Carbon Management in Tourism Gossling Stefan, 2010-12-06

Climate change is one of the single most important global environmental issues facing the world today and is emerging as a major topic in tourism studies. Tourism is one of the world's largest industries; it both contributes to, and will be notably affected by, climate change. Given the emerging global legal frameworks to reduce emissions of greenhouse gasses, growing costs of carbon and pro-environmentally orientated customers, carbon management in tourism is a necessity. Tourism must take responsive actions to enable travel and tourism to deliver the peak experiences that tourists seek with a lower carbon footprint. *Carbon Management in Tourism* is the first book devoted to carbon emission reductions and to showcase a wide range of practical mitigation measures. This book provides a comprehensive overview by combining theory and practice of climate change mitigation in global tourism, addressing various levels of scale, such as global, national, and regional tourism systems, as well as individual tourism businesses. It integrates a thorough scientific discussion of the causes of emissions growth, along with an analysis of the major options to reduce emissions, and state-of-the-art carbon management

practices. Detailed case studies provide examples of tourism businesses or destinations that have successfully reduced emissions of greenhouse gasses, with consideration of economic and socio-cultural issues integrated throughout. This timely and important volume is essential reading for undergraduate and postgraduate students as well as academic researchers interested in Tourism, Environmental Management, Geography and Carbon Management.

Rick Steves Switzerland Rick Steves, 2023-05-02 Cross the Alps in a cable car, cruise Lake Geneva, and tour a medieval château: with Rick Steves, Switzerland is yours! Inside Rick Steves Switzerland you'll find: Comprehensive coverage for spending a week or more exploring Switzerland Rick's strategic advice on how to get the most out of your time and money, with rankings of his must-see favorites Top sights and hidden gems, from bustling Zürich to the cozy small-town atmosphere of Appenzell How to connect with culture: Chat with friendly Swiss locals at a mountain retreat, swim in the alpine waters of the Aare River, and treat yourself to delicious cheese fondue Beat the crowds, skip the lines, and avoid tourist traps with Rick's candid, humorous insight The best places to eat, sleep, and relax over wine and Swiss chocolate

Self-guided walking tours of lively neighborhoods and mountain towns Detailed maps for exploring on the go Scenic railroad journeys such as the Golden Pass, Gotthard Panorama Express, Bernina Express, Glacier Express, and Chur Useful resources including a packing list, German, French, and Italian phrase guides, a historical overview, and recommended reading, plus tips for visiting Switzerland in the winter Over 400 bible-thin pages include everything worth seeing without weighing you down Complete, up-to-date information on Zürich, Luzern, Central Switzerland, Bern, Murten, Avenches, Gimmelwald and the Berner Oberland, Zermatt and the Matterhorn, Appenzell, Lausanne, Château de Chillon, Montreux, Gruyères, Lugano, Pontresina, Samedan, St. Moritz, and more Make the most of every day and every dollar with Rick Steves Switzerland.

Living in Vaud Valeria C. Harlay, 2017-03-13 This is a helpful guide for individuals and families, expatriates and locals, to get immerse into local culture and lifestyle, settle, find friends, explore Vaud's plentiful delights, integrate, and enjoy living in this beautiful area. Instructions, addresses, resources, daily life tips, Swiss culture insights, and many more useful information collected during years, to make things easier for you when arriving, living, or

leaving the Canton of Vaud.

Implementing Data-Driven Strategies in Smart Cities Didier Grimaldi, Carlos Carrasco-Farré, 2021-09-18 **Implementing Data-Driven Strategies in Smart Cities** is a guidebook and roadmap for practitioners seeking to operationalize data-driven urban interventions. The book opens by exploring the revolution that big data, data science, and the Internet of Things are making feasible for the city. It explores alternate topologies, typologies, and approaches to operationalize data science in cities, drawn from global examples including top-down, bottom-up, greenfield, brownfield, issue-based, and data-driven. It channels and expands on the classic data science model for data-driven urban interventions – data capture, data quality, cleansing and curation, data analysis, visualization and modeling, and data governance, privacy, and confidentiality. Throughout, illustrative case studies demonstrate successes realized in such diverse cities as Barcelona, Cologne, Manila, Miami, New York, Nancy, Nice, São Paulo, Seoul, Singapore, Stockholm, and Zurich. Given the heavy emphasis on global case studies, this work is particularly suitable for any urban manager, policymaker, or practitioner responsible for delivering technological services for the public sector from sectors

as diverse as energy, transportation, pollution, and waste management. Explores numerous specific urban interventions drawn from global case studies, helping readers understand real urban challenges and create data-driven solutions Provides a step-by-step and applied holistic guide and methodology for immediate application in the reader's own business agenda Presents cutting edge technology presentation with coverage of innovations such as the Internet of Things, robotics, 5G, edge/fog computing, blockchain, intelligent transport systems, and connected-automated mobility

