Speed of Winter Andy Coombs, Sarah Scho, 2021-08-25 Speed of Winter Nora stretched her arm right back and threw the stone as hard as she could towards the hole in the middle of the frozen lake. The stone spun through the air but just as it was about to land a hand pushed its way out of the water and caught it. The hand was followed by a long arm, then a head and a body. And legs. An old man, dressed in a long green robe rose from the lake. His feet floated a few inches over the ice. Then he bent down and blew on his hand towards the hole he had come from. The hole turned white and then was smooth with ice. Speed of Winter is about a young girl who becomes the apprentice to Jack Frost. The Series Viking Kite stories are written by English-Swedish writers, Andy Coombs and Sarah Scho - both authors and teachers with more than 40 books published and a million books sold in Sweden. They are the all-time, best-selling educational authors in Scandinavia and live just outside Stockholm in a forest cottage with their little black and white dog, Nimly. Viking Kite celebrates Scandinavia's progressive approach to gender, race, identity, social fairness and inclusivity. Andy and Sarah have been educating and entertaining Sweden's youth for twenty years - and now, finally, in the Spring of 2021, their stories can be read anywhere in the world. All Swedish/English translations are done by Inger Strömsten. These 23 stories are aimed at MG and YA and range from alien angels to time travelling Romans. Bullying to the closest friendships. Personal identity and growth, to animal minds and ancient tribes of wild horses. The Stories Viking Kite stories take us to alien worlds, the distant past, Neanderthal life, lonely mermaids, lost Valkyrie, hungry vampires and powerful wizards. Genre-spanning and fast-paced. The books are in three exciting genres: Strange Life, Different Minds and Shadow Side. Strange life stories explore ideas like identity, fitting-in, bullying, family dynamics, and social issues. Different minds are an exploration of the other; if evolution were a living being what would it say? What is animal consciousness and how would the ancient Romans see us? New ways of thinking; different minds to explore. Empathy. Learning. Imagination. Shadow side stories are darker in tone. From cheating to parental neglect. Coping with inner rage to ending hatred. Living with death and loss and crime. There are also a few monsters, vampires and ghosts...but not as you might expect.

The Speed of Winter B. Allen, 2012-05-08 Earth's Bureau of Planning sent the arkship out to found a new colony and save humanity. But they made a mistake...When two of the crew broke the rules to have a child, they didn't know their target planet was a frozen wasteland. Now their daughter Elyse must watch the adults around her cope with devastating failure, and try to make something out of her own life at the same time. The Speed of Winter is the first in the Four Seasons quintet, which explores the voyages of four arkships and the fate of those left on Earth. Winter will be followed by A Heading for Fall. Not suitable for children.

All Swedish/English translations are done by Inger Strömsten. Their stories range from alien angels to time travelling Romans. Bullying to the closest friendships. Personal identity and growth, to animal minds and ancient tribes of wild horses. Inspire: Inside each book is an 'Inspire' QR code that takes you to videos, songs, poems, quizzes and more, all inspired by the story and the themes explored. This free content is designed to help parents encourage their child to have as deep a reading experience as possible. Viking Kite's approach is to slow down reading to build empathy with characters and give a greater depth of understanding to the narrative. It's fun too! There is an online quiz after every story chapter to test vocabulary and comprehension. There are discussion topics to help readers develop the language of opinion and negotiation. Readers are encouraged to think about character motivation to develop empathy and critical evaluation skills. Viking Kite stories take us to alien worlds, the distant past, Neanderthal life, lonely mermaids, lost Valkyrie, hungry vampires and powerful wizards. Genre-spanning and fast-paced, Viking Kite comes in four reading levels: Blue books, Green books, Yellow books and Red books. Blue books are the easiest. Red books are the hardest. The books are in three exciting genres: Strange Life, Different Minds and Shadow Side.

Winter Thermal Structure, Ice Conditions and Climate of Lake Champlain Roy E. Bates, 1980 Measurements made, winters 1975-76 and 1976-77.

