Seeing in the Dark Mr.Andrew Tiffin,2016-03-08 Macroeconomic analysis in Lebanon presents a distinct challenge. For example, long delays in the publication of GDP data mean that our analysis often relies on proxy variables, and resembles an extended version of the “nowcasting” challenge familiar to many central banks. Addressing this problem—and mindful of the pitfalls of extracting information from a large number of correlated proxies—we explore some recent techniques from the machine learning literature. We focus on two popular techniques (Elastic Net regression and Random Forests) and provide an estimation procedure that is intuitively familiar and well suited to the challenging features of Lebanon’s data.

Lebanon Esther Bassil Sleilati,2017 This book sheds light on diverse aspects of a country thus far renowned for its various forms of instability and turmoil by portraying it from very different angles. It begins by underscoring how the instructors' emotional intelligence is paramount for maintaining student satisfaction and retention in a market as competitive as that of Lebanon. It then recognizes the impact of social pressure on e-Book adoption in Lebanon and investigates the challenges and opportunities of attaining such goals through the instigation of e-government technology in a developing country. It then delves into female entrepreneurial motivations by inspecting the influence of age, which is a neglected facet of entrepreneurship research. Its main motivation is the salience of underrepresentation of women in entrepreneurial ranks even in the most developed markets, although the number of female entrepreneurs in Lebanon is surprising. After that, it points to two approaches for examining leadership, the first focusing on the leader as an individual while contemplating the qualities and capabilities of leaders, whereas the other contests that an individual leader initiates a general understanding of leadership by assuming that leadership is the technique used by this individual and not his/her position. Always retaining the HR spirit, this book studies the connection between investment in talent retention practices in Lebanese organizations and the line managers' accountability of affective commitment. The interest mainly lies in the fact that Lebanon symbolizes an interesting economic and cultural context from which talent has been depleted, resulting in a greater need to instigate talent retention practices to preserve and retain this talent. It then moves to exploring the impact of coaching on employee commitment and learning, and afterwards evaluates its influence on performance in the Lebanese banking sector. One way of improving performance among firms is to actively utilize their tacit knowledge capital. So, it critically examines tacit knowledge and effectuation to reveal if the interaction can lead to favorable outcomes in a firm's innovative capability. Another way to gain a competitive advantage is for organizations to care for their customers by educating them to secure adequate decision making, thus leading to the study of the impact of consumer education on financial consumer protection, as well as looking into the controversial relationship between corporate reputation and customer satisfaction, and the mediating role of perceived service quality. It then identifies the effect of a business model design on customer satisfaction, which singles out corporate performance in the high-tech channel innovation framework, and proves the effect of information systems by helping healthcare employees while performing their daily tasks, especially after the increase of their work load with the influx of Syrian refugees to Lebanon. It then concludes by investigating the trends and indicators related to national output, inflation, unemployment, national debt, exchange rates, balance of payments, poverty and human development. In sum, this book proves that Lebanon is moving away from the stereotypical image it once had and towards a country much like the one that Lebanese people have been dreaming of restoring.

Python Challenge! Pm Heathcote,2021-04-05 Learn to program fast in 155 challenges, 54 examples and 85 pages This book is a 'gamified' approach to Python, aimed at supporting GCSE and KS3 students, with complete coverage of the GCSE programming requirements. There's no substitute for practice when it comes to learning a new skill! Python syntax is simple to learn, but becoming an expert in writing programs to solve different kinds of problems takes a bit longer. That's why this book has a short explanation of each new statement or technique, followed by one or more examples and then loads of practice challenges. Some of the challenges will take you only a minute or two, using the Python Interactive window to try out new statements and get immediate results. As you get further into the book, you will be challenged to write programs to perform different kinds of tasks - for example to find the results of a calculation, write a program for a simplified cash machine, sort a list of items into alphabetical order, or to record data in a text file to be read, formatted, and printed. The programming solutions to some challenges have been helpfully simplified for an inexperienced programmer to modify rather than to write from scratch. This builds your confidence in problem-solving. That's why 35 challenges consist of partially written programs for you to complete.

