants. Playing on the classic Gotham conventions of the Batman comics and HBO's Boardwalk Empire, debut author Adam Christopher has spun this smart and fast-paced superhero-noir adventure, the sort of souped-up thrill ride that will excite genre fans and general readers alike.

Sixty Meters to Anywhere Brendan Leonard,2016-03-22 • The author is a popular journalist and blogger and the creator of Semi-rad.com • A full journey—from confusion to clarity, remorse to redemption • Will appeal to those searching for adventure and purpose When Brendan Leonard finished substance abuse treatment at age 23, he was lost. He knew what not to do—not

drink alcohol and not get arrested again. But no one had told him what it was that he could do. He quickly realized that he had to reinvent himself, to find something other than alcohol and its social constructions to build his life around. A few years later, Brendan was sober and had completed a graduate degree in journalism, but he still felt he was treading water, searching for direction. Then his brother gave him a climbing rope. And along that sixty-meter lifeline, Brendan gradually found redemption in the crags of the American West. He became a climber, someone who learned to push past fear, to tough it out during long, grueling days in the mountains; someone who supported his partners, keeping them safe in dangerous situations and volatile environments; someone with confidence, purpose, and space to breathe. *Sixty Meters to Anywhere* is the painfully honest story of a life changed by climbing, and the sometimes nervous, sometimes nerve-wracking, and often awkward first years of recovery. In the mountains, Leonard ultimately finds a second chance.

Technology of the Guitar Richard Mark French,2012-05-16

Featuring chapters on physics, structure, sound and design specifics, Technology of the Guitar also includes coverage of historical content, composition of strings and their effects on sound quality, and important designs. Additionally, author Mark French discusses case studies of historically significant and technologically innovative instruments. This is a complete reference useful for a broad range of readers including guitar manufacturer employees, working luthiers, and interested guitar enthusiasts who do not have a science or engineering background.

Mechanical Engineering Principles John Bird, Carl

Ross, 2019-09-03 A student-friendly introduction to core mechanical engineering topics. This book introduces mechanical principles and technology through examples and applications, enabling students to develop a sound understanding of both engineering principles and their use in practice. These theoretical concepts are supported by 400 fully worked problems, 700 further problems with answers, and 300 multiple-choice questions, all of which add up to give the reader a firm grounding on each topic. Two new chapters are included, covering the basic principles of matrix algebra and the matrix displacement method. The latter will also include guidance on software that can be used via SmartPhones, tablets or laptops.

The new edition is up to date with the latest BTEC National specifications and can also be used on undergraduate courses in mechanical, civil, structural, aeronautical and marine engineering, and naval architecture. A companion website contains the fully worked solutions to the problems and revision tests, practical demonstration videos, as well as a glossary and information on the famous engineers mentioned in the text.

Rad! Anne Bustard, Daniel Wiseman, 2020-05-05 In this family-oriented picture book, one brave cat discovers how rad trying new things can be! Esther, Chester, Hester, and Sylvester are stoked to shred at the skate park! But unlike his daring brothers and sisters, Lester is a total fraidy-cat. Skateboarding doesn't come easily to him—and with only nine lives to spare, why should he risk one on the half-pipe? When Lester sees how much fun his family is

having, he decides to give it a shot anyway . . . only to wipe out!
With the encouragement of his supportive siblings, Lester gets
back up and tries again.
