Multiple Voices in Academic and Professional Discourse Sergio Maruenda Bataller, 2011-05-25 The demands of today's society for greater specialization have brought about a profound transformation in the humanities, which are not immune to the competitive pressure to meet new challenges that are present in other sectors. Thus, lecturers and researchers in modern languages and applied linguistics departments have made great efforts to design syllabi and materials more attuned to the competences and requirements of potential working environments. At the same time, linguists have attempted to apply their expertise in wider areas, creating research institutes that focus on applying language and linguistics in different contexts and offering linguistic services to society as a whole. This book attempts to provide a global view of the multiple voices involved in interdisciplinary research and innovative proposals in teaching specialized languages while offering contributions that attempt to fill the demands of a varied scope

of disciplines such as the sciences, professions, or educational settings. The chapters in this book are made up of current research on these themes: discourse analysis in academic and professional genres, specialized translation, lexicology and terminology, and ICT research and teaching of specialized languages.

You awaken from a coma to a gruelling, yet often funny, rehabilitation. You can't speak; you can only move your eyes. You've never been an angel. You lose your marriage totally and are separated from your children. Finally, new love, and you become a parent, once more. This is the true-life story of Danny Furlong's extraordinary journey from an active life to the depths of mute quadriplegia and back to the highs of life within that quadriplegia.

Fielding, 2018-10-08 Despite declining stocks and health risks, island communities in the Caribbean and North Atlantic still use traditional methods to hunt whales and dolphins for food. Selfie James Sherry, 2022-10-26 Selfie: Poetry, Social Change & Ecological Connection presents the first general theory that links poetry in environmental thought to poetry as an environment. James Sherry accomplishes this task with a network model of connectivity that scales from the individual to social to environmental practices. Selfie demonstrates how parts of speech, metaphor, and syntax extend bidirectionally from the writer to the world and from the writer inward to identities that promote sustainable practices. Selfie shows how connections in the biosphere scale up from operating within the body, to social structures, to the networks that science has identified for all life. The book urges readers to construct plural identifications rather than essential claims of identity in support of environmental diversity.

Investigating Pristine Inner Experience Russell T. Hurlburt, 2011-06-27 You live your entire waking life immersed in your inner experiences (thoughts, feelings, sensations and so on) – private phenomena created by you, just for you, your own way. Despite their intimacy and ubiquity, you probably do not know the characteristics of your own inner phenomena; neither does psychology or consciousness science. Investigating Pristine Inner Experience explores how to apprehend inner experience in high fidelity. This book will transform your view of your own inner experience, awaken you to experiential differences between people and thereby reframe your thinking about psychology and consciousness science, which banned the study of inner experience for most of a century and yet continued to recognize its fundamental importance. The author, a pioneer in using beepers to explore inner experience, draws on his 35 years of studies to provide fascinating and provocative views of everyday inner experience and experience in bulimia, adolescence, the elderly, schizophrenia, Tourette's syndrome, virtuosity and more.
