In Case of Emergency Mahsa Mohebbi, 2021-11-30 In this prize-winning Iranian novel, a spoiled and foul-mouthed young woman looks to get high while her family and city fall to pieces. What do you do when the world is falling apart and you're in withdrawal? Disillusioned, wealthy, and addicted to opium, Shadi wakes up one day to apocalyptic earthquakes and a dangerously low stash. Outside, Tehran is crumbling: yuppies flee in bumper-to-bumper traffic as skaters and pretty boys rise up to claim the city as theirs. Cross-dressed to evade hijab laws, Shadi flits between her dysfunctional family and depressed friends—all in search of her next fix. Mahsa Mohebbi's groundbreaking novel about Iranian counterculture is a satirical portrait of the disaster that is contemporary life. Weaving together gritty vernacular and cinematic prose, *In Case of Emergency* takes a darkly humorous, scathing look at the authoritarian state, global capitalism, and the gender binary.

"I don't translate, I create!" Vanessa Drexler, 2016-01-05 "I don't translate, I create!" – This is the slogan of a translation agency called "Sternkopf Communications" located in Flöha, Germany. The translators at this translation agency are specialized in the field of marketing and perceive creativeness their daily bread. But what does this actually mean – I don't translate, I create? Undoubtedly, the translation of a text from one language into another is not an easy and straightforward process. On the contrary, the translator needs to invest much time and one or the other headache before a target text (TT) finally sounds natural, fluent, coherent and logical for the target audience. Different possible translation solutions will have to be considered, language as well as culture-related equivalents often are not easily at hand etc. Would it not be pleasant if machine translation (MT) was there to help with this process? Yet, despite the enormous importance of creativity in translating, computer-aided translation (CAT) tools are being used frequently by professional translators, not to replace but to support the translator in their daily business. CAT tools enable their users to translate in a more consistent way, since they search source texts for words, phrases or sentences that have already been translated before and stored in the TM so that the translator does not need to translate this text unit again 'from scratch'. Considering that this process brings about what could be called 'semi-mechanical' TTs, the use of CAT tools seems to stand in stark contrast to the importance of creativity mentioned above. Thus, the question arises whether CAT tools influence the creative energy of translators and, if this is the case, whether translators regard this influence as rather positive or negative. In this context, it is also important to consider which fields of expertise generally demand a high degree of uniformity/consistency in translations and which subject fields generally allow for a high degree of creative freedom. Accordingly, this paper pursues two related purposes. The first is to compare five CAT tools in their degree of usability. The second purpose is to identify translators' perspectives on uniformity and creativity in translations with the goal to shedding light on the question whether CAT tools generally tend to positively or negatively influence the translation process on a rather linguistic than technological basis.

The Way of the Linguist Steve Kaufmann, 2005-11 *The Way of the Linguist*, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book *The Way of the Linguist*, A language learning odyssey, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

The Translator Nina Schuyler, 2013-07-02 "Schuyler writes with piercing intelligence and real insight into the complex worlds of literary translation and human relationships." –Ellen Sussman, author of the New York Times bestselling novel *French Lessons* When renowned translator Hanne Schubert falls down a flight of stairs, she suffers from an unusual but real condition—the loss of her native language. Speaking only Japanese, a language learned later in life, she leaves for Japan. There, to Hanne's shock, the Japanese novelist whose work she recently translated confronts her publicly for sabotaging his work. Reeling, Hanne seeks out the inspiration for the author's novel—a tortured, chimerical actor, once a master in the art of Noh theater. Through their passionate, volatile relationship, Hanne is forced to reexamine how she has lived her life, including her estranged relationship with her daughter. In elegant and understated prose, Nina Schuyler offers a deeply moving and mesmerizing story about language, love, and the transcendence of family.

