Childhood in a Sri Lankan Village Bambi L. Chapin, 2014-06-30 Like toddlers all over the world, Sri Lankan children go through a period that in the U.S. is referred to as the “terrible twos.” Yet once they reach elementary school age, they appear uncannily passive, compliant, and undemanding compared to their Western counterparts. Clearly, these children have undergone some process of socialization, but what? Over ten years ago, anthropologist Bambi Chapin traveled to a rural Sri Lankan village to begin answering this question, getting to know the toddlers in the village, then returning to track their development over the course of the following decade. *Childhood in a Sri Lankan Village* offers an intimate look at how these children, raised on the tenets of Buddhism, are trained to set aside selfish desires for the good of their families and the community. Chapin reveals how this cultural conditioning is carried out through small everyday practices, including eating and sleeping arrangements, yet she also explores how the village’s attitudes and customs continue to evolve with each new generation. Combining penetrating psychological insights with a rigorous observation of larger social structures, Chapin enables us to see the world through the eyes of Sri Lankan children searching for a place within their families and communities. *Childhood in a Sri Lankan Village* offers a fresh, global perspective on child development and the transmission of culture.

An Open Economy Quarterly Projection Model for Sri Lanka Chandranath Amarasekara, Rahul Anand, Kithsiri Ehelepola, Hemantha Ekanayake, Vishuddhi Jayawickrema, Sujeetha Jegajeevan, Csaba Kober, Tharindi Nugawela, Sergey Plotnikov, Adam Remo, Poongothai Venuganan, Rasika Yatigammana, 2018-06-25 This study documents a semi-structural model developed for Sri Lanka. This model, extended with a fiscal sector block, is expected to serve as a core forecasting model in the process of the Central Bank of Sri Lanka’s move towards flexible inflation targeting. The model

includes a forward-looking endogenous interest rate and foreign exchange rate policy rules allowing for flexible change in policy behavior. It is a gap model that allows for simultaneous identification of business cycle position and long-term equilibrium. The model was first calibrated and then its data-fit was improved using Bayesian estimation technique with relatively tight priors.

A Literature Survey of Macro Econometric and CGE Models in Sri Lanka S. W. S. B. Dasanayaka, 2000

Legal Framework for the Admission of FDI Thomas Pollan, 2006 The law on foreign direct investment (FDI) belongs to the fastest changing legal field in international law. Investors and the host state have long left behind a relationship dominated by the host state's desire to screen and choose FDI. In the current market for FDI, both parties try to assert influence, but in the end the scarcity of FDI is the decisive factor. This book provides an in-depth study of the legal framework for the admission of FDI and presents insights into the pros and cons of various admission models. Its goal is to identify legal and policy options that serve the host state's and investor's common needs. The book is a comprehensive, easy reference handbook that is of interest to lawyers, academics and policy makers.

Development of a Sector Model for Agricultural Policy Analysis in Sri Lanka (SLASM) Wasanthi Wickramasinghe, 2005

Towards Inflation Targeting in Sri Lanka Rahul Anand, Ding Ding, Mr. Shanaka J. Peiris, 2011-04-01 This paper develops a practical model-based forecasting and policy analysis system (FPAS) to support a transition to an inflation forecast targeting regime in Sri Lanka. The FPAS model provides a relatively good forecast for inflation and a framework to evaluate policy trade-offs. The model simulations suggest that an open-economy inflation targeting rule can reduce macroeconomic

volatility and anchor inflationary expectations given the size and type of shocks faced by the economy. Sri Lanka could aim to target a broad inflation range initially due to its susceptibility supply-side shocks while enhancing exchange rate flexibility and strengthening the effectiveness of monetary policy in the transition to an inflation forecast targeting regime.

