Jean Abshire

Singapore Edwin Lee,2008 In 2015, Singapore celebrates its 50th anniversary of independence. This book covers the complex historical forces and circumstances that shaped this nation. It tells of Britain's imperial visions and schemes, and of how their failure cast a shadow on the story of Singapore's incorporation into the Federation of Malaysia and expulsion from it.

The History of Singapore Jean Abshire,2011-03-21 This book overviews Singapore's fascinating history from the precolonial era to the present, examining this wealthy island nation from economic, political, cultural, and social perspectives. Singapore is a dominant player in the global economy, serving both as an essential business hub for international finance and home to some of the world's most important ports. It is also one of the world's smallest and most resource-poor countries. This book offers an engaging examination of Singapore using a theme of globalization to explain how the country's worldwide interactions across centuries have resulted in an ethnically diverse society and allowed it to ascend to a position of being an economic powerhouse. Every significant historic event and era—from its status as a meeting point for traders in the 600s to its colonization by the British in 1819, and from Japanese occupation during World War II to the 2002 arrest of a group of Islamic terrorists—is covered.

One Hundred Years' History Of The Chinese In Singapore: The Annotated Edition Ong Siang Song,2020-03-12 Since its publication in 1923, Sir Song Ong Siang's One Hundred Years' History of the Chinese in Singapore has become the standard biographical reference of prominent Chinese in early Singapore, at least in the English language. This fact would have surprised Song who saw himself primarily as a compiler of historical and biographical snippets. The original was not referenced in academic fashion and contained a number of errors. This annotation by the Singapore Heritage Society takes Song's classic text and updates it with detailed annotations of sources that Song himself might have consulted, and includes more recent scholarship on the lives and times of various personalities who are mentioned in the original book. This annotated edition is commissioned by the National Library Board, Singapore and co-published with World Scientific Publishing.

The Politics of Landscapes in Singapore Lily Kong,Brenda S. A. Yeoh,2003-02-01 This thought-provoking book explores strategies employed by Singapore, a multiracial society, to create a Singapore nation with an emphasis on the role of landscape. As such, the authors cast keen eye on religious buildings, public housing, heritage landscapes, and street name changes as tangible methods of nation-building in a postcolonial society. The authors illustrate how nation and national identity are

concepts that are negotiated and disputed by varied social, economic, and political groups—some of which may actively resist powerful state-centrist attitudes. Throughout this work, the role of the landscape prevails both as a way to naturalize state ideologies and as a means of providing possibilities for reinterpretation in everyday life.

The Future of Singapore Kamaludeen Mohamed Nasir, Bryan S. Turner, 2014-05-09 Singapore, like many other advanced economies, has a relatively low, and declining, birth-rate. One consequence of this, and a consequence also of the successful economy, is that migrants are being drawn in, and are becoming an increasing proportion of the overall population. This book examines this crucial development, and assesses its likely impact on Singapore society, politics and the state. It shows that, although Singapore is a multi-ethnic society, migration and the changing ethnic mix are causing increasing strains, putting new demands on housing, education and social welfare, and changing the make-up of the workforce, where the government is responding with policies designed to attract the right sort of talent. The book discusses the growing opposition to migration, and explores how the factors which have underpinned Singapore's success over recent decades, including a cohesive elite, with a clearly focused ideology, a tightly controlled political system and strong continuity of government, are at risk of being undermined by the population changes and their effects. The book also compares the position in Singapore with other East Asian countries, including Japan, South Korea and the Philippines, which are also experiencing population changes with potentially far-reaching consequences.

Technology and Entrepôt Colonialism in Singapore, 1819-1940 Goh Chor Boon, 2013 How did imported technology contribute to the development of the colony of Singapore? Who were the main agents of change in this process? Was there extensive transfer and diffusion of Western science and technology into the port-city? How did the people respond to change? Examining areas such as shipping, port development, telegraphs and wireless, urban water supply and sewage disposal, economic botany, electrification, food production and retailing, science and technical education, and health, this book documents the role of technology and, to a smaller extent, science, in the transformation of colonial Singapore before 1940. In doing so, this book hopes to provide a new dimension to the historiography of Singapore from a science, technology and society perspective.

Singapore in Southeast Asia Iain Buchanan, 1972 Study of the economic structure and the economic development and politics process in Singapore - gives the historical background, covers the role of Singapore in South East Asia, the importance of the service sectors and trade, the social

structure and ethnic groups, income distribution, living conditions, the occupational structure of the labour force, poverty and slum resettlement, etc., and briefly discusses the trade union movement. References and statistical tables.