Basic Concepts and Models for Interpreter and Translator Training Daniel Gile, 2009-11-25 *Basic Concepts and Models for Interpreter and Translator Training* is a systematically corrected, enhanced and updated avatar of a book (1995) which is widely used in T&I training programmes worldwide and widely quoted in the international Translation Studies community. It provides readers with the conceptual bases required to understand both the principles and recurrent issues and difficulties in professional translation and interpreting, guiding them along from an introduction to fundamental communication issues in translation to a discussion of the usefulness of research about Translation, through discussions of loyalty and fidelity issues, translation and interpreting strategies and tactics and underlying norms, ad hoc knowledge acquisition, sources of errors in translation, T&I cognition and language availability. It takes on board recent developments as reflected in the literature and spells out and discusses links between practices and concepts in T&I and concepts and theories from cognitive psychology and psycholinguistics.

The Problems of Literary Translation Maria T. Sanchez, 2009 This volume examines the various linguistic and cultural problems which point towards the practical impossibility of conveying in one language exactly what was originally said in another. The author provides an exhaustive discussion of Spanish translations from English texts, including non-standard registers. Equivalence across languages, that most elusive of terms in the whole theory of translation, is discussed in terms of linguistic equivalence, textual equivalence, cultural equivalence and pragmatic equivalence. Other aspects studied include how translation has been perceived over the centuries, the differences and the similarities between a writer and a translator, plus a detailed examination of translation as process, all of which bring the problems of literary translation into perspective.

The Translator as Writer Susan Bassnett, Peter Bush, 2007-11-15 Over the last two decades, interest in translation around the world has increased beyond any predictions. International bestseller lists now contain large numbers of translated works, and writers from Latin America, Africa, India and China have joined the lists of eminent, bestselling European writers and those from the global English-speaking world. Despite this, translators tend to be invisible, as are the processes they follow and the strategies they employ when translating. *The Translator as Writer* bridges the divide between those who study translation and those who produce translations, through essays written by well-known translators talking about their own work as distinctive creative literary practice. The book emphasises this creativity, arguing that translators are effectively writers, or rewriters who produce works that can be read and enjoyed by an entirely new audience. The aim of the book is to give a proper prominence to the role of translators and in so doing to move attention back to the act of translating, away from more abstract speculation about what translation might involve.

Becoming a Translator Douglas Robinson, 2012 The process of translation. Drawing on experience: how being a translator is more than just being good at languages. Starting with people: social interaction as the first key focus of translator's experience of the world ...

Thinking Chinese Translation Valerie Pellatt, Eric T. Liu, 2010-06-10 *Thinking Chinese Translation* is a practical and comprehensive course for advanced undergraduates and postgraduate students of Chinese. *Thinking Chinese Translation* explores the ways in which memory, general knowledge, and creativity (summed up as 'schema') contribute to the linguistic ability necessary to create a good translation. A wealth of relevant illustrative material is presented, taking the reader through a number of different genres and text types of increasing complexity including: technical, scientific and legal texts journalistic and informative texts literary and dramatic texts. Each chapter provides a discussion of the issues of a particular text type based on up-to-date scholarship, followed by practical translation exercises. The chapters can be read independently as research material, or in combination with the exercises. The issues discussed range from the fine detail of the text, such as punctuation, to the broader context of editing, packaging and publishing translations. Major aspects of teaching and learning translation, such as collaboration, are also covered. *Thinking Chinese Translation* is essential reading for advanced undergraduate and postgraduate students of Chinese and translation studies. Fruit of the Drunken Tree Ingrid Rojas Contreras, 2019-06-04 "One of the most dazzling and devastating novels I've read in a long time...Readers of *Fruit of the Drunken Tree* will surely be transformed." --San Francisco Chronicle "Simultaneously propulsive and poetic, reminiscent of Isabel Allende...Listen to this new author's voice – she has something powerful to say." --Entertainment Weekly Seven-year-old Chula lives a carefree life in her gated community in Bogotá, but the threat of kidnappings, car bombs, and assassinations hover just outside her walls, where the godlike drug lord Pablo Escobar reigns, capturing the attention of the nation. When her mother hires Petrona, a live-in-maid from the city's guerrilla-occupied slum, Chula makes it her mission to understand Petrona's mysterious ways. Petrona is a young woman crumbling under the burden of providing for her family as the rip tide of first love pulls her in the opposite direction. As both girls' families scramble to maintain stability amidst the rapidly escalating conflict, Petrona and Chula find themselves entangled in a web of secrecy. Inspired by the author's own life,

Fruit of the Drunken Tree is a powerful testament to the impossible choices women are often forced to make in the face of violence and the unexpected connections that can blossom out of desperation.