Zurich Travel Guide 2024 T Turner, The Zurich Travel Guide is the most up-to-date, reliable and complete guide to this wonderful city. Travelers will find everything they need for an unforgettable visit presented in a convenient and easy-to-use format. Includes quick information on planning a visit, navigating the city, experiencing Swiss culture and exploring the beauty of Zurich. Also includes a German phrasebook to help you communicate with the locals. The city of Zurich, a global center for banking and finance, lies at the north end of Lake Zurich in northern Switzerland. The picturesque lanes of the central Altstadt (Old Town), on either side of the Limmat River, reflect its pre-medieval history. Waterfront

promenades like the Limmatquai follow the river toward the 17th-century Rathaus (town hall).

The Tour of the Bernina Gillian Price, 2015-03-11 This guidebook describes two treks in the Bernina region of the Swiss-Italian Alps. The Tour of the Bernina covers 119km in nine stages circling the Piz Bernina massif. Five days are spent in Switzerland and four in Italy, however a number of inviting extensions and detours are also described which add at least two days to the total. The tour is suitable for trekkers with basic alpine walking experience. While the highest point reached is 3002m, there are no glacier crossings en route. The Alta Via Valmalenco in Italy is a shorter, 8-stage trek over 94km, but is a more challenging route suitable for trekkers with more experience. Almost every stage of both treks can be accessed from a valley floor and public transport, opening the door to multiple variants and shorter treks. Detailed stage by stage route descriptions are given in combination with plenty of background and practical information.

Fodor's Essential Switzerland Fodor's Travel Guides, 2022-06-14 Whether you want to ski in Zermatt, eat fondue in Zürich, hike around Lake Luzern, or buy a luxury watch in Geneva, the local Fodor's travel experts in Switzerland are here to

help! Fodor's Essential Switzerland guidebook is packed with maps, carefully curated recommendations, and everything else you need to simplify your trip-planning process and make the most of your time. This new edition has been fully-redesigned with an easy-to-read layout, fresh information, and beautiful color photos.

Fodor's "Essential" guides have been named by Booklist as the Best Travel Guide Series of 2020! Fodor's Essential Switzerland travel guide includes: AN ILLUSTRATED ULTIMATE EXPERIENCES GUIDE to the top things to see and do MULTIPLE ITINERARIES to effectively organize your days and maximize your time MORE THAN 28 DETAILED MAPS to help you navigate confidently COLOR PHOTOS throughout to spark your wanderlust! HONEST RECOMMENDATIONS FROM LOCALS on the best sights, restaurants, hotels, nightlife, shopping, performing arts, activities, and more PHOTO-FILLED "BEST OF" FEATURES on "What to Eat and Drink in Switzerland," "Best Hikes," "Most Beautiful Villages," "What to Buy," and more TRIP-PLANNING TOOLS AND PRACTICAL TIPS including when to go, getting around, beating the crowds, and saving time and money HISTORICAL AND CULTURAL INSIGHTS providing rich context on the local people, politics, art, architecture, cuisine, music,

geography and more SPECIAL FEATURES on the country's best scenic train rides, the Bernese Alps, the Vineyards of the Lavaux, Christmas markets, and the Best Swiss Luxury Watch Brands LOCAL WRITERS to help you find the under-the-radar gems FRENCH, GERMAN, AND ITALIAN LANGUAGE PRIMERS with useful words and essential phrases UP-TO-DATE COVERAGE ON: Zürich, Zermatt, Lake Luzern, Geneva, Bern, Basel, the Berner Oberland, Lausanne, Fribourg, Gstaad, the Matterhorn, Montreux, Liechtenstein, and more. Planning on visiting other destinations in Europe? Check out Fodor's Essential Italy, Fodor's Essential Germany, and Fodor's Essential France. *Important note for digital editions: The digital edition of this guide does not contain all the images or text included in the physical edition. ABOUT FODOR'S AUTHORS: Each Fodor's Travel Guide is researched and written by local experts. Fodor's has been offering expert advice for all tastes and budgets for over 80 years. For more travel inspiration, you can sign up for our travel newsletter at fodors.com/newsletter/signup, or follow us @FodorsTravel on Facebook, Instagram, and Twitter. We invite you to join our friendly community of travel experts at fodors.com/community to ask any other questions and share your experience with us!

