**The Explorer's Roadmap to National-Socialism** Sarah K. Danielsson,2016-03-16 Whilst terms such as Lebensraum are commonly associated with National-Socialist ideology of the 1930s and 40s, ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics. Focusing on one of the most influential figures within this group, Sven Hedin, this is the first study that systematically connects the geographic community to the intellectual history of the development of National-Socialist ideology and genocidal practices. The book demonstrates how colonial, racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin. In Germany, Britain, France, and Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians. Whilst this influence was to become most visible within Hitler's Germany, the debates were not by any means restricted to or even originated in, Germany. Germany was the home of some of the most prominent geographers, but this scientific community had a tradition of international debate and exchange with especially British, French and Russian geographic societies and institutions. Many issues that were later discussed and championed by National-Socialist ideology were aired and debated in this international setting - raising important questions about the international character and impact of National-Socialism. Tracing the intellectual history of the international geographic community and its relationship to National-Socialism, this study provides an assessment of Hedin's close involvement with the Nazi elite as a culmination of decades of political and scientific work. In so doing the book uncovers a long ignored or overlooked important connection between exploration, geographers, and genocide.

**Expeditions Unpacked** Ed Stafford,2019-09-17 “A fascinating and unique look at these celebrated expeditions. Ed Stafford knows all too well how important an explorer’s kit can be and this brilliant book gives great insight into the role it plays.” —Sir Ranulph Fiennes In this unique and enthralling book, explorer and survivalist Ed Stafford curates 25 great expeditions through the lens of the kit these remarkable explorers took with them. In an environment where lack of preparation could mean certain death, the equipment carried, ridden and sailed into uncharted territories could mean the success or failure of an expedition. Was it simply a case of better provisions and preparation that helped Amundsen beat Scott to the South Pole? And how has the equipment taken to Everest changed since Hillary’s first ascent? Through carefully curated photographs and specially commissioned illustrations we can see at a glance the scale, style and complexity of the items taken into the unknown by the greatest explorers of all time, and the impact each item had on their journey. How it potentially saved a life, or was purely for comfort or entertainment, and how these objects of survival have evolved and adapted as science advances, and we plunge further into the extremes. Conquering fears and mountains, adversity and wild jungles, each item these explorers flew, pulled or hauled played a crucial role in their ambitious and dangerous missions to find out a little more about our world. Through each of these objects, we can gain a better understanding ourselves. Get an intimate view of these and more amazing expeditions: Roald Amundsen, race to the Pole: Norwegian expedition (snowshoes, Primus stove, piano, violin, gramophone...) Amelia Earhart, first woman to fly solo across the Atlantic Ocean (Bendix radio direction finder, parachutes, emergency life raft, rouge...) Tim Slessor, first overland from London to Singapore (machetes, crowbar, typewriter, Remington dry shaver, tea...) Nellie Bly, around the world in 72 days (Mumm champagne, accordion, silk waterproof wrap, dark gloves...)

**The A to Z of Sweden** Irene Scobbie,2010-05 Once part of the Kalmar Union-along with Denmark and Norway-the Kingdom of Sweden broke free in order to govern itself in the early 1500s, and for more than a century afterwards it was a force to be reckoned with. At its peak, it was twice the size that it is today, but with the secession of Finland in 1809 and the rise of Russia, Sweden changed its path and instead turned toward neutrality and a peaceful existence. Today, Sweden boasts a healthy economy, and it is an important member of the European Union, as well a major contributor to international activities. The A to Z of Sweden relates the history of Sweden through a chronology, a list of acronyms and abbreviations, an introductory essay, a bibliography, appendixes, and hundreds of cross-referenced dictionary entries on significant persons, events, and institutions, this dictionary provides information ranging from politics to economics, from education to religion, and from music to literature.

**My Life as an Explorer** Sven Hedin,1996-01-01 FROM THE SILK ROAD AND TIBET, THE EPIC MEMOIR OF A BESTSELLING ADVENTUREOver the course of three decades, Sven Hedin traveled the ancient Silk Road, discovered long-lost cities, mapped previously uncharted rivers, and saw more of the roof of the world than any European before him. This epic memoir captures the splendor of now-vanished civilizations, the excitement of unearthing ancient monuments, the chilling terrors of snow-clogged mountain passes, and the parching agony of the desert. A worldwide bestseller in the 1920s, it today introduces a new generation to a man of exceptional daring and accomplishment. The book is illustrated with 160 of Hedin's own drawings.

