You'll find ways to: Help families and community leaders design clear pathways to understanding alternatives to obsolescence Thrive in an ever-changing, tech-driven economy that is beginning to leave people of color behind Embrace new strategies that guarantee a place for Black and brown people in the new economy The startling and insightful discussion in *Upper Hand* will earn it a place in the libraries of families, teachers, community advocates, workforce development leaders, professionals of color, as well as anyone interested in learning how to distribute the benefits of the new tech economy to those historically left out.

Flywheels Tom Alberg, 2021-11-02 Once a blue-collar outpost, Seattle, home to Microsoft, Amazon, and hundreds of startups, transformed into one of the world's major innovation hubs in less than twenty years. As other cities try to solve the riddle of creating vibrant economies, many have looked to Seattle as a model for tech-driven urban renaissance. However, that success comes with skyrocketing housing costs, increasing homelessness, public safety concerns, persistent racial inequality, and a widening gap between the haves and have-nots. Against that backdrop, big tech has become a popular target. Tom Alberg, a venture capitalist who was one of the first investors in Amazon, draws on his experience in Seattle's tech boom to offer a vision for how cities and businesses can build a brighter future together. He explores ways that cities can soar to prosperity by creating the conditions that encourage innovation. Like flywheels, livable cities generate momentum by drawing creative citizens who launch businesses. Success attracts more talent, energizing local economies and accelerating further innovation. Alberg emphasizes the importance of city governments and tech companies partnering to address civic challenges. He reflects on why the benefits of the tech boom have not been distributed equally and what business and government leaders must do differently to ensure inclusive growth. The book also examines success stories from smaller cities and their lessons for other up-and-coming tech hubs. Demonstrating the need for innovative thinking that encourages livability alongside economic growth, *Flywheels* is timely reading for everyone from mayors to business leaders to engaged citizens.

Always Day One Alex Kantrowitz, 2020-04-07 This is a terrific book - Kara Swisher An acclaimed tech reporter reveals the inner workings of Amazon, Facebook, Google, Apple, and Microsoft, showing how to compete with the tech titans using their own playbook. At Amazon, Day One is code for inventing

like a startup, with little regard for legacy. Day Two is, in Jeff Bezos's own words, stasis, followed by irrelevance, followed by excruciating, painful decline, followed by death. Most companies today are set up for Day Two. They build advantages and defend them fiercely, rather than invent the future. But Amazon and fellow tech titans Facebook, Google, and Microsoft are operating in Day One: they prioritize reinvention over tradition and collaboration over ownership. Through 130 interviews with insiders, from Mark Zuckerberg to hourly workers, *Always Day One* reveals the tech giants' blueprint for sustainable success in a business world where no advantage is safe. Companies today can spin up new products at record speed -- thanks to artificial intelligence and cloud computing -- and those who stand still will be picked apart. The tech giants remain dominant because they've built cultures that spark continual reinvention. It might sound radical, but those who don't act like it's always day one do so at their own peril. Kantrowitz uncovers the engine propelling the tech giants' continued dominance at a stage when most big companies begin to decline. And he shows the way forward for everyone who wants to compete with--and beat--the titans.

Engaged Journalism Jake Batsell, 2015-02-03 *Engaged Journalism* explores the changing relationship between news producers and audiences and the methods journalists can use to secure the attention of news consumers. Based on Jake Batsell's extensive experience and interaction with more than twenty innovative newsrooms, this book shows that, even as news organizations are losing their agenda-setting power, journalists can still thrive by connecting with audiences through online technology and personal interaction. Batsell conducts interviews with and observes more than two dozen traditional and startup newsrooms across the United States and the United Kingdom. Traveling to Seattle, London, New York City, and Kalamazoo, Michigan, among other locales, he attends newsroom meetings, combs through internal documents, and talks with loyal readers and online users to document the successes and failures of the industry's experiments with paywalls, subscriptions, nonprofit news, live events, and digital tools including social media, data-driven interactives, news games, and comment forums. He ultimately concludes that, for news providers to survive, they must constantly listen to, interact with, and fulfill the specific needs of their audiences, whose attention can no longer be taken for granted. Toward that end, Batsell proposes a set of best practices based on effective, sustainable journalistic engagement.

