Midget Racing Down Under Ken Brown, 2021-11-27 Midget (Speedcar) racing came to Australia around 18 months after it kicked off in California. Bill Allen brought a car back from the USA and the first meeting was staged on December

15, 1934 at the Olympic Park Speedway in Melbourne. This publication contains the actual newspaper reports from that very first season. Read about the cars and the drivers - the format used for the inaugural season - driver names, car numbers and colours - the proposed trip to America for a local team - lady drivers racing - first ever night football match plus midget racing - the first Australian and Victorian Championships - controlling body formed - plus the action spreads to FIVE more tracks and THREE states the following summer. The 87th Anniversary of Speedcar (Midget) racing down under will be celebrated on December 15, 2021.

**The Future of the Postal Sector in a Digital World** Michael Crew, Timothy J. Brennan, 2015-11-28 Worldwide, postal operators have been slow to address the threats from and opportunities created by electronic competition. The European Commission and member states are wrestling with these issues, while at the same time continuing to deal with the interrelated issues of implementing entry into postal markets and maintaining the universal service obligation. The Postal Accountability and Enhancement Act of 2006 in the U.S. exacerbated financial and managerial problems faced by USPS that result in part from electronic substitution for letter delivery. A major aim of this book is to examine policies to address postal operations in a digital world and ways in which postal operators might reinvent themselves to respond to threats and exploit opportunities. Potential opportunities examined include parcels, e-commerce, digital delivery, regulatory innovations and pricing.

This book will be of interest to postal operators, regulatory commissions, consulting firms, competitors and customers, experts in the postal economics, law, and business, and those charged with the responsibility for designing and implementing postal sector policies. Researchers in regulatory economics, transportation technology and industrial organization will also find considerable food for thought in this volume.

**Extra Galaxia** Pierre V. Comtois, 2019-03-01 Science Agent Jules Santos has two problems: he has to save the universe and avoid falling for beautiful 'Manda Mooney, sometime secretary for the Terran Consortium's Exterior Ministry but actually a secret operative with orders to keep him under surveillance. On assignment from Military Intelligence, Science Division, Jules is on the trail of a group of renegade scientists that plan on using dangerous black hole technology to tip the balance in Earth's war against the Outer Arm Coalition. Only thing is, use of such banned tech will set off an interstellar chain reaction that could consume the entire galaxy! Now, follow Jules and 'Manda as they team up and travel beyond known space to catch the conspirators and prevent Terran defeat in its war with the Coalition!

**Storm in the Rear-View** Rick TURNER, 2013-01-05 When writing this book, I assumed that the reader would have already read my first offering, "The Calm Before STORM" which dealt with travels during the first year of our retirement, 2006. If you have not, I suggest you do. Why? Simply, it's a darn good read. Honestly though, you need not have read "Calm" before this one.

“STORM in the Rear-view” will make perfect sense regardless, as I detail our further adventures in the two following years, during which, unknowingly, the GFC and the STORM Financial catastrophe were bearing down upon us. I will take you on a caravan journey right around our beautiful continent of Australia, and our off-shore state, Tasmania, come with us to Johannesburg, South Africa for the birth of our Grandson, climb Mt Kilimanjaro, drive through the Eastern bloc countries of Europe, visit Turkey and Vietnam, along the way catching numerous events of the world’s greatest motor sport, Speedway. You’ll be exhausted but the journey will be well worthwhile. Let’s go!

Advances in Temporal Logic Howard Barringer, Michael Fisher, Dov M. Gabbay, Graham Gough, 2013-11-11 Time is a fascinating subject and has long since captured mankind's imagination, from the ancients to modern man, both adult and child alike. It has been studied across a wide range of disciplines, from the natural sciences to philosophy and logic. Today, thirty plus years since Prior's work in laying out foundations for temporal logic, and two decades on from Pnueli's seminal work applying of temporal logic in specification and verification of computer programs, temporal logic has a strong and thriving international research community within the broad disciplines of computer science and artificial intelligence. Areas of activity include, but are certainly not restricted to: Pure Temporal Logic, e. g. temporal systems, proof theory, model theory, expressiveness and

complexity issues, algebraic properties, application of game theory; Specification and Verification, e. g. of reactive systems, of real-time components, of user interaction, of hardware systems, techniques and tools for verification, execution and prototyping methods; Temporal Databases, e. g. temporal representation, temporal querying, granularity of time, update mechanisms, active temporal data bases, hypothetical reasoning; Temporal Aspects in AI, e. g. modelling temporal phenomena, in interval temporal calculi, temporal nonmonotonicity, interaction of temporal reasoning with action/knowledge/belief logics, temporal planning; Tense and Aspect in Natural Language, e. g. models, ontologies, temporal quantifiers, connectives, prepositions, processing temporal statements; Temporal Theorem Proving, e. g. translation methods, clausal and non-clausal resolution, tableaux, automata-theoretic approaches, tools and practical systems.
