Adrenalin Rocket: Run for Your Life, a Love Story (Yanapop Dark Urban Fantasy) Y. B. Suttle,2018-07-02 You've never read a book quite like ADRENALIN ROCKET, a dark fantasy thriller. It's both a wild adventure on steroids across the landscape of Southern California as you never imagined it, and a youthful love story between Martin and Chloë, both 21 years old and ready for orbit. When the speedometer is stuck on blur, you won't be able to sleep or eat because you'll be so anxious to learn what happens next. When you recover from the amazing rush in one sitting (can't stop reading!), you'll love it and tell everyone that you can't wait for the movie to be made. It's like reading a summer movie in a novel. Even if it's snowing rail cars outside, you'll enjoy a beach read and sizzling rocket ride in your bedroom (maybe at moments under the bed even). Author assurance: a sequel is already in work. ADRENALIN ROCKET is a dark fantasy ride in to orbit. A guy meets girl romance all the way, it starts out with deceptive calm. You won't see the hammer coming when it slams down (for your own safety, try to be lying down as you read). The story instantly turns into a suspenseful, hair raising adventure of fantastic and enjoyably Psycho proportions designed to see how far our imagination can stretch before our brain melts like cheese on a pizza. It's like Homer's Odyssey on steroids, filmed by Alfred Hitchcock after three pots of morning coffee. Running nonstop for your life with Martin Brown, you'll meet alien taxi drivers in Noir L.A. and other unusual characters as fascinating as they may be terrifying. Martin Brown, 21, is a U.C. Berkeley Literature student, is home in San Diego as the novel starts. He's finished another year of college and is alone in life because he just broke up with his girlfriend. He's spending the summer with his parents and sister in laid-back San Diego. He's searching for a new summer gig after his job shoveling krappe at a tree farm fell through. He has his old surfer and surferette friends to cheer him on. Acting on a strong lead from a female friend, he drives two hours to Los Angeles to interview for a writing position with global media giant corporation YANAPOP (a marketing concept meaning Young Adult + New Adult + Participating Older Persons). YANAPOP, Inc. creates games, films, books, and other entertainment for young adults, new adults, and participating older persons around the world. In Los Angeles for his interview, Martin meets a gorgeous young production assistant named Chloë Setreal (also 21). Chloë guides him through his interviews and takes a special interest in the handsome young applicant. Martin and Chloë fall madly and instantly in love that same day. Martin returns to San Diego, two hours south, to await results. All he can think of is Chloë, yearning for any excuse to go back and see her as soon as possible. Chloë is thinking the same up in L.A. With some dark karma, their wish comes true. No sooner has Martin arrived back home, than he receives a call from Chloë in LA. She's been in a car accident, is stuck in her apartment with one leg up in a cast, and desperately longs for her dashing hero Martin to come hold her hand. Martin gallantly hops in his car and heads north, just as a tremendous Pacific Ocean storm begins to pelt San Diego. That's just the beginning of a hair-raising adventure, a nightmare of epic proportions. Courageous and undaunted Martin Brown strives to reach Los Angeles (Lost Alienopolis) at any cost. What should be a two-hour drive turns into a Homeric Odyssey lasting a seeming eternity... ADRENALIN ROCKET is a yarn for lovers of wild stories on a spectrum from Groundhog Day to National Lampoon's Vacation, from The Crying of Lot 49 by Thomas Pynchon to Martin Scorsese's dark comedy masterpiece After Hours with its all-star cast. Think of The Last Seduction (with Linda Fiorentino) or even way back when, Jack Lemmon and Sandy Dennis in The Out-Of-Towners film. ADRENALIN ROCKET is the next great thing.

Rocket's Run Sally Sandler,2018-04-27 Rocket's Run is a true tale of a little dog who is inspired each day to match his speed running on the beach to the train on the cliff above. His story reminds us that it isn't necessary to win a race--the joy of running full throttle is its own reward. Children will delight in this spirited and determined little Jack Russell terrier whose adventure is illustrated with love and humor through brilliant photographs taken by his owner. The rugged, sun-washed beauty of the beaches of North San Diego County, California, elegantly captured in John Cunningham's photos, will appeal to adults as well as children.This is the first in a series of books about this spirited little dog entitled, Rocket's Seaside Adventures.

Saturn Run John Sandford,Ctein,2015-10-06 “Fans of Lucas Davenport and Virgil Flowers will eat this up.” --Stephen King For fans of THE MARTIAN, an extraordinary new thriller of the future from #1 New York Times–bestselling and Pulitzer Prize–winning author John Sandford and internationally known photo-artist and science fiction aficionado Ctein. Over the course of thirty-seven books, John Sandford has proven time and again his unmatched talents for electrifying plots, rich characters, sly wit, and razor-sharp dialogue. Now, in collaboration with Ctein, he proves it all once more, in a stunning new thriller, a story as audacious as it is deeply satisfying. The year is 2066. A Caltech intern inadvertently notices an anomaly from a space telescope—something is approaching Saturn, and decelerating. Space objects don’t decelerate. Spaceships do. A flurry of top-level government meetings produces the inescapable conclusion: Whatever built that ship is at least one hundred years ahead in hard and soft technology, and whoever can get their hands on it exclusively and bring it back will have an advantage so large, no other nation can compete. A conclusion the Chinese definitely agree with when they find out. The race is on, and an remarkable adventure begins—an epic tale of courage, treachery, resourcefulness, secrets, surprises, and astonishing human and technological discovery, as the members of a hastily thrown-together crew find their strength and wits tested against adversaries both of this earth and beyond. What happens is nothing like you expect—and everything you could want from one of the world’s greatest masters of suspense.