Speed Kings Andy Bull, 2015 In the 1930s, as the world hurtled toward war, speed was all the rage. Bobsledding, the fastest and most thrilling way to travel on land, had become a sensation. Exotic, exciting, and brutally dangerous, it was the must-see event of the 1932 Winter Olympics at Lake Placid, the first Winter Games on

American soil. Bobsledding required exceptional skill and extraordinary courage-qualities the American team had in abundance. There was Jay O'Brien, the high-society playboy; Tippy Grey, a scandal-prone Hollywood has-been; Eddie Egan, world champion heavyweight boxer and Rhodes Scholar; and the charismatic Billy Fiske, the true heart of the team, despite being barely out of his teens. In the thick of the Great Depression, the nation was gripped by the story of these four men, their battle against jealous locals, treacherous US officials, and the very same German athletes they would be fighting against in the war only a few short years later. Billy, in fact, went on to talk his way into the Royal Air Force-despite their Brits-only policy-and was there to fight the Nazis during the Battle of Britain. King of speed to the end, he would become the first American fighter pilot killed in WWII. The exploits of Billy and his teammates make up a story that spans the globe, from Golden Age Hollywood to seedy New York gambling dens, to the most fashionable European resorts, the South Seas, and beyond.

Performance Measurement for Highway Winter Maintenance Operations Lin Qiu, Wilfrid A. Nixon, 2009 The goal of this research project was to develop a method to measure the performance of a winter maintenance program with respect to the task of providing safety and mobility to the traveling public. Developing these measures required a number of steps, each of which was accomplished. First, the impact of winter weather on safety (crash rates) and mobility (average vehicle speeds) were measured by a combination of literature reviews and analysis of Iowa Department of Transportation traffic and Road Weather Information System data. Second, because not all winter storms are the same in their effects on safety and mobility, a method had to be developed to determine how much the various factors that describe a winter storm actually change safety and mobility. As part of this effort a storm severity index was developed, which ranks each winter storm on a scale between 0 (a very benign storm) and I (the worst imaginable storm). Additionally a number of methods of modeling the relationships between weather, winter maintenance actions and road surface conditions were developed and tested. The end result of this study was a performance measure based on average vehicle speed. For a given class of road, a maximum expected average speed reduction has been identified. For a given storm, this maximum expected average speed reduction is modified by the storm severity index to give a target average speed reduction. Thus, if for a given road the maximum expected average speed reduction is 20 mph, and the storm severity for a particular storm is 0.6, then the target average speed reduction for that road in that storm is 0.6×20 mph or 12 mph. If the average speed on that road during and after the storm is only 12 mph or less than the average speed on that road in good weather conditions, then the winter maintenance performance goal has been met.

Mobility and Safety Impacts of Winter Storm Events in a Freeway Environment Keith K. Knapp, 2000 Several factors influence a driver's decision to travel, choice of vehicle speed, and the safety of a particular trip. These factors include, among others, the trip purpose, time of day, traffic volumes, weather and roadway conditions, and the range of vehicle speeds on the roadway. The main goal of the research project summarized in this report was the investigation of winter storm event impacts on the volume, safety, and speed characteristics of interstate traffic flow.

The Analysis of Directional Time Series: Applications to Wind Speed and Direction Jens Breckling, 2012-12-06 Given a series of wind speeds and directions from the port of Fremantle the aim of this monograph is to detect general weather patterns and seasonal characteristics. To separate the daily land and sea breeze cycle and other short-term disturbances from the general wind, the series is divided into a daily and a longer term, synoptic component. The latter is related to the atmospheric pressure field, while the former is studied in order i) to isolate particular short-term events such as calms, storms and oscillating winds, and ii) to determine the land and sea breeze cycle which dominates the weather pattern for most of the year. All these patterns are described in detail and are related to the synoptic component of the data. Two time series models for directional data and a new measure of angular association are introduced to provide the basis for certain parts of the analysis.

