Contract Law in South Africa Louis F. van Huyssteen, Catherine J. Maxwell, 2021-02-22 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in South Africa covers every

aspect of the subject-definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in South Africa will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law.

Airport Competition Regulation in Europe

Stamatis Varsamos, 2016-10-15 Over the past thirty years, airports within the EU - including nearly a hundred newly built or rebuilt during that time - have undergone a major economic transformation. From mere infrastructure providers, airports have become diversified and complex commercial enterprises in competition with each other. This is the first and only book thus far to deal with the legal issues surrounding this important development, focusing on the impact of EU Directive 12/2009 on airport charges. Examining the use of airport infrastructure, the growing competition among airports, and the relations between airlines and airports, the author, a leading aviation law practitioner, covers such issues and topics as the following: - types of charges - landing, passenger, aircraft parking; - pricing factors determining airport charges; - vertical contractual relations between airports and airlines; - airport market power and dominance; - issues of consultation and transparency; - ability of airlines and passengers

to switch to alternative airports; - application of state aid rules; - security charges; - environmental charges and schemes; and - price discrimination and differentiation. The presentation encompasses a critical analysis of the findings of case law, both international and European, on airport charges in the context of the new trend of airports and airlines concluding vertical agreements. As an examination of the economic regulation of EU airports due to the liberalization process, structural changes in the ownership status of many EU airports, and the emergence of new airline business models (such as low-cost carriers), this book, the only one of its kind, will quickly become indispensable to practitioners, policymakers, and academics in aviation law.

South African-American Survey ,1947

The Economics and Political Economy of African Air Transport Kenneth Button, Gianmaria Martini, Davide Scotti, 2017-09-14 Africa is the smallest of the 'regional' aviation markets but one that Boeing and others expect to expand over the medium term. Developments on the continent that require the creation of robust and efficient air transport include growth in tourism, the export of 'exotics', and the emergence of modern manufacturing and high-tech industries. Africa's regional aviation markets generally lack good airports and air traffic control, viable airlines, and adequately skilled labour. Airline safety is also a major concern. Written by a 'Who's Who' of aviation specialists and policy makers, *The Economics and Political Economy of African Air Transport* fills an emerging void in the literature regarding Africa's aviation markets. Its original papers focus explicitly on the economic and political dimensions of the subject, although with relevance to the strategic planning and management of airlines and their associated infrastructure.

Topics discussed include external and internal market efficiencies, air service liberalization, the emergence of new carriers, safety and security, low cost airline and other business models, and airport economics. Focusing on the broader issues surrounding the subject, this book will be of interest to both the aviation community and those with an interest in economic and social development.

KasiNomic Revolution GG Alcock, 2018-10-22 The informal business sector is the next great frontier of Africa and it is undergoing an economic revolution, a new world of small people doing big things, transforming the continent. Prepare for this new generation, prepare for the Afripolitan Generation. A revolution is taking place in the great marketplaces of the informal sector and it contains an unquantified scale and power as an economic engine and a way of life for the majority of our low income populations. The KasiNomic Revolution may still be a murmur in the streets, a grassroots economic groundswell, but it is the future of African economic activity. Kasi is the South African term for the township, a teeming conurbation of homes and businesses, entertainment venues and social meeting places. GG Alcock uses the term KasiNomics to describe the informal sectors of Africa, whether they are in the township, a rural marketplace, at a taxi rank or on a pavement in the shadow of skyscrapers. Brought up in a rural Zulu community, GG has learnt and shares the lessons of African culture, language, stick fighting, lifestyle and tribal politics, along with shared poverty and community, which have prepared him for accessing the great informal marketplaces of Africa. He is uniquely placed to uncover the extraordinary stories of kasi businesses which not only survive but excel, revealing a revolutionary entrepreneurship which is mostly invisible to the formal sector.

KasiNomic Revolution is a story of kasi entrepreneurs on one side and, on the other, of great corporate successes and failures in the informal community. KasiNomic Revolution is at once a business book, and at the same time a deeply human book about the people and lives of rural and urban informal societies. KasiNomic Revolution is about the lessons of marketing, distribution, culture and modernity in an informal African world. Prepare for a KasiNomic Revolution.
