The Routledge Handbook of Social Care Work Around the World Karen Christensen, Doria Pilling, 2017-12-22 The Routledge Handbook of Social Care Work Around the World provides both a comprehensive and authoritative state-of-the-art review of the current research in this subject. It is the first handbook to cover social care work research from around the world, including both low- and middle-income countries as well as high income countries. Each of the 22 chapters are written by experts on long-term care services, particularly for older people and cover key issues and debates, based on research evidence, on social care work in a specific country. They look at perspectives of social care work from the macro level: the structural conditions for long-term care, including demographic challenges and the long-term care policy, the meso level: the level of provider organizations and intermediaries, and the micro level: views of care workers, care users, and unpaid informal carers. Furthermore, they discuss a number of topics central to discussions of care work including marketization, personalization policies, policy implementation under austerity, the provision of social care work whether through public services, or private arrangements, or mixed types, funding, the feminization of social care and the new role that technology, and robots can play in care work. By drawing together leading scholars from around the world, this book provides an up to the minute snapshot of current scholarship as well as signposting several fruitful avenues for future research. This book is both an invaluable resource for scholars and an indispensable teaching tool for use in the classroom and will be of interest to students, academics, social workers, social policy-makers and human service professionals.

Baltic-Black Sea Regionalisms Olga Bogdanova, Andrey Makarychev, 2019-10-01 This edited volume focuses on various forms of regionalism and neighborhoods in the Baltic-Black Sea area. In the light of current reshaping of borderlands and new geopolitical and military confrontations in Europe's eastern margins, such as the annexation of Crimea and the war in Donbas, this book analyzes different types and modalities of regional integration and region-making from a comparative perspective. It conceptualizes cooperative and conflictual encounters as a series of networks and patchworks that differently link and relate major actors to each other and thus shape these interconnections as domains of inclusion and exclusion, bordering and debordering, securitization and desecuritization. This peculiar combination of geopolitics, ethnopolitics and biopolitics makes the Baltic-Black Sea trans-national region a source of inspiring policy practices, and, in the light of new security risks, a matter of increased concern all over Europe. The contributors from various disciplines cover topics such as cultural and civilizational spaces of belonging and identity politics, the rise of right-wing populism, region building under the condition of multiple security pressures, and the influence and regional strategies of different external powers, including the EU, Russia, and Turkey, on cross- and trans-regional relations in the area.

Remembering Katyn Alexander Etkind, Rory Finnin, Uilleam Blacker, Julie Fedor, Simon Lewis, Maria Mäklsoo, Matilda Mroz, 2013-04-24 Katyn- the Soviet massacre of over 21,000 Polish prisoners in 1940 - has come to be remembered as Stalin's emblematic mass murder, an event obscured by one of the most extensive cover-ups in history. Yet paradoxically, a majority of its victims perished far from the forest in western Russia that gives the tragedy its name. Their remains lie buried in killing fields throughout Russia, Ukraine and, most likely, Belarus. Today their ghosts haunt the cultural landscape of Eastern Europe. This book traces the legacy of Katyn through the interconnected memory cultures of seven countries: Belarus, Poland, Russia, Ukraine, and the Baltic States. It explores the meaning of Katyn as site and symbol, event and idea, fact and crypt. It shows how Katyn both incites nationalist sentiments in Eastern Europe and fosters an emerging cosmopolitan memory of Soviet terror. It also examines the strange impact of the 2010 plane crash that claimed the lives of Poland's leaders en route to Katyn. Drawing on novels and films, debates and controversies, this book makes the case for a transnational study of cultural memory and navigates a contested past in a region that will define Europe's future.

Intermarium Marek Jan Chodakiewicz, 2017-09-08 History and collective memories influence a nation, its culture, and institutions; hence, its domestic politics and foreign policy. That is the case in the Intermarium, the land between the Baltic and Black Seas in Eastern Europe. The area is the last unabashed rampart of Western Civilization in the East, and a point of convergence of disparate cultures. Marek Jan Chodakiewicz focuses on the Intermarium for several reasons. Most importantly because, as the inheritor of the freedom and rights stemming from the legacy of the Polish-Lithuanian/Ruthenian Commonwealth, it is culturally and ideologically compatible with American national interests. It is also a gateway to both East and West. Since the Intermarium is the most stable part of the post-Soviet area, Chodakiewicz argues that the United States should focus on solidifying its influence there. The ongoing political and economic success of the Intermarium states under American sponsorship undermines the totalitarian enemies of freedom all over the world. As such, the area can act as a springboard to addressing the rest of the successor states, including those in the Caucasus, Central Asia, and the Russian Federation. Intermarium has operated successfully for several centuries. It is the most inclusive political concept within the framework of the Commonwealth. By reintroducing the concept of the Intermarium into intellectual discourse the author highlights the autonomous and independent nature of the area. This is a brilliant and innovative addition to European Studies and World Culture.

Migrants as Agents of Change Izabela Grabowska, Michał P. Garapich, Ewa Jaźwińska, Agnieszka Radziwinowiczówna, 2016-11-09 This book offers a unique and innovative way of looking at the paradoxical consequences of human mobility. Based on a three-year transnational multi-sited longitudinal research project, it demonstrates that not all migrants acquire, transfer and implement social remittances in the same way. Whilst the circulation of ideas, norms and practices is an important aspect of modernity, acts of resistance, imitation and innovation mean that whilst some migrants become ordinary agents of social change in their local microcosms, others may contest that change. By putting this individual agency centre stage, the authors trace how social remittances are evolving, and the ambiguous impact that they have on society. This thought-provoking work will appeal to students and scholars of sociology, geography and anthropology.

