Each of the 30 lessons incorporates games and skill-testing activities to keep students active and engaged. Then, 10 lessons for intermediate skiers continue work on the diagonal stride as well as improving hill climbing and descending techniques, stops, speed control, and maneuverability. These lessons also challenge students with increasing length of glide, shifting weight to commit to the gliding ski, and using poling action for propulsion. Finally, 10 advanced lessons help your skiers achieve a diagonal stride that is rhythmic and continuous even over hillier and longer trails. In addition to refining their diagonal stride technique, your skiers will have fun learning the stem christie, traversing steeper hills, and edging. Teaching Cross-Country Skiing also includes the history and benefits of cross-country skiing, which you can use in developing a cross-country skiing unit or interdisciplinary unit. Plus you'll find reproducible handouts, worksheets, poster signs, ideas for interdisciplinary lessons, additional games and activities, rubrics, checklists, and activity aids such as a chart for measuring boot size and ski length. *I Ski and Ride* Suzy Chase-Motzkin,2017-11-28 This guide visually communicates the essential movements needed to learn to ski or snowboard.

*Advanced Skiing* Marty Hurn,1990-10-01 This book has been written specifically for the recreational skier. It is not for the racer or the potential instructor, but for the skier who feels that his or her parallel turns are not all they might be. You may be stemming slightly, or perhaps your edges keep washing out. You may be restricted to only a few ways of turning or want to explore new areas of skiing, such as the bumps or the powder. It is for the skier who wants the maximum enjoyment out of the sport.

*Downhill ski technique, step by step* Janos Koranyi,2019-04-20 This book is especially written for all insecure skiers in the first place. If you think, that you are a beginner or an intermediate skier, this book is thought to be the right choice for you. But everyone, interested in understanding, developing, learning and teaching downhill skiing can benefit from this work. I have been working on this material since 2010 and the work is still going on. My basic point is, that if you want to learn downhill skiing, you must be able to imagine for yourself what you must do in order to do it right or as good as possible. This imagination should not be just a picture! It should be like a whole movie, with all your senses involved, just like in a detailed dream. Like, if you can imagine the whole ski-turn with many, clear details, what basic movements you have to do, how it should feel in your body, how it should look like, how it should change during the development of your turn, this will prepare your correct movements in the real life. But this must happen step by step, starting by the easiest skills and developing further when you have tried out the first steps first. For this reason I have divided the material in 3 different levels. You will need quite a long time for this. So please be patient, take your time, work with my book, do not just read it! Understanding and explaining skiing is complicated and it takes time. My suggestion is to read carefully, take several breaks and think carefully about the sections you find difficult to understand. If you are a beginner, start reading the book as soon as possible before your start your skiing. You can stop reading after the beginner level and go skiing on green and blue slopes. You can also find a short free book about downhill ski-tech on my homepage.
