*Intimate Partner and Family Abuse* John Hamel, LCSW, 2008-06-16 The collected case examples are noteworthy in their diversity of presenting issue, treatment format, and outcome. As a whole, they underline our continued need to conduct assessments with clients prior to initiating treatment, to direct treatment toward identified client-related problems (in essence, meeting clients where they are), and to collect data that speaks to the effectiveness of our interventions in many settings and with many types of clients. -Jennifer Langhinrichsen-Rohling, PhD, Professor of Psychology, University of South Alabama Shows how to successfully conduct family interventions using case studies Includes male-perpetrated, female-perpetrated, and mutual violence scenarios Presents a variety of theoretical orientations Includes discussion questions after each case study This casebook

showcases a wide variety of couples and families whose domestic violence cases vary in their composition, ethnic and socioeconomic status, and mental health issues. The case authors outline different therapeutic approaches for each case, including cognitive-behavioral, family systems, feminist, problem-solving, and many others. Numerous concrete examples and tips show how to build rapport with cops, use a range of effective intervention strategies, and avoid common missteps and misconceptions. Approaches to working with frequently encountered clinical problems--such as substance abuse, depression, trauma, and marital conflict--are discussed in detail. A new preface in the paperback and e-book editions highlights the book's relevance in the context of current events and concerns about police-community relations. See also Kirschman's related self-help guide *I Love a Cop, Third Edition: What Police Families Need to Know*, an ideal recommendation for clients and their family members.

**Family Transitions** Celia Jaes Falicov, 1991-07-01 Of all concepts used by family therapists, the family development framework is among the least studied, in spite of its relevance to understanding spontaneous family change and to facilitating therapeutic intervention. The notion that a developmental difficulty underlies the appearance of clinical symptoms has become a time-honored

tradition in family therapy just as it has been in individual therapy. Yet, unlike the well-established and well-researched models of child and adult development, those in family development are rudimentary. Despite increasing interest in the family life cycle as a framework for family therapy, relatively little has been done to elucidate the specific dimensions and processes of spontaneous and therapeutically-induced change over the family life cycle. This volume gathers original contributions of some of the most prominent family theorists, researchers, and clinicians of our time to improve our understanding of these important and hitherto neglected domains. The book opens with a comprehensive overview by the editor that outlines contributions to the family life cycle framework from family sociology, and crisis theory. This is followed by a comparative analysis of developmental thinking, explicit or implicit, in the theory and interventions of the major family therapy approaches. Then divided into four parts, *FAMILY TRANSITIONS* introduces new conceptual models that integrate the temporality of the life cycle approach with systems theory. By their very nature, these models cut across therapeutic orientations and have important clinical applications. In Part II, family therapy's views of development are freed from the confines of the therapist's office, and placed in the context of other disciplines. Chapters provide analysis of changing--or static--sociocultural values that can affect conceptions of development; potential misuse of the concept of cultural identity in health, mental health, and education; how family identity operates as a vehicle for cultural transmission over generations; and family therapists' assumptions about women's development. The role of expected and unexpected events in the family life cycle is the focus of Part III. Chapters on clinical approaches geared to dislocations of life cycle occurrences due to unexpected crises, chronic illnesses, loss, or drug abuse provide illustrations of interventions that utilize, enhance, or potentially detract from the family's developmental flow. Part IV explores the articulation of the life cycle framework within four major family therapy orientations: intergenerational, structural, systemic, and symbolic-experiential. Each of these chapters endeavors to elucidate: what is the place of family development in each orientation; concepts of continuity and change; use of the concept of stages, transitions, or developmental tasks; the specific dimensions that change in most families over time; and the links between family dysfunction and life cycle issues. Finally, each chapter illustrates through clinical example assessment strategies, formulation of treatment goals and interventions as these emerge from a particular life cycle model. *FAMILY TRANSITIONS* presents a significant advance in our understanding of functional and dysfunctional family development and offers a range of interventions to promote developmental change. It is an invaluable resource for clinical psychologists, psychiatrists, social workers, and counselors that will also interest human development professionals, family sociologists, and family researchers. *FAMILY TRANSITIONS* can serve as a developmentally oriented textbook for teaching family therapy in academic and professional settings.

**The Heroic Client** Barry L. Duncan, Scott D. Miller, Jacqueline A. Sparks, 2011-03-10 In this controversial book, psychologists Barry Duncan and Scott Miller, cofounders of the Institute for the Study of Therapeutic Change, challenge the traditional focus on diagnosis, silver bullet techniques, and magic pills, exposing them as empirically bankrupt practices that only diminish the role of clients and hasten therapy's extinction. Instead, they advocate for the long-ignored but most crucial factor in therapeutic success--the innate resources of the client. Based on extensive clinical research and case studies, *The Heroic Client* not only shows how to harness the client's powers of regeneration to make therapy effective, but also how to enlist the client as a partner to make therapy accountable. *The Heroic Client* inspires therapists to boldly rewrite the drama of therapy, recast clients in their rightful role as heroes and heroines of the therapeutic stage, and legitimize their services to third-party payers without the compromises of the medical model.