A Book of Winter Sports J. C. Dier, 2018-03-22 Excerpt from A Book of Winter Sports: An Attempt to Catch the Spirit of the Keen Joys of the Winter Season The friction type of ice-motor first received serious attention when, in 1911, Fred Waters, of Red Bank, stumbled into a sensation by putting his runabout on runners with a cogged wheel motor driven. It is said that he had no thought of its being unusually Speedy, but simply aimed to take advantage of the better and less obstructed surface of the ice as compared with the rough roads. The speed of this auto-sleigh with an engine of only Six horsepower was so remarkable that in the next winter he took a Ford chassis, placed runners where the front wheels were, and rear runners on a three-foot extension of the back of the Chassis. In place of the tires on the rear wheels are about thirty-six sharp steel plates which attend to its propulsion when driven by a twenty-two and a half horsepower engine. This ice-sled is driven exactly as one drives an auto mobile, and runs smoothly; springs in the front and rear make riding comfortable even at the highest speed. Mr. Waters believes that he will be able to make almost a mile a minute on clear ice, which seems to be about the speed developed so far by the propeller type on Saranac Lake. Intense interest is being shown in the new sport by both veteran ice-yachtsmen and automobile owners who were never aboard an ice - boat; there is no question but that ice motors will soon be thoroughly studied in the manufacturers' designing rooms, and that motor ice-running will head the list of winter sports in which speed is a factor. FIRE WEATHER: Agriculture Handbook 360 U.S. Department of Agriculture □ Forest Service,2019-07-03 Weather is never static. It is always dynamic. Its interpretation is an art. The environment is in control in wildland firefighting. Free-burning fires are literally nourished by weather elements, atmospheric components, and atmospheric motion. Outguessing Mother Nature in order to win control is an extremely difficult task. We need to soothe her with understanding. We have attempted to present information in such a way that your daily and seasonal awareness of fire weather can begin with reliable basic knowledge. We have kept the use of technical terms to a minimum, but where it was necessary for clear and accurate presentation, we have introduced and defined the proper terms. Growing awareness of fire weather, when combined with related experience on fires, can develop into increasingly intuitive, rapid, and accurate applications. Toward this end, we have preceded each chapter with a paragraph or two on important points to look for in relating weather factors to fire control planning and action.

Body, Mind, and Sport John Douillard,2018-08-14 Until recently, the effortless Zone of peak performance was only within the reach of serious athletes. Now, with Body, Mind, and Sport, anyone can reach the Zone, regardless of fitness level. Designed to accommodate a variety of individual fitness needs, the Body, Mind, and Sport program is split into two levels. Level 1 is for non-athletes who want to improve overall fitness; Level 2 is for those who want to train for competitive or recreational purposes. Your own unique mind-body type is taken into account to guide you in achieving your personal best without stress or strain. In this revised and updated edition of Body, Mind, and Sport, fitness expert and trainer John Douillard outlines a program in which your individual seasonal constitution-Winter, Spring, or Summer-determines what exercises or sports are best suited to your mind-body type and what foods you should eat for optimum results. Using the Body, Mind, and Sport approach you can decrease heart and breath rates while improving both fitness and performance. Dozens of world-class athletes, including Martina Navratilova and Billie Jean King, have used John Douillard's expert breathing techniques, dietary recommendations, and seasonally balanced workouts. Now you can, too!

Speed Kings Andy Bull,2015-05-07 In the 1930s, as the world hurtled towards terrible global conflict, speed was all the rage. It was described by Aldous Huxley as 'the one genuinely modern pleasure', and one of the fastest and most thrilling ways to attain it was through the new sport of bobsledding. Exotic, exciting and above all dangerous, it was by far the most popular event at the Lake Placid Winter Olympics. It required an abundance of skill and bravery. And the four men who triumphed at those Games lived the most extraordinary lives. Billy Fiske was an infamous daredevil, blessed with a natural talent for driving. He would later become the first American airman to die in the war - flying for the RAF. Clifford Gray was a notorious playboy and a player on both Broadway and Hollywood. Or was he? His identity was a mystery for decades. Jay O'Brien was a gambler and a rogue who, according to one ex-wife, forced women to marry him at gunpoint. And Eddie Egan, a heavyweight boxer and brilliant lawyer, remains the only man to win gold at both the Summer and Winter Olympics. This is their story, of loose living, risk-taking and hell-raising in an age of decadence, and of their race against the odds to become the fastest men on ice. We will never see their like again. Especially after the world did descend into that second, teriible global conflict.