Trekking Chamonix to Zermatt Kev Reynolds, 2024-03-19 A guidebook to the Walker's Haute Route, a classic trek between Chamonix in France and Zermatt in Switzerland. Covering 215km (134 miles), this long-distance trek linking Mont Blanc and the Matterhorn takes around 2 weeks and is suitable for trekkers with Alpine experience. The route is described west to east in 14 stages, each between 9 and 20km (6–12 miles) in length. The route takes in 11 passes and 14,000m of ascent, with several route alternatives included allowing you to select the itinerary that suits you. 1:50,000 mapping included for each stage GPX files available to download Detailed information on mountain huts, facilities and refreshments along the route Advice on planning and preparation

Walking in the European City Timothy Shortell, Evrick Brown, 2016-02-24 Sociologists have long noted that dynamism is an essential part of the urban way of life. However, walking as a significant social activity and crucial research method (in spite of its ubiquity as part of urban life) has often been overlooked. This volume considers walking in the city from a variety of perspectives, in a variety of places and with a variety of methods, to engage with the question of how walking can contribute to the sociological imagination and reveal sociological knowledge. Bringing together

new research on sites across Europe, *Walking in the European City* addresses the nature of everyday mobility in contemporary urban settings, shedding light not only on the ways in which walking relates to other social institutions and practices, but also as a method for studying urban life. With attention to intersections of race and ethnicity, gender and class, as well as the manner in which processes of gentrification transform urban space, this book examines questions of access to public places, exploring the ways in which urban dwellers' use of and relation to neighbourhood spaces are shaped by inequalities of status and power. As such, it will appeal to scholars of sociology, geography and anthropology with interests in urban studies, mobility and research methods.

Walking in the Bernese Oberland - Jungfrau region Lesley Williams, Jonathan Williams, 2023-03-17 A guidebook to 50 day walks in Switzerland's Jungfrau region from the main bases of Grindelwald, Wengen, the Lauterbrunnen valley and Mürren. These graded walks range from grade 1 almost level short walks through to grade 4 challenging Alpine routes, however, most are grades 2 or 3 and are suitable for walkers with some experience. Ranging in length from 5 to 23.5km the routes visit valleys, waterfalls and alpine huts. Many also take advantage of the widespread public

transport and lifts around the Bernese Oberland to provide options for walks at a higher altitude. Along with a detailed route description, each walk has 1:50,000 mapping and information on public transport access to the start and end points. Details of accommodation, alpine huts and facilities are also provided.

Walking in the Bernese Oberland Kev Reynolds, 2015-05-05

Over 100 walking routes in the Bernese Oberland are described in this guidebook, suitable for all abilities from short flat walks to adventurous treks. Routes range from 2 to 24km in a region that boasts famous peaks such as the Eiger, Monch and the Jungfrau. But there are lesser-known mountains, too, that are just as scenically dramatic. Add to that the romantic valleys, lakes, flower-filled meadows and a network of mountain huts and rustic inns and you'll understand why the Bernese Alps seduce the hiker back year after year. The guide is divided into nine chapters: Haslital, Lutschental, Lauterbrunnental, Kiental, Kandertal, Engstligental, Ober Simmental, Lauenental and Saanental, with a regional focus around Grindelwald, Lauterbrunnen, Gsteig and Meiringen, Kandersteg, Griesalp and others. The layout of this guide follows an east-west convention, beginning with the Haslital and working west from valley to valley as far as Col du Pillon below Les

Diablerets. Additionally, the guidebook includes useful practical information on getting to and around the region, where to stay and how to prepare for a trip into the Bernese Alps.

Walking in Zermatt and Saas-Fee Lesley Williams, Jonathan Williams, 2021-04-15 Guidebook describing 50 varied walks in the Valais region in the heart of the Swiss Alps. The graded day walks based around the popular resort towns of Zermatt and Saas-Fee explore the Mattertal and Saastal valleys and the surrounding mountains. Ranging from 4 to 18km, the easily accessible routes make use of the area's extensive network of well-made mountain paths and its lift system. There are walks here to suit all tastes, from low-level lake walks or easy strolls up to mountain restaurants, through to serious mountain outings on steep and rocky trails. Distance, walking time and difficulty are shown for each route, and the detailed route description is accompanied by clear mapping. Dominated by 4000m the giants, the Matterhorn and Monte Rosa, this is a land of contrasts, with snow-capped mountains and glaciers above and meadows and vineyards fringing the valleys below. Good transport infrastructure and plentiful accommodation make it a superb area for a walking holiday.

**AVENUE21. Planning and Policy Considerations for an Age of
Automated Mobility** Mathias Mitteregger, Emilia M. Bruck, Aggelos
Soteropoulos, Andrea Stickler, Martin Berger, Jens S.
Dangschat, Rudolf Scheuven, Ian Banerjee, 2023-03-29 The subject
of this open-access publication is the impact of connected and
automated vehicles on the European city and the conditions under
which this technology can make a positive contribution to urban
development. The authors put forward two theses that have
received little attention in the scientific discourse so far: Connected
and automated vehicles will not become fully established in all sub-
areas of the city for a long time. As a result, previously assumed

effects - from traffic safety to traffic performance as well as spatial effects - will have to be reevaluated. To ensure a positive contribution of this technology to the mobility of the future, transport and settlement policy regulations must be further developed.