Cultural Models Giovanni Bennardo, Victor C. De Munck, 2014 This book is about cultural models. Cultural models are defined as molar organizations of knowledge. Their internal structure consists of a 'core' component and 'peripheral' nodes that are filled by default values. These values are instantiated, i.e., changed to specific values or left at their default values, when the individual experiences 'events' of any type. Thus, the possibility arises for recognizing and categorizing events as representative of the same cultural model even if they slightly differ in each of their specific occurrences. Cultural models play an important role in the generation of one's behavior. They correlate well with those of others and the behaviors they help shape are usually interpreted by others as intended. A proposal is then advanced to consider cultural models as fundamental units of analysis for an approach to culture that goes beyond the dichotomy between the individual (culture only in mind) and the collective (culture only in the social realm). The genesis of the concept of cultural model is traced from Kant to contemporary scholars. The concept underwent a number of transformations (including label) while it crossed and received further and unique elaborations within disciplines like philosophy, psychology, anthropology, sociology, artificial intelligence, and cognitive science. A methodological trajectory is outlined that blends qualitative and quantitative techniques that cross-feed each other in the gargantuan effort to discover cultural models. A survey follows of the extensive research about cultural models carried out with populations of North Americans, Europeans, Latino- and Native-Americans, Asians (including South Asians and South-East Asians), Pacific

Islanders, and Africans. The results of the survey generated the opportunity to propose an empirically motivated typology of cultural models rooted in the primary difference between foundational and molar types. The book closes with a suggestion of a number of avenues that the authors recognize the research on cultural models could be traversing in the near future.

Dynamics of Tamil Nadu Politics in Sri Lankan Ethnicity G. Palanithurai, K.

Mohanasundaram, 1993 Tamil Nadu has been playing its legitimate role in the inter-government relationship on the Tamil issues. The magnitude of the state politics in the problems of Sri Lankan Tamils has reached its Zenith during the past one decade as a result of the eruption of ethnic violence in Sri Lanka. Since Tamil Polity has been fully dominated by ethnic political parties, each one has been trying its level best to project itself as the Vanguard of Tamil Nationalism. This book traces the approaches of the political parties and especially ethnic political parties towards the Sri Lankan Tamil issues. It also analyses to what extent the pressure extended by the ethnic political parties has been taken into account in foreign policy making of Indian Government during different periods. Significantly this work touches a very important aspect that to what extent the support extended by the political parties to help themselves to establish firm roots in provincial polity. This study sheds light on the ambiguous stand of the political parties in Tamil Nadu over this issue which ultimately has weakened the cause of the Tamils and mislead the Indian Government which adopted a tough stand without heeding to the plea of the majority of the Sri Lankan Tamils.

Energy Policy Analysis and Modelling Mohan Munasinghe, Peter Meier, 1993-08-26

Energy plays a vital role in economic and social development. The analysis of energy issues and policy options is therefore a vital area of study. This book presents a hierarchical modelling scheme intended to support energy planning and policy analysis in developing countries. The authors

introduce the concept of 'Integrated National energy Planning' (INEP), and examine the spreadsheet models, optimization models, and linear planning models which energy planners use. Environmental considerations are also introduced into the analysis. Techniques are then applied to two important energy subsectors, electricity and fuelwood, before problems of integration and policy implementation are discussed. Throughout the book, the authors examine actual practice in developing countries. Illustrative case material is drawn from Egypt, West Africa, Sudan, Pakistan, Colombia, India, Sri Lanka and Morocco. This book will be of interest to students and practitioners of energy planning, and to those concerned with the wider development implications of energy policy.

Economic Progress and Growth H.M. Scobie, 2013-03-07 This volume puts forward a group of models applied to different economies, capturing the progress and growth of their economic systems. The models provide a quantified framework for the formulation of economic policy. They aid the introduction of targets and policy instruments taking account of constraints in the process of development. Also, an evaluation of external and internal shocks is taken using a comparative static type of analysis. The models take into account constraints which are in the nature of institutional as well as supply constraints. Problems of data exist in any quantitative analysis and account was taken of this factor in presenting the models and the results reached. Nonetheless, the models attempt to specify, estimate and simulate a given macroeconomic system. Models of this type are not freely available to the interested reader, but only in a fragmented way. This book puts the efforts of a group of economists worldwide under one cover. It is believed that the collection will be of interest both for courses in planning and for those advising these countries such as international organizations, research bodies, etc. Moreover, an overview of trade policy and income distributional factors is presented. It is hoped that this collection will prove interesting and useful to economists world wide.

