**The Forgotten Planet** Murray Leinster, 2023-12-15 A planet had been seeded for life by humans, first with microbes and later with plants and insects. A third expedition, intended to complete the seeding with animals, never occurred. Over the millennia the insects and plants grew to gigantic sizes. The action of the novel describes the fight for survival by descendants of a crashed spaceship as they battle wolf-sized ants, flies the size of chickens, and gigantic flying wasps. Interestingly, this novel is a combination of three different science-fiction tales The Mad Planet, The Red Dust and Nightmare Planet which were heavily revised by Murray Leinster to form a coherent story. This edition thus brings to you both the versions of this famous sci-fi story in one convenient edition for your ultimate pleasure! **The Forgotten Planet** Murray Leinster, 2018-02-24 Beneath dense gray clouds through which no sun shone lay a forgotten planet. It was a nightmare world of grotesque and terrifying animal-plant life. Gigantic beetles, spiders, bugs and ants filled the putrid, musty earth - ready to kill and devour anything in sight. There were men amidst this horror - men who cringed and ran from the ravening monsters and huddled in the mushroom forests at night. Burl was one of these creatures.

But one day inspiration hit Burl. He would find a weapon - he would fight back. And with this idea the first step was taken in man's most desperate flight for freedom in this most horrible of all worlds. But it was only a first step.

The Forgotten Planet Sewell Peaslee Wright, 2010-10-01 I have been asked to record, plainly and without prejudice, a brief history of the Forgotten Planet. That this record, when completed, will be sealed in the archives of the Interplanetary Alliance and remain there, a secret and rather dreadful bit of history, is no concern of mine. I am an old man, well past the century mark, and what disposal is made of my work is of little importance to me. I grow weary of life and living, which is good. The fear of death was lost when our scientists showed us how to live until we grew weary of life. But I am digressing - an old man's failing. The Forgotten Planet was not always so named. The name that it once bore had been, as every child knows, stricken from the records, actual and mental, of the Universe. It is well that evil should not be remembered. But in order that this history may be clear in the centuries to come, my record should go back to beginnings. So far as the Universe is concerned, the history of the Forgotten Planet begins with the visit of the first craft ever to span the space between the worlds: the crude, adventuresome Edorn, whose name, as well as the names of the nine Zenians who manned her, occupy the highest places in the roll of honor of the Universe.

These selected paragraphs distill the contents and give you a quick look inside The Forgotten Planet: Look inside the book: The human beings had forgotten not only their ancestors' ship, but very nearly everything their ancestors had brought to this world: the use of metals, the existence of fire, and even the fact that there was such a thing as sunshine. ...Sitting dismally upon his fungus raft, floating in midstream, an incongruous figure of pink skin and luridly-tinted loin-cloth, with a greasy dead fish beside him, he was filled with a panicky anguish because the river carried him away from the one girl of his tiny tribe whose glances roused a commotion in his breast. About Murray Leinster, the Author: When the pulp magazines began to diversify into particular genres in the 1920s, Leinster followed suit, selling jungle stories to Danger Trails, westerns to West and Cowboy Stories, detective stories to Black Mask and Mystery Stories, horror stories to Weird Tales, and even romance stories to Love Story Magazine under the pen name Louisa Carter Lee. Leinster's first science fiction story, 'The Runaway Skyscraper', appeared in the February 22, 1919 issue of Argosy, and was reprinted in the June 1926 issue of Hugo Gernsback's first science fiction magazine, Amazing Stories.

**Year 7007 Fable Of A Forgotten Planet** A. K. Vijayakumar, 2006-04-01 A superman who flies across the whole world and breaks the rocks with his naked hands or a human being with a highly developed mind and consciousness bordering on to telepathy. A K Vijaykumar's debutant science fiction 'year 7007 - Fable of a Forgotten Planet' answers this question. Writer A K Vijaykumar, with a very engaging story explores the thesis propounded by Sri Aurobindo that the next step in the evolutionary ladder would be in the realm of spirit - specifically, in the acquisition of powers like telepathy. Year 7007 is a great page turner suspense and a thought provoking mesmerizing tale set on a stage thousands of years into the future as the name suggests. The story addresses the central mystery that the mind is much more than an assembly of neurons and neural circuitry. This is specially true of those who accept spiritual tenets, a taut psychological fiction, Year 7007 is a superb blend of edge-of-your-seat suspense and thought provoking commentary on the direction of scientific research and human limitations. The back drop of this book takes us into a world where, humankind has spread out and colonized space. The march of science and technology has conquered the disease, aging-and even death. The species has established itself on countless millions of worlds. There is, however, a lone exception, largely unnoticed at the fringe of this swarming human hive. The planet zenmahail, that sinks gradually into oblivion. When finally rediscovered through an

accident, does not seem too willing to be brought into the comity of worlds.

*The Mad Planet* Murray Leinster, 2021-04-25 'The Mad Planet' is a science-fiction short story written by American writer Murray Leinster. The story centers on a man who finds himself in the middle of a slowly melting Earth due to high CO<sub>2</sub> concentration. This eventually led to the awakening of giant insect creatures bent on completely wiping off humanity.