**The Ice Balloon** Alec Wilkinson,2012-01-24 In this grand and astonishing tale, Alec Wilkinson brings us the story of S. A. Andrée, the visionary Swedish aeronaut who, in 1897, during the great age of Arctic endeavor, left to discover the North Pole by flying to it in a hydrogen balloon. Called by a British military officer “the most original and remarkable attempt ever made in Arctic exploration,” Andrée’s expedition was followed by nearly the entire world, and it made him an international legend. The Ice Balloon begins in the late nineteenth century, when nations, compelled by vanity, commerce, and science, competed with one another for the greatest discoveries, and newspapers covered every journey. Wilkinson describes how in Andrée several contemporary themes intersected. He was the first modern explorer—the first to depart for the

Arctic unencumbered by notions of the Romantic age, and the first to be equipped with the newest technologies. No explorer had ever left with more uncertainty regarding his fate, since none had ever flown over the horizon and into the forbidding region of ice. In addition to portraying the period, *The Ice Balloon* gives us a brief history of the exploration of the northern polar regions, both myth and fact, including detailed versions of the two record-setting expeditions just prior to Andrée’s—one led by U.S. Army lieutenant Adolphus Greely from Ellesmere Island; the other by Fridtjof Nansen, the Norwegian explorer who initially sought to reach the pole by embedding his ship in the pack ice and drifting toward it with the current. Woven throughout is Andrée’s own history, and how he came by his brave and singular idea. We also get to know Andrée’s family, the woman who loves him, and the two men who accompany him—Nils Strindberg, a cousin of the famous playwright, with a tender love affair of his own, and Knut Fraenkel, a willing and hearty young man. Andrée’s flight and the journey, based on the expedition’s diaries and photographs, dramatically recovered thirty-three years after the balloon came down, along with Wilkinson’s research, provide a book filled with suspense and adventure, a haunting story of high ambition and courage, made tangible with the detail, beauty, and devastating conditions of traveling and dwelling in “the realm of Death,” as one Arctic explorer put it.

*Explorers and Scientists in China's Borderlands, 1880-1950* Denise M. Glover,Stevan Harrell,Charles F. McKhann,Margaret Byrne Swain,2012-09-01 The scientists and explorers profiled in this engaging study of pioneering Euro-American exploration of late imperial and Republican China range from botanists to ethnographers to missionaries. Although a diverse lot, all believed in objective, progressive, and universally valid science; a close association between scientific and humanistic knowledge; a lack of conflict between science and faith; and the union of the natural world and the world of nature people. *Explorers and Scientists in China's Borderlands* examines their cultural and personal assumptions while emphasizing their remarkable lives, and considers their contributions to a body of knowledge that has important contemporary significance. Essays are devoted to D. C. Graham, Joseph Rock, Reginald Farrer and George Forrest, Ernest Henry Wilson, Paul Vial, Johan Gunnar Andersson and Ding Wenjiang, and Friedrich Weiss and Hedwig Weiss-Sonnenburg. Richly illustrated with historic photographs, this collection reveals the extraordinary lives and times of these remarkable people.

Sparrman's Ethnographical Collection from James Cook's 2nd Expedition (1772-1775)** Jan Georg Karl Söderström,Anders Sparrman,1939 For biographical account of Anders Sparrman (1748-1820), a pupil of Linnaeus, see pp. 12-14. Saluting the Yellow Emperor Perry Johansson,2012-01-20 Saluting the Yellow Emperor tells the fascinating story of a group of Swedish scholars who rediscovered the pronunciation of the Chinese classics, buried Silk Road cities, and a Chinese Stone Age, while spiriting antiquities out of Asia.

*Among Herders of Inner Mongolia* Christel Braae,2017-10-20 This is a study of a unique collection of Inner Mongolian artifacts at the National Museum of Denmark. They are described, analyzed and presented in a catalogue of more than 800 items, documenting the daily life of pastoral society in and around the tent, in the herding of the animals, in caravan trade and in hunting, crafts, sports and games, and in ritual life. Information about the objects was obtained during two expeditions to Inner Mongolia in the 1930s led by the Danish author Henning Haslund-Christensen, who had many years' experience of travel and expedition life in Mongolia. This is also a detailed account of the expeditions; of the routes, means and measures, as well as the worries and hopes of the participants; of their struggles with scientific aspirations; and of the conditions for collecting against the backdrop of the Chinese civil war and the Japanese occupation. The First and Second Danish Expeditions to Central Asia took place in 1936-1937 and 1938-1939 respectively. These expeditions were the sole foreign parties with access to the area at the time, and therefore their members were among the few observers of Inner Mongolian pastoral society at a time and place for which information was, and still is, scant and fragmented. Hence, the material objects and data obtained are of great scientific importance in the documentation of the life and material culture of Inner Mongolian herders in the 1930s - the main subject of the present book.
