Languages for Automation Shi-Kuo Chang,2013-11-09 Two central ideas in the movement toward advanced automation systems are the office-of-the-future (or office automation system), and the factory of-the-future (or factory automation system). An office automation system is an integrated system with diversified office equipment, communication devices, intelligent terminals, intelligent copiers, etc., for providing information management and control in a distributed office environment. A factory automation system is also an integrated system with programmable machine tools, robots, and other process equipment such as new peripherals, for providing manufacturing information management and control. Such advanced automation systems can be regarded as the response to the demand for greater variety, greater flexibility, customized designs, rapid response, and 'Just-in-time' delivery of office services or manufactured goods. The economy of scope, which allows the production of a variety of similar products in random order, gradually replaces the economy of scale derived from overall volume of operations. In other words, we are gradually switching from the production of large volumes of standard products to systems for the production of a wide variety of similar products in small batches. This is the phenomenon of demassification of the marketplace, as described by Alvin Toffier in *The Third Wave*.

This Day in Game Show History- 365 Commemorations and Celebrations, Vol. 4: October Through December Adam Nedeff, Game shows have more stories to tell than they have washers and dryers to give away. *This Day in Game Show History* is a remarkable four-volume set chronicling the best stories—on camera and off—and the most noteworthy milestones for every day in the year. In this volume, you'll find out which game show used 50 gallons of whipped cream and 144 balloons per taping...the film star who credited *The Hollywood Squares* with launching his career...how a radio quiz show caused an outbreak of mumps among the New York Yankees...which game show host invented the first artificial heart...why Bob Barker personally disliked having beautiful women appear as contestants on his shows...and lots, lots more!

ZooKeeper Flavio Junqueira,Benjamin Reed,2013-11-18 Building distributed applications is difficult enough without having to coordinate the actions that make them work. This practical guide shows how Apache ZooKeeper helps you manage distributed systems, so you can focus mainly on application logic. Even with ZooKeeper, implementing coordination tasks is not trivial, but this book provides good practices to give you a head start, and points out caveats that developers and administrators alike need to watch for along the way. In three separate sections, ZooKeeper contributors Flavio Junqueira and Benjamin Reed introduce the principles of distributed systems, provide ZooKeeper programming techniques, and include the information you need to administer this service. Learn how ZooKeeper solves common coordination tasks Explore the ZooKeeper API's Java and C implementations and how they differ Use methods to track and react to ZooKeeper state changes Handle failures of the network, application processes, and ZooKeeper itself Learn about ZooKeeper's trickier aspects dealing with concurrency, ordering, and configuration Use the Curator high-level interface for connection management Become familiar with ZooKeeper internals and administration tools

Betty White on TV: From Video Vanguard to Golden Girl Wesley Hyatt, She made her TV debut in 1939 and was still on the medium eighty years later. Betty White earned her first Emmy nomination in 1951 and her last sixty-three years later. Her longevity in television earned her a spot in the Guinness Book of World Records. Betty White's incredible career encompasses seventeen regular roles, including *The Mary Tyler Moore Show*, *The Golden Girls*, and *Hot in Cleveland*. She also did thousands of guest shots on everything from *The Tonight Show* to *Password and Match Game* to *SpongeBob SquarePants*. Including interviews with many who worked with her, *Betty White on TV: From Video Vanguard to Golden Girl* recounts and celebrates the achievements of one of entertainment's most distinguished and beloved celebrities. Wesley Hyatt is the author of *The Carol Burnett Show Companion* (2016) and *Bob Hope on TV* (2018), both for Bear Manor Media. This is his tenth book.

Mastering Structured Data on the Semantic Web Leslie Sikos,2015-07-11 A major limitation of conventional web sites is their unorganized and isolated contents, which is created mainly for human consumption. This limitation can be addressed by organizing and publishing data, using powerful formats that add structure and meaning to the content of web pages and link related data to one another. Computers can understand such data better, which can be useful for task automation. The web sites that provide semantics (meaning) to software agents form the Semantic Web, the Artificial Intelligence extension of the World Wide Web. In contrast to the conventional Web (the Web of Documents), the Semantic Web includes the Web of Data, which connects things (representing real-world humans and objects) rather than documents meaningless to computers. Mastering Structured Data on the Semantic Web explains the practical aspects and the theory behind the Semantic Web and how structured data, such as HTML5 Microdata and JSON-LD, can be used to improve your site's performance on next-generation Search Engine Result Pages and be displayed on Google Knowledge Panels. You will learn how to represent arbitrary fields of human knowledge in a machine-interpretable form using the Resource Description Framework (RDF), the cornerstone of the Semantic Web. You will see how to store and manipulate RDF data in purpose-built graph databases such as triplestores and quadstores, that are exploited in Internet marketing, social media, and data mining, in the form of Big Data applications such as the Google Knowledge Graph, Wikidata, or Facebook's Social Graph. With the constantly increasing user expectations in web services and applications, Semantic Web standards gain more popularity. This book will familiarize you with the leading controlled vocabularies and ontologies and explain how to represent your own concepts. After learning the principles of Linked Data, the five-star deployment scheme, and the Open Data concept, you will be able to create and interlink five-star Linked Open Data, and merge your RDF graphs to the LOD Cloud. The book also covers the most important tools for generating, storing, extracting, and visualizing RDF data, including, but not limited to, Protégé, TopBraid Composer, Sindice, Apache Marmotta, Callimachus, and Tabulator. You will learn to implement Apache Jena and Sesame in popular IDEs such as Eclipse and NetBeans, and use these APIs for rapid Semantic Web application development. Mastering Structured Data on the Semantic Web demonstrates how to represent and connect structured data to reach a wider audience, encourage data reuse, and provide content that can be automatically processed with full certainty. As a result, your web contents will be integral parts of the next revolution of the Web.

Game Show Confidential Boze Hadleigh,2023-05-01 Game and quiz shows first started appearing on radio broadcasts in the 1930s, led by the CBS network's Professor Quiz, hosted by a man who was neither a professor nor even a college graduate, the first of several frauds that seemed to be endemic to the genre. Professor Quiz was followed by other such game shows as Uncle Jim's Question Bee and Ask It Basket, which in turn spawned successful box games for at-home play. The show Truth or Consequences made the transition from radio to television in the late 1940s and was so popular that a town in New Mexico was named for the show. Television proved to be the perfect platform for game shows since they were very popular and cheap to produce. Even in reruns today, the older shows still draw huge audiences. This book describes the evolution of the game show, its larger-than-life producers and hosts, as well as the scandals that have rocked it from time to time, including bloopers from such "adult" oriented shows as The Dating Game, The Newlywed Game, and Hollywood Squares. This is an entertaining and lively look at an American phenomenon whose popularity doesn't seem to be going away.

The Hosts, the Contestants, and Me The Evil Chocolate Cookie,2022-04-11 Game shows are special to me for many reasons. Some have had a deep, long-lasting effect on my life. In this book, I try to explain the shows, as well as how I feel about each of them and what they have done to shape me into the person I am.

Beau in the City Mu Ye,2020-01-01 In the months after his birthday, Zhang Tangzhi practiced kung fu with Liu Yuanzhi almost every day. He was no longer the same old scholar with the same silly skills. The Yexin Formula could help him quickly memorize all his movements, Liu Yuanzhi was indeed a strict lecturer. Zhang Tan was a very perceptive person, and after cultivating, his body's toughness was no longer a hindrance. His mastery of spiritual energy far surpassed Liu Yuanzhi's, so he was able to exchange blows with him for a long time before leaving. A hacker coincidentally stepped into the Cultivation Realm, stirring the wind and stirring the rain, earning both!