Blockchain Applied Stephen Ashurst,Stefano Tempesta,2021-09-07 Blockchain is the popular name given to the exciting, evolving world of distributed ledger technology (DLT). Blockchains offer equitable and secure access to data, as well as transparency and immutability. Organisations can decide to use blockchain to upgrade whatever ledgers they are currently deploying (for example, relational databases, spreadsheets and cumbersome operating models) for their data and technology stack in terms of books and records, transactions, storage, production services and in many other areas. This book describes the applied use of blockchain technology in the enterprise world. Written by two expert practitioners in the field, the book is in two main parts: (1) an introduction to the history of, and a critical context explainer about, the emergence of blockchain written in natural language and providing a tour of the features, functionality and challenges of blockchain and DLT; and (2) a series of six applied organisational use cases in (i) trade finance, (ii) healthcare, (iii) retail savings & investments, (iv) real estate, (v) central bank digital currencies (CBDC) and (vi) fund management that offer the reader a straightforward, easy-to-read comparison between 'old world' technology (such as platforms, people and processes) versus what blockchain ledgers offer to enterprises and organisations in terms of improved efficiency, performance, security and access to business data. Blockchain is sometimes tainted by association to Bitcoin, Onecoin and others. But as cryptocurrencies and stock markets continue to rise and fall with volatility and the world economy emerges changed by coronavirus, working from home and the threat of inflation, many enterprises, organisations and governments are looking again at the powerful features of blockchain and wondering how DLT may help them adapt. This book is an ideal introduction to the practical and applied nature of blockchain and DLT solutions for business executives, business students, managers, C-suite senior leaders, software architects and policy makers and sets out, clearly and professionally, the benefits and challenges of the actual business applications of blockchain.

UAT Defined Rob Cimperman,2006-11-28 This is the eBook version of the printed book. This digtial Short Cut provides a concise and supremely useful guide to the emerging trend of User Acceptance Testing (UAT). The ultimate goal of UAT is to validate that a system of products is of sufficient quality to be accepted by the users and, ultimately, the sponsors. This Short Cut is unique in that it views UAT through the concept that the user should be represented in every step of the software delivery lifecycle—including requirements, designs, testing, and maintenance--so that the user community is prepared, and even eager, to accept the software once it is completed. Rob Cimperman offers an informal explanation of testing, software development, and project management to equip business testers with both theory and practical examples, without the overwhelming details often associated with books written for professional testers. Rather than simply explaining what to do, this resource is the only one that explains why and how to do it by addressing this market segment in simple, actionable language. Throughout the author’s considerable experience coordinating UAT and guiding business testers, he has learned precisely what testers do and do not intuitively understand about the software development process. UAT Defined informs the reader about the unfamiliar political landscape they will encounter. Giving the UAT team the tools they need to comprehend the process on their own saves the IT staff from having to explain test management from the beginning. The result is a practice that increases productivity and eliminates the costs associated with unnecessary mistakes, tedious rework, and avoidable delays. Chapter 1 Introduction Chapter 2 Defining UAT-What It Is...and What It Is Not Chapter 3 Test Planning-Setting the Stage for UAT Success Chapter 4 Building the Team-Transforming Users into Testers Chapter 5 Executing UAT-Tracking and Reporting Chapter 6 Mitigating Risk-Your Primary Responsibility

The Veiled Web Catherine Asaro,2022-09-27 “A near-future layering of East and West, of religion and technology . . . and of love and its loss—all woven into an intriguing tapestry.” —Diana Gabaldon, bestselling author of the Outlander series Winner of the Homer Award for Best Science Fiction Novel A renowned prima ballerina, Lucia del Mar is far more comfortable expressing herself through dance than with words. Shy and

introverted, she spends most of her spare time on her laptop. Still, Lucia’s job forces her out of her comfort zone, which is how she winds up at a White House reception where she meets Rashid al-Jazari, the wealthy CEO of a multinational corporation. Although attracted to him, Lucia can’t help but feel awkward and shrugs off their encounter as a one-time event. Not realizing he feels a similar attraction, she never imagines Rashid will seek out her performances; he is the last person she expects to see when her dance company travels to Italy. Their reunion takes an even more unexpected turn when they’re both drugged and kidnapped. Although they overcome their abductors, it leaves them stranded in North Africa. For her own safety, Lucia agrees to marry Rashid, at least for the time being. As she recovers at his family compound in Morocco, reeling from their brush with danger, she struggles to fit into a culture she knows nothing about—and to deal with her growing feelings for Rashid. At the same time, at his secret office there, Rashid is developing a dramatic leap forward in artificial intelligence combined with virtual reality. He finds himself plunged into a fight for control of his work against powerful international forces, and caught in the middle, Lucia is swept into that battle . . . “A terrific novel, ripping a path from today’s headlines to tomorrow’s realities.” —Robert J. Sawyer, Nebula Award-winning author

Higher Education Management Warner, David,Palfreyman, David,1996-08-01 Many higher education institutions are like small towns, meeting the needs of their members by providing not only specialist teaching and research activities but also residential accommodation, catering, telecommunications, counselling, sports facilities and so on. The management of these institutions is very complex, requiring both generalist and specialist knowledge and skills; and the move to formal strategic planning means that it is no longer acceptable for higher education managers to be aware only of their own relatively narrow areas of expertise. All new managers would benefit from an holistic perspective on managing a whole institution. As such individuals are promoted, such 'helicopter vision' becomes a precondition of their and their institution's success. Higher Education Management provides: * the first comprehensive account of non-academic higher education management. * contributions from distinguished practitioners of university management. * a key resource for all aspiring, trainee and practising managers in higher education.