Microfinance Institutions in Sri Lanka J. K. M. D. Chandrasiri, B. A. D. S. Bamunuarachchi, 2016

Mathematical Modelling and Analysis of Infectious Diseases Khalid Hattaf, Hemen

Dutta, 2020-07-30 This book discusses significant research and study topics related to mathematical modelling and analysis of infectious diseases. It includes several models and modelling approaches with different aims, such as identifying and analysing causes of occurrence and re-occurrence, causes of spreading, treatments and control strategies. A valuable resource for researchers, students, educators, scientists, professionals and practitioners interested in gaining insights into various aspects of infectious diseases using mathematical modelling and mathematical analysis, the book will also appeal to general readers wanting to understand the dynamics of various diseases and related issues. Key Features Mathematical models that describe population prevalence or incidence of infectious diseases Mathematical tools and techniques to analyse data on the incidence of infectious diseases Early detection and risk estimate models of infectious diseases Mathematical models that describe the transmission of infectious diseases and analyse data Dynamical analysis and control strategies for infectious diseases Studies comparing the utility of particular models in describing infected diseases-related issues such as social, health and economic

A Time of Change: Questioning the “Collapse” of Anuradhapura, Sri Lanka Keir Magalie

Strickland, 2017-06-30 This book reassesses the apparent collapse of Anuradhapura, Sri Lanka, through explicit reference to the archaeological record, rather than focusing solely upon textual sources which have been overly relied upon in previous studies.

Push Back Judith Large, 2016-12-15 In 2009, after decades of conflict, the Sri Lankan government

proclaimed the decisive defeat of the Liberation Tamil Tigers of Elam. Subsequently, the state proved resistant to attempts by the UN and other international bodies to promote post-war reconciliation or reform. In this incisive new work, Judith Large investigates the ways in which the Rajapaksa government was able to subvert international diplomatic efforts, as well as exploring the wider context of rising Sinhalese nationalism, the attendant growth of discrimination against minorities, and efforts by both the diaspora and citizens within Sri Lanka to work towards a positive peace. Push Back is vital reading not only for those interested in Sri Lanka, but also for those concerned about the wider implications of the conflict for human rights, peace-making, and geopolitics.

Agricultural Research for Sustainable Food Systems in Sri Lanka Ranjith Premalal De Silva, Gamini Pushpakumara, Pahan Prasada, Jeevika Weerahewa, 2020-10-06 Food systems involve a range of activities concerning food production, processing, distribution, marketing and trade, preparation, consumption and disposal. They encompass the path of food from the farm to the dinner table, meeting the food and nutritional needs of a nation. When such systems do so without sacrificing the needs of future generations, they are referred to as “Sustainable Food Systems.” The natural and physical environment, infrastructure, institutions, society and culture, and policies and regulations within which they operate, as well as the technologies they adopt, shape these systems’ outcomes. Making food systems more sustainable is a key priority for all nations, and Sri Lanka is no exception. Food systems deliver optimal performance when the policy and regulatory environment is conducive, institutions are supportive, and a combination of agricultural research investments and an efficient extension system generates the technologies and scientific evidence required for sound policymaking and agenda setting. Further, agricultural research can generate essential findings, technologies and policies for sustainable agricultural development – across disciplines, sectors and stakeholder groups.

This book shares valuable insights into research conducted in the broad food and agriculture sectors in Sri Lanka. It also discusses the status quo in related disciplines, and outlines future research directions. Accordingly, it offers a valuable source of reference material for researchers, students, and stakeholders in the food and agriculture sectors, while also highlighting the types of support that policymakers and other decision-makers can provide.

The Genesis of Sri Lanka Malay Sebastian Nordhoff,2012-11-29 Sri Lanka Malay shows extreme language contact: Malay phonology and lexicon are squared with clearly Indian morphosyntax and semantics. Historical, anthropological, typological and structural approaches shed light on the complex genesis and rapid evolution of this language.