Competitiveness of the Singapore Economy Mun Heng Toh, 1998 This volume provides an intensive review of the economic competitiveness of Singapore's economy. It identifies and analyses the strategies which will allow the economy to retain its competitive advantage in the years ahead in an increasingly globalised economic environment, considerably liberalised international trading and investment climate, and with regional economies challenging the country's competitive edge as a regional transportation hub, international financial centre and a primary regional centre for technology and education. Dialogues and interviews with managers and CEOs of industries in the private and public sectors are also included.

Singapore's Foreign Policy Kawin Wilairat, 1975-12-01 Discusses the major aspects of Foreign Policy and Foreign Relations Prior to Independence (1959-65), the Policy of Survival in the first decade (1965-75) and Regional Policy: Reconstruction of Global and regional Interests. With a brief conclusion and 7 tables.

Singapore Carl A. Trocki, 2006-03-23 This volume examines Singapore's culture of control, exploring the city-state's colonial heritage as well as the forces that have helped to mould its current social landscape. Taking a comparative approach, Trocki demonstrates the links between Singapore's colonial past and independent present, focusing on the development of indigenous social and political movements. In particular, the book examines the efforts of Lee Yew Kuan, leader of the People's Action Party from 1959 until 1990, to produce major economic and social transformation. Trocki discusses how Singapore became a workers paradise, but what the city gained in material advancement it paid for in intellectual and cultural sterility. Based on the latest research, Singapore addresses the question of control in one of the most prosperous and dynamic economies in the world, providing a compelling history of post-colonial Singapore.

The Struggle Over Singapore's Soul Joseph B. Tamney, 1996 Singapore is viewed as a model of an orderly, economically developing successful society on the Pacific Rim. Based on eight years of field work, the author analyzes how modernization effects an Asian society and which value conflicts prevail. The Singapore government's program to shape its version of a modern, yet Asian national identity is described in light of the dominant ideology. In addition, the values and beliefs of opposition movements are presented. The work explores the tensions between these ideological sets and the

likely outcome of the complex, inconsistent processes currently underway.

Singapore Politics Under the People's Action Party Diane K. Mauzy, Robert Stephen Milne, 2002

The party has coped successfully with the needs of a multiethnic population, claims for more extensive human rights, the nascent development of a civil society, and the problems of defending a small country in a turbulent region..

Singapore Ethnic Mosaic, The: Many Cultures, One People Mathew Mathews, 2017-10-31 Far from being a melting pot, multi-racial Singapore prides itself on the richness of its ethnic communities and cultures. This volume provides an updated account of the heterogeneity within each of the main communities – the Chinese, Malay, Indian, Eurasian and Others. It also documents the ethnic cultures of these communities by discussing their histories, celebrations, cultural symbols, life cycle rituals, cultural icons and attempts to preserve culture. While chapters are written by scholars drawing insight from a variety of sources ranging from academic publications to discussions with community experts, it is written in an accessible way. This volume seeks to increase intercultural understanding through presenting ample insights into the cultural beliefs and practices of the different ethnic communities. While this book is about diversity, a closer examination of the peoples and cultures of Singapore demonstrates the many similarities communities share in this Singaporean space. Studying Singapore's Past Ping Tjin Thum,Karl Hack,Kevin Blackburn,John Bastin,Anthony Milner,Kelvin W.K. Ng,A.J. Stockwell,Jason Lim,2012-07-01 C.M. (Mary) Turnbull's contributions to historical writing on Singapore extended from her 1962 thesis, published in 1972 as *The Straits Settlements, 1826-1867: Indian Presidency to Crown Colony*, to her magisterial history of Singapore, first published in 1977 and re-issued in 2009 in an updated edition as *A History of Singapore, 1819-2005*. Her approach to history involved detailed work with documents and published materials, with a particular focus on political and economic history. One contributor to the present volume described the book as an exercise in endowing a modern 'nation-state' with a coherent past that should explain the present. As styles in history evolved, younger scholars including some of her former students and colleagues began exploring new approaches to historical research that drew on non-English-language source material and asked fresh questions of the sources. Mary enjoyed controversy and expected debate, and had a deep interest in these accounts, which were in many ways a natural progression from her own publications even when they raised questions about her interpretations and conclusions. *Studying Singapore's Past* had its origins in a conference organised to discuss her work. The volume includes ten contributions, some from long-established scholars of Singapore's history, others from a new generation of researchers. Their work offers an evaluation of established understandings of Singapore's history, and gives an indication of new directions that researchers are exploring. In publishing the book, the editor not only pays tribute to a distinguished historian but also seeks to make a contribution to the historiography of Singapore and to ongoing debates about Singapore's past.