Women in Tech Tarah Wheeler, 2016-03-29 "Jam packed with insights from women in the field," this is an invaluable career guide for the aspiring or experienced female tech professional (*Forbes*) As the CEO of a startup, Tarah Wheeler is all too familiar with the challenges female tech professionals face on a daily basis. That's why she's teamed up with other high-achieving women within the field—from entrepreneurs and analysts to elite hackers and gamers—to provide a roadmap for women looking to jump-start, or further develop, their tech career. In an effort to dismantle the unconscious social bias against women in the industry, Wheeler interviews professionals like Brianna Wu (founder, Giant Spacekat), Angie Chang (founder, Women 2.0), Keren Elazari (TED speaker and cybersecurity expert), Katie Cunningham (Python educator and developer), and Miah Johnson (senior systems administrator) about the obstacles they have overcome to do what they love. Their inspiring personal stories are interspersed with tech-focused career advice. Readers will learn: · The secrets of salary negotiation · The best format for tech

resumes · How to ace a tech interview · The perks of both contracting (W-9) and salaried full-time work · The secrets of mentorship · How to start your own company · And much more **BONUS CONTENT:** Perfect for its audience of hackers and coders, *Women in Tech* also contains puzzles and codes throughout—created by Mike Selinker (Lone Shark Games), Gabby Weidling (Lone Shark Games), and cryptographer Ryan “LostboY” Clarke—that are love letters to women in the industry. A distinguished anonymous contributor created the Python code for the cover of the book, which references the mother of computer science, Ada Lovelace. Run the code to see what it does!

The Rise of the Rest Steve Case, 2023-09-19 Steve Case, cofounder of America Online and Revolution and New York Times bestselling author of *The Third Wave*, shows how entrepreneurs across the country are building groundbreaking companies, renewing communities, and creating new jobs--in the process reimagining the American landscape and bringing people together around a shared future--Amazon.com.

Innovation in China Richard P. Appelbaum, Cong Cao, Xueying Han, Rachel Parker, Denis Simon, 2018-10-15 China is in the midst of transitioning from a manufacturing-based economy to one driven by innovation and knowledge. This up-to-date analysis evaluates China's state-led approach to science and technology, and its successes and failures. In recent decades, China has seen huge investments in high-tech science parks, a surge in home-grown top-ranked global companies, and a significant increase in scientific publications and patents. Helped by state policies and a flexible business culture, the country has been able to leapfrog its way to a more globally competitive position. However, the authors argue that this approach might not yield the same level of progress going forward if China does not address serious institutional, organizational, and cultural obstacles. While not impossible, this task may well prove to be more difficult for the Chinese Communist Party than the challenges that China has faced in the past.

Mindful Tech David M. Levy, 2016-01-28 From email to smart phones, and from social media to Google searches, digital technologies have transformed the way we learn, entertain ourselves, socialize, and work. Despite their usefulness, these technologies have often led to information overload, stress, and distraction. In recent years many of us have begun to look at the pluses and minuses of our online lives and to ask how we might more skillfully use the tools we've developed. David M. Levy, who has lived his life between the “fast world” of high tech and the “slow world” of contemplation, offers a welcome guide to being more relaxed, attentive, and emotionally balanced, and more effective, while online. In a series of exercises carefully designed to help readers observe and reflect on their own use, Levy has readers watch themselves closely while emailing and while multitasking, and also to experiment with unplugging for a specified period. Never prescriptive, the book opens up new avenues for self-inquiry and will allow readers—in the workplace, in the classroom, and in the privacy of their homes—to make meaningful and powerful changes.

Militainment, Inc. Roger Stahl,2009-12-04 Militainment, Inc. offers provocative, sometimes disturbing insight into the ways that war is presented and viewed as entertainment—or militainment—in contemporary American popular culture. War has been the subject of entertainment for centuries, but Roger Stahl argues that a new interactive mode of militarized entertainment is recruiting its audience as virtual-citizen soldiers. The author examines a wide range of historical and contemporary media examples to demonstrate the ways that war now invites audiences to enter the spectacle as an interactive participant through a variety of channels—from news coverage to online video games to reality television. Simply put, rather than presenting war as something to be watched, the new interactive militainment presents war as something to be played and experienced vicariously. Stahl examines the challenges that this new mode of militarized entertainment poses for democracy, and explores the controversies and resistant practices that it has inspired. This volume is essential reading for anyone interested in the relationship between war and media, and it sheds surprising light on the connections between virtual battlefields and the international conflicts unfolding in Iraq and Afghanistan today.
