Parliamentary Papers Great Britain. Parliament. House of Commons,1859

The Secret State Richard C. Thurlow,1995-01-09 This is a history of the secret activities of the British government in response to threats to the nation's well-being and stability during the twentieth century. It is based on intensive and widespread research in private and public archives and on documents many of which have only recently come to light or been made available. The dangers perceived by the state have been manifold and various, coming from within and from abroad. Anarchists, fascists, socialists, communists, the IRA, trades-unionists and animal activists as well as spies, terrorists and saboteurs have been the subject of undercover investigation, along with almost every large-scale movement from suffragettes to campaigners for peace and nuclear disarmament. The author describes the methods and people employed, and the mixed nature of their results. The British state has always seen itself as civil and liberal, but as Dr Thurlow shows it has sometimes been far from open. The government has had many weapons at its disposal, from public order acts, censorship, internment and proscription on the one hand, to covert operations, infiltration and manipulation on the

other. Yet when examined in the light of new evidence, the activities of the state are fully comprehensible only in terms of those who comprised it. The author shows the tensions among the departments (between MI5, MI6, SIS and the Special Branch, for example), and the crucial part played by individuals whose motives were often far from what the government supposed them to be. This is at times disturbing, at others almost comical, but always fascinating account. It throws light on the inmost workings of the state, as well as on the movements and people subject to investigation and action.

Addicted? Marilyn Freimuth, 2008 We first encounter the memorable Durrell family in Gerald Durrell's immortal *My Family and Other Animals* when, as a small child, he moves to the island of Corfu with his single mother and siblings just before World War II. Here we meet, for the first time, the whole Durrell gang: the overbearing and insufferably clever older brother, Lawrence; sister Margo, whose genius for the wrong word is only matched by her obsession with her complexion and weight and her interest in boys; brother Leslie, whose primary passion in life appears to be firearms and the eradication of the local wildlife; and the ever-patient and forbearing mother, who tries desperately to hold this household of clever and determined souls together. In addition, there are the local characters: Spiro, the loyal family retainer and go-to guy when the inevitable emergency arises; Theodore, the brilliant, if slightly eccentric, teacher and companion; and, of course, the two family dogs, Widdle and Puke. But beyond the wildly funny moments, the stream of exotic visitors, and the inevitable adventures, we can see the making of a world-class naturalist, a young boy, not even in his teens, intrigued, in fact seduced, by the animals that surround him - lizards and snakes,

birds and amphibians - all observed with curiosity, recorded with accuracy, and often (to everyone's disapproval) transported home for further observation. This is really the story of a youngster who has the good fortune to discover his passion early in life, along with the ability to impart it to the reader with charm, humor, and infectious enthusiasm. Transmission Network Investment in Liberalized Power Markets Mohammad Reza Hesamzadeh, Juan Rosellón, Ingo Vogelsang, 2020-09-10 This book provides a systematic overview of transmission network investment in liberalized power markets. Recent government policies to increase the share of intermittent renewable power generation and other technological innovations present new theoretical as well as practical challenges for transmission investments. Written by experts with a background in both economics and engineering, the book examines the economic and technical fundamentals of regulated and merchant transmission investment, and includes case studies of transmission investment in a number of countries. The book is divided into four parts: Part 1 introduces the basic economics and engineering of transmission network investment, while Part 2 discusses merchant investment in the transmission network. Part 3 then examines transmission investment coordination and smart grids, and lastly, Part 4 describes practical experiences of transmission network investment in power market in various countries.

British Rail Class 20 Locomotives Pip

Dunn, 2016-03-31 The first of the English Electric Type 1 design, what we now know as the Class 20s, appeared in June 1957. With their distinctive 'chopper' engine sound, these single-cabbed locomotives soon gained a reputation for rugged reliability brought about by their simplicity and use of tried and tested components. British Rail Class 20 Locomotives looks back at the operations of these fine locomotives since 1957, covering their varied workings and duties, regional use and railtour operations. The book also covers the technical aspects and specifications of the locomotives, including liveries and detailing. This book will be of great interest to all railway and diesel loco enthusiasts. Fully illustrated with 195 colour photographs.