Space Race Rebecca Stefoff,2016-08-01 This book explores various perspectives surrounding the Space Race between the United States and the Soviet Union. Readers are immersed in the action as their choices guide the narrative.

Four Flags, The Odyssey of a Professional Soldier Dave Barr,2015-12-19 Dave Barr had had a penchant for trouble since day one, born in the back of a car, shooting by the time he was five, riding a motorbike at seven, Dave regularly got into fights at school. The only reading Dave would do growing up involved motorbikes, shooting, westerns and the military. After reading Battle Cry by Leon Uris aged 12 he knew he wanted to be a Marine. Following a series of menial jobs, working at a barbers and in service stations, at 17 he joined the Marines before shipping out to Vietnam. This was his dream come true, flying as a helicopter gunner, he ended the war with an impressive 57 Air Medals. After leaving the Marines, like many veterans Dave found it hard to hold down a good job and stay out of trouble. It was then that he read about Israel. Always looking for a rush Dave learnt to skydive before he deciding to take his chances, emigrating illegally to Israel. He was inducted into the Israeli Army and then the Paratroops, where the training was difficult, involving long tough marches, and learning Hebrew. After serving his time he left Israel - back in the USA Dave was stuck in a rut and ready for his next adventure....This is the first volume in the gripping and action-packed memoirs of Dave Barr, providing a rich and colorful account of one man's odyssey as a professional soldier, seeing war at the 'sharp end'.

The U.S. Navy's "Interim" LSM(R)s in World War II Ron MacKay, Jr.,2016-05-03 The Interim LSM(R) or Landing Ship, Medium (Rocket) was a revolutionary development in rocket warfare in World War II and the U.S. Navy's first true rocket ship. An entirely new class of commissioned warship and the forerunners of today's missile-firing naval combatants, these ships began as improvised conversions of conventional amphibious landing craft in South Carolina's Charleston Navy Yard during late 1944. They were rushed to the Pacific Theatre to support the U.S. Army and Marines with heavy rocket bombardments that devastated Japanese forces on Okinawa in 1945. Their primary mission was to deliver maximum firepower to enemy targets ashore. Yet LSM(R)s also repulsed explosive Japanese speed boats, rescued crippled warships, recovered hundreds of survivors at sea and were deployed as antisubmarine hunter-killers. Casualties were staggering: enemy gunfire blasted one, while kamikaze attacks sank three, crippled a fourth and grazed two more. This book provides a comprehensive operational history of the Navy's 12 original Interim LSM(R)s.

Rocket Surgery Made Easy Steve Krug,2009-12-08 It's been known for years that usability testing can dramatically improve products. But with a typical price tag of \$5,000 to \$10,000 for a usability consultant to conduct each round of tests, it rarely happens. In this how-to companion to Don't Make Me Think: A Common Sense Approach to Web Usability, Steve Krug spells out a streamlined approach to usability testing that anyone can easily apply to their own Web site, application, or other product. (As he said in Don't Make Me Think, It's not rocket surgery.) Using practical advice, plenty of illustrations, and his trademark humor, Steve explains how to: Test any design, from a sketch on a napkin to a fully-functioning Web site or application Keep your focus on finding the most important problems (because no one has the time or resources to fix them all) Fix the problems that you find, using his The least you can do approach By paring the process of testing and fixing products down to its essentials (A morning a month, that's all we ask), Rocket Surgery makes it realistic for teams to test early and often, catching problems while it's still easy to fix them. Rocket Surgery Made Easy adds demonstration videos to the proven mix of clear writing, before-and-after examples, witty illustrations, and practical advice that made Don't Make Me Think so popular.

Wasted Days and Wasted Nights Tammy Lorraine Huerta Fender,2017-08-16 “Just let me sing!” These are the prophetic words of Freddy Fender, who rose from an impoverished background in south Texas to achieve international superstardom as a rock ‘n’ country singer during the 1970s. For the millions of fans worldwide who have loved Freddy, this book offers an in-depth exploration of Freddy’s personal and professional life: from his hardscrabble childhood to his raucous early years, leading to his explosion onto the world stage as a one-of-a-kind performer. The Life Story of Freddy Fender is the first of a two-volume publication which will tell the story of this singular entertainer. Written by Freddy’s daughter, Tammy Lorraine Huerta Fender, the book conveys in rich detail what Freddy went through to succeed. The book also reveals the painful truth behind that success, and how the misery of substance abuse tore both him and his family apart. Freddy’s journey to redemption forms the heart of this biography, as does his faith in a Higher Power. Frank, uncompromising, and bold, this book is the definitive work on the life and legacy of Freddy Fender, told as no other could tell.
