The Inequality of COVID-19 Eric E. Otenyo, Lisa J. Hardy, 2021-10-14 The Inequality of COVID-19: Immediate Health Communication, Governance and Response in Four Indigenous Regions explores the use of information, communication technologies (ICTs) and longer-term guidelines, directives and general policy initiatives. The cases document implications of the failure of various governments to establish robust policies to mitigate the spread of COVID-19 in a sample of advanced and low-income countries. Because the global institutions charged with managing the COVID-19 crisis did not work in harmony, the results have been devastating. The four Indigenous communities selected were the Navajo of the southwest United States, Siddi people in India, Aboriginal and Torres Strait Islander peoples of Australia and the Maasai in East Africa. Although these are all diverse communities, spread across different continents, their base economic oppression and survival from colonial violence is a common denominator in

hypothesizing the public health management outcomes. However, the research reveals that national leadership and other incoherent pandemic mitigation policies account for a significant amount of the devastation caused in these communities. Explores examples of pandemic mitigation practices in indigenous communities Provides case studies of importance of ICTs in health care in 21st century pandemic management protocols Presents real policy data collected from different continents from early days through the first year of the global pandemic

ENTERTAINMENT MANAGEMENT Prabhu TL, In all areas of business, there are some terms you're never truly sure you know the definition of. However, when it comes to event management, the definition is easy. At its core, event management is the process of planning an event. This is any type of event, whether hosted in-person, virtually or hybrid. It's synonymous with event planning and meeting planning. Just like those other terms, the scope of each project and the nitty-gritty details vary depending on the industry, company size, and more. So, what is event management? Event Management is Event Planning Event planning goes by many different names. Some event planners are called administrative assistants, some are called event coordinators, and others are called event technologists. What do all of these titles have in common? The individuals have some hand in planning an event. Whether the events are internal or external, large or small, in-person or virtual, they all have to be planned. Virtual Event Management In today's new environment, we have had to learn how to manage not only our in-person events but our virtual programs as well. Virtual event management requires the same steps as managing your in-person event, but with the added challenge of making sure that your content is twice as captivating. While in-person events have the added bonus of travel, networking, and free food, a virtual event largely relies on its content to keep attendees engaged. When managing a virtual event, make sure that your speakers are prepared to present their content virtually, and that your content is interesting and succinct. Different Aspects of Event Management Building the Perfect Event It starts simply. A theme. A plan. A goal. Your event has a purpose from the beginning, which will drive content, speakers, and the venue. Next, it's time to set up the basics. You have to build a branded event website that entices visitors to attendee your event. Nowadays, it's easier than ever to build a beautifully designed website, just by understanding Event Website Basics. Then, you'll need secure payment processing so attendees can pay for events easily. Promotion Across Channels with Automation If no one knows about your event, how will they register? That's why promotion is so important. Check out The Best Ways to Promote Your Event for inspiration. Targeted email marketing is a great way to promote your events when you have a vast database. Other ways to promote? Social media continues to be one of the best free promotional channels. Managing Attendee Information and Communication The purpose of the event is always to make connections. Event management doesn't just involve choosing linens or the right virtual technology provider but also managing contacts as well as you can. During the event, you'll gather leads that will go to sales. These leads will be critical when it comes to proving your Event ROI. Measuring Your Success to Prove Event ROI Event management doesn't end when the event does. Over the course of the entire event, it's important to prove success and identify areas of improvement. Data gained throughout the process will help you do this. Live polling is a great way to find out how attendees felt about the event. There's Tech for That Event management is about pulling together an incredible experience, facilitating connections, adding leads to sales pipeline, and proving success. It's a difficult job that involves spinning an endless number of plates and

working around the clock to create an unforgettable moment for attendees. And, it's one that can be made a little easier by taking advantage of technology, especially when you look to plan a virtual event or a hybrid event. While many planners rely on sticky notes and spreadsheets, there's tech out there that will save hours and take events to the next level. Find out what event tech can help you succeed in *How to Select the Right Event Management Technology*.

Indian Multinationals in the World Economy Jaya Prakash Pradhan, 2008 Indian multinationals have been active in the world economy since early 1960s. However, their number and scale of operation have grown significantly in the last fifteen years or so. In the face of increasing global competition unleashed by extensive liberalization measures, Indian firms have adopted the strategy of outward foreign direct investment (OFDI) as an integral part of their business strategies. By undertaking greenfield OFDI and brownfield OFDI for acquiring foreign companies, Indian firms are enhancing their potential for growth and global competitiveness. Consequently India has emerged as a major developing source country of FDI and Indian multinationals are likely to affect world development in several ways. The book analyses the phenomenon of Indian multinationals from both macro level factors and firm-level corporate strategies and examines its implications for India and host countries. A detailed investigation of Indian overseas investment flows and stocks from sectoral, regional, ownership and motivational perspectives provides a rigorous long-run coverage of Indian multinational firms from 1970s onwards. The role of innovation, entrepreneurial skills, scale of business, productivity, and the role of government policies, received critical attention in explaining the emergence of Indian multinationals. The comprehensive quantitative and case studies approach offers valuable insights into the behaviour and impacts of these new global actors on home and host countries. This book offers a number of lessons to home country, host countries, and Indian enterprises becoming multinationals. With the growing global interest from policy makers, business practitioners, researchers, and students in Indian multinationals, this book would serve as an important and timely reading for all of them.

The Regulation of Product Standards in World Trade Law Ming Du, 2020-11-12 This monograph has two central purposes. The first is to provide a critical analysis of how governmental, private and hybrid product standards are regulated in the GATT/WTO legal framework. The second purpose is to explore - both positively and normatively - the impact that WTO disciplines may have on the composition, function and decision-making process of various standard-setting bodies through the lens of a series of selected case studies, including: the EU eco-labelling scheme; ISO standards; and private standards such as the FSC. The book analyses what role, if any, the WTO may play in making product standards applied in international trade embody not only technological superiority but also substantive and procedural fairness such as deliberation, representativeness, openness, transparency, due process and accountability. Whilst it has been long recognised that voluntary product standards drawn up by both governmental and non-governmental bodies can in practice create trade barriers as serious as mandatory governmental regulations, a rigorous and systematic inquiry into the boundary, relevance and impact of WTO disciplines on product standards is still lacking. Providing a lucid interpretation of the relevant WTO rules and cases on product standards, this book fills this significant gap in WTO law literature. Definitive and comprehensive, this is an essential reference work for scholars and practitioners alike.

The book is structured into three main sections with several chapters each, reflecting the authors' individual, real-life experiences. It explores ways to improve oncology education and scientific training, how to set up and run a clinical research facility ethically and efficiently in low- and middle-income settings, addressing the challenges that the workforce encounters in the real world. The main challenges of today's oncologists seem to be the ever-growing patient care and administrative workload and the risk of burn-out. What are the best strategies to maintain a healthy work-life for the benefit of the patients, the physicians and society, taking into account the

different needs, depending on factors like peace, social and gender equality? This book addresses oncologists all over the world and their allies throughout the associated industries to highlight the importance of shared and sustainable education, clinical research and global cancer care.