The Translator's Turn Douglas Robinson,1991 Despite landmark works in translation studies such as George Steiner's *After Babel* and Eugene Nida's *The Theory and Practice of Translation*, most of what passes as con-temporary theory on the subject has been content to remain largely within the realm of the anecdotal. Not so Douglas Robinson's ambitious book, which, despite its author's protests to the contrary, makes a bid to displace (the deconstructive term is apposite here) a gamut of earlier cogitations on the subject, reaching all the way back to Cicero, Augustine, and Jerome. Robinson himself sums up the aim of his project in this way: I want to displace the entire rhetoric and ideology of mainstream translation theory, which ... is medieval and ecclesiastical in origin, authoritarian in intent, and denaturing and mystificatory in effect. -- from <http://www.jstor.org> (Sep. 12, 2014).

Beyond the Translator's Invisibility Peter J. Freeth,Rafael Treviño,2024-01-08 The question of whether to disclose that a text is a translation and thereby give visibility to the translator has dominated discussions on translation throughout history. Despite becoming one of the most ubiquitous terms in translation studies, however, the concept of translator (in)visibility is often criticized for being vague, overly adaptable, and grounded in literary contexts. This interdisciplinary volume therefore draws on concepts from fields such as sociology, the digital humanities, and interpreting studies to develop and operationalize theoretical understandings of translator visibility beyond these existing criticisms and limitations. Through empirical case studies spanning areas including social media research, reception studies, institutional translation, and literary translation, this volume demonstrates the value of understanding the visibilities of translators and translation in the plural and adds much-needed nuance to one of translation studies' most pervasive, polarizing, and imprecise concepts.

The Life of Marpa the Translator Tsangnyön Heruka,2018-03-27 Marpa the Translator, the eleventh-century farmer, scholar, and teacher, is one of the most renowned saints in Tibetan Buddhist history. In the West, Marpa is best known through his teacher, the Indian yogin Nâropa, and through his closest disciple, Milarepa. This lucid and moving translation of a text composed by the author of *The Life of Milarepa* and *The Hundred Thousand Songs of Milarepa* documents the fascinating life of Marpa, who, unlike many other Tibetan masters, was a layman, a skillful businessman who raised a family while training his disciples. As a youth, Marpa was inspired to travel to India to study the Buddhist teachings, for at that time in Tibet, Buddhism had waned considerably through ruthless suppression by an evil king. The author paints a vivid picture of Marpa's three journeys to India: precarious mountain passes, desolate plains teeming with bandits, greedy customs-tax collectors. Marpa endured many hardships, but nothing to compare with the trials that ensued with his guru Nâropa and other teachers. Yet Marpa succeeded in mastering the tantric teachings, translating and bringing them to Tibet, and establishing the Practice Lineage of the Kagyüs, which continues to this day.

Translator's Workbench Marianne Kugler,Khurshid Ahmad,Gregor Thurmair,2013-11-09 The Translator's Workbench Project was a European Community sponsored research and development project which dealt with issues in multi-lingual communication and documentation. This book presents an integrated toolset as a solution to problems in translation and documentation. Professional translators and teachers of translation were involved in the process of software development, starting with a detailed study of the user requirements and ending with several evaluation-and-improvement cycles of the resulting toolset. English, German, Greek, and Spanish are addressed in the contributions, however, some of the techniques are inherently language-independent and can thus be extended to cover other languages as well. Translation can be viewed broadly as the execution of three cognitive processes, and this book has been structured along these lines: • First, the translation pre-process, understanding the target language text at a lexico semantic level on the one hand, and making sense of the source language document on the other hand. The tools for the pre-translation process include access to electronic networks, conversion of documents from one format to another, creation of terminology data banks and access to existing data banks, and terminology dictionaries. • Second, the translation process, rendering sentences in the source language into equivalent target sentences. The translation process refers to the potential of conventional machine translation systems, like METAL, and of the statistically oriented translation memory.