Obyczaje polskie. Wiek XX w krótkich hasłach Małgorzata Szpakowska, 2008-07-01 Pamiętacie pralkę Franię? Może nawet stoi jeszcze gdzieś w piwnicy, ale czy zdajecie sobie sprawę, że jej pojawienie się przyspieszyło rozpad mikrostruktury społecznej? Kiedyś pranie angażowało pół wsi, później całą rodzinę, dzisiaj – wystarczy jedna osoba. Albo sphuczka klozetowa – wynaleziona pod koniec XVI wieku długo nie mogła zagościć w łazienkach, gdyż budziła obawy natury ekonomicznej, a nawet... historiozoficznej. A czy kiedy bierzecie tabletkę przeciwbólową (statystycznie Polacy kupują ich najwięcej na świecie), przeszło wam przez myśl, że zmiana, którą spowodowały środki przeciwbólowe, ma charakter egzystencjalny? Autorki opisują zjawiska, przedmioty i urządzenia, które najmocniej odcisnęły swoje piętno na naszych codziennych zachowaniach. Oprócz wspomnianych wyżej haseł pojawiają się też takie jak topless, rozwód, przedszkole, depilacja, świadome macierzyństwo czy ogródki działkowe. Podstawę badań stanowi nie tylko codzienna obserwacja, lecz także literatura piękna, prasa ilustrowana, film czy telewizja... Jest to fascynujące, napisane z humorem i wielką erudycją świadectwo przemian, które się dokonały w XX wieku.

Language Planning in the Post-Communist Era Ernest Andrews, 2018-02-01 This volume provides an in-depth analysis of the attempts of language experts and governments to control language use and development in Eastern Europe, Eurasia and China through planned activities generally known as language planning or language policy. The ten case studies presented here examine language planning in China, Russia, Tatarstan, Central Asia, Ukraine, Lithuania, Latvia, Poland, Slovakia and the Czech Republic, and focus in particular on developments and disputes that have occurred since the ‘fall of communism’ and the emergence of a new order in the late 1980s. Its authors highlight the dominant issues with which language planning is invariably intertwined. These include power politics, tensions between ‘official language’ and ‘minority languages’, and the effects of a country’s particular political, social, cultural and psychological environment. Offering a detailed account of the socio-political and ideological developments that underlie language planning in these regions, this book will provide a valuable resource for students and scholars of linguistics, cultural studies, political science, sociology and history.

Poland's Memory Wars Jo Harper, 2018-10-20 This volume of essays and interviews by Polish, British, and American academics and journalists provides an overview of current Polish politics for both informed and non-specialist readers. The essays consider why and how PiS, Law and Justice, the party of Jarosław Kaczyński, returned to power, and the why and how of its policies while in power. They help to make sense of how “history” plays a key role in Polish public life and politics. The descriptions of PiS in Western media tend to rework old stereotypes about Eastern Europe that had lain dormant for some time. The book addresses the underlying question whether PiS was simply successful in understanding its electorate, and just helped Poland to revert to its normal state. This new Normal seems quite similar to the old one: insular, conservative, xenophobic, and statist. The book looks at the current struggle between one ‘Poland’ and another; between a Western-looking Poland and an inward-looking Poland, the former more interested in opening to the world, competing in open markets, and working within the EU, and the latter more concerned with holding onto tradition. The question of illiberalism has gone from an ‘Eastern’ problem (Russia, Turkey, Hungary, etc.) to a global one (Brexit and the U.S. elections). This makes the very specific analysis of Poland’s illiberalism applicable on a broader scale.

The Global North-South Atlas Marcin Wojciech Solarz, 2019-10-18 This innovative atlas deconstructs the contemporary image of the North-South divide between developed and underdeveloped countries which was established by the 1980 Brandt Line, and advocates the need for the international community to redraw the global map to be fit for the 21st century. Throughout the book a range of colorful maps and charts graphically demonstrate the ways in which the world has changed over the last 2,000 years. The atlas first analyzes the genesis and characteristics of the Brandt Line’s North-South divide, before going on to discuss its validity through the centuries, especially before and after 1980, and demonstrating the many definitions and philosophies of development that exist or may exist, which make it difficult to define a single notion of a Global North and South. The book concludes by proposing new schemes of categorization between developed and developing countries which might better fit our

contemporary global society. This book will serve as a perfect textbook for students studying global divisions within geography, politics, economics, international relations, and development departments, as well as being a useful guide for researchers, and for those working in NGOs and government institutions.

Radom Regional Railway Tomasz Gęsiak, The outline of the Radom Regional Railway was created in response to the question whether the railway in Radom could be used as an urban railway. Ultimately, it turned out that its potential was much wider than just the city area, encompassing existing regional connections. That is why the RRR Concept was created, which assumes the development of regional connections with the center of the region, i.e. Radom. The publication is divided into seven parts so that the reader can better understand the railway infrastructure in Radom. The first three chapters contain information collected by the author as starting material for further analyzes and assumptions. Chapter four presents current solutions used in suburban railways around the world, including in Poland, especially in larger provincial centers. Chapters five and seven present the main assumptions of the Radom Commuter Railway as a project ready for implementation. The fifth part focuses on the role of the city of Radom as the natural center of the region.