Established territorial, institutional and organizational boundaries need to be challenged in a timely manner. Despite or because of the existing great uncertainties, we are at the beginning of a phase of yet shaping the possible future - in technology development, but also in politics, urban planning, administration and civil society.

Description of the chapters: 1. Connected and automated driving:

The long level 4 Mathias Mitteregger reflects on the road ahead for automated driving. What pathways of technological development induce which kind of spatial effects and planning needs? 2.

Connected and automated driving: Consideration of the local, spatial context and spatial differentiation Emilia M. Bruck and Aggelos Soteropoulos reflect on the importance of the local context when classifying and estimating the effects of different forms of automated mobility. 3. Connected and automated driving in the context of a sustainable transport and mobility transformation Andrea Stickler, Jens S. Dangschat and Ian Banerjee integrate possible potentials of automated mobility in the context of a

transformed, sustainable transport system. PART I: Mobility and transport

4. Self-driving turnaround or automotive continuity? Reflections on technology, innovation and social change Katharina Manderscheid reflects on how differing visions of an automated future can be understood with regard to divergent interests in technological development.

5. Automated drivability and streetscape compatibility in the urban-rural continuum using the example of Greater Vienna Aggelos Soteropoulos analyses how different street spaces align with technological requirements of automated mobility, creating a suitability framework for road spaces in the Greater Vienna region.

6. Automation, public transport and Mobility as a Service: Experience from tests with automated shuttle buses The authors show what types of automated public transport might be used in the future and what can be learned from testing automated shuttle buses in the past.

7. Delivery robots as a solution for the last mile in the city? Bert Leerkamp, Aggelos Soteropoulos and Martin Berger describe how automated delivery robots could be contextualized in terms of solving last-mile problems and discuss what implications might lie ahead for urban planning.

PART II: Public space

8. Control and design of spatial mobility interfaces The authors identify the possible implications of

automated mobility for mobility interfaces and explore how public spaces could be transformed. 9. Transformations of European public spaces with AVs Robert Martin, Emilia M. Bruck and Aggelos Soteropoulos use the example of Copenhagen to show how public spaces could be transformed in an age of automated urban mobility and benefit from lower car dependency. 10. At the end of the road: Total safety Mathias Mitteregger discusses how the desire for road safety affects public spaces and how automated mobility influences this discourse. 11. Integration of cycling into future urban transport structures with connected and automated vehicles Looking at the future of mobility, Lutz Eichholz and Detlef Kurth show that the bike actually offers solutions to many of our current problems and that planning should not forget to integrate cycling into future urban transport structures and systems. 12. Against the driverless city Steven Fleming argues for a radical shift in cities towards a highly improved cycling infrastructure eradicating the need for automated mobility. Part III: Spatial development 13. Strategic spatial planning, “smart shrinking” and the deployment of CAVs in rural Japan Ian Banerjee and Tomoyuki Furutani show where automated mobility could help tackle pressing issues in rural Japan. 14. Integrated strategic planning approaches to automated

transport in the context of the mobility transformation The authors show how new forms of automated mobility could be integrated into mobility systems in diverse spatial structures in the city region of Vienna with the overriding goal of the mobility transformation. 15. Opportunities from past mistakes: Land potential en route to an automated mobility system Looking at the mistakes made in building a car-centric environment in the past, Mathias Mitteregger and Aggelos Soteropoulos identify future areas of urban transformation as a result of a lower demand for car-centric infrastructures and businesses. Part IV: Governance 16. New governance concepts for digitalization: Challenges and potentials Alexander Hamedinger contextualizes the manifold paths towards an automated future with regard to governance and describes how governance concepts might need to adapt in the future. 17. How are automated vehicles driving spatial development in Switzerland? Fabienne Perret and Christof Abegg show how automated vehicles are influencing spatial development in Switzerland, focusing on three different scenarios on the road ahead. 18. Lessons from local transport transition projects for connected and automated transport Andrea Stickler looks at local projects aiming at a transformation of mobility practices and reflects on implications for automated

transport. 19. Connected and automated transport in the socio-technical transition Jens S. Dangschat looks at societal transformations in the past and contextualizes automated mobility in terms of a possible socio-technical transition ahead. 20. Data-driven urbanism, digital platforms and the planning of MaaS in times of deep uncertainty: What does it mean for CAVs? Ian Banerjee, Peraphan Jittrapirom and Jens S. Dangschat show how continuous digitalization in cities might affect possible uses and implementations of CAVs and their accompanying systems.
