International Blogging Adrienne Russell, Nabil Echchaibi, 2009 Bloggers around the world produce material for local, national and international audiences, yet they are developing in ways that are distinct from the U.S. model. Through case studies of blogs written in English, Chinese, Arab, French, Russian, and Hebrew, this book explores the way blogging is being conceptualized in different cultural contexts. The authors move beyond the most highly trafficked sites to shed light on larger developments taking place online, calling into question assumptions that form the foundation of much of what we read on blogging and, by extension, on global amateur or do-it-yourself media. This book suggests a more nuanced approach to understanding how blogospheres serve communication needs, how they exist in relation to one another, where they exist apart as well as where they overlap, and how they interact with other forms of communication in the larger media landscape.

Uses of Blogs Joanne Jacobs, 2006 Textbook

Blog Theory Jodi Dean, 2013-04-17 Blog Theory offers a critical theory of contemporary media. Furthering her account of communicative capitalism, Jodi Dean explores the ways new media practices like blogging and texting capture their users in intensive networks of enjoyment, production, and surveillance. Her wide-ranging and theoretically rich analysis extends from her personal experiences as a blogger, through media histories, to newly emerging social network platforms and applications. Set against the background of the economic crisis wrought by neoliberalism, the book engages with recent work in contemporary media theory as well as with thinkers such as Giorgio Agamben, Jean Baudrillard, Guy Debord, Jacques Lacan, and Slavoj Žižek. Through these engagements, Dean defends the provocative thesis that reflexivity in complex networks is best understood via the psychoanalytic notion of the drives. She contends, moreover, that reading networks in terms of the drives enables us to grasp their real, human dimension, that is, the feelings and affects that embed us in the system. In remarkably clear and lucid prose, Dean links seemingly trivial and transitory updates from the new mass culture of the internet to more fundamental changes in subjectivity and politics. Everyday communicative exchanges—from blog posts to text messages—have widespread effects, effects that not only undermine capacities for democracy but also entrap us in circuits of domination.

The Tech-Wise Family Andy Crouch,2017-04-18 Making conscientious choices about technology in our families is more than just using internet filters and determining screen time limits for our children. It's about developing wisdom, character, and courage in the way we use digital media rather than accepting technology's promises of ease, instant gratification, and the world's knowledge at our fingertips. And it's definitely not just about the kids. Drawing on in-depth original research from the Barna Group, Andy Crouch shows readers that the choices we make about technology have consequences we may never have considered. He takes readers beyond the typical questions of what, where, and when and instead challenges them to answer provocative questions like, Who do we want to be as a family? and How does our use of a particular technology move us closer or farther away from that goal? Anyone who has felt their family relationships suffer or their time slip away amid technology's distractions will find in this book a path forward to reclaiming their real life in a world of devices.

Blogging, Citizenship, and the Future of Media Mark Tremayne,2012-10-02 This collection of original essays addresses a number of questions seeking to increase our understanding of the role of blogs in the contemporary media landscape. It takes a provocative look at how blogs are reshaping culture, media, and politics while offering multiple theoretical perspectives and methodological approaches to the study. Americans are increasingly turning to blogs for news, information, and entertainment. But what is the content of blogs? Who writes them? What is the consequence of the population’s growing dependence on blogs for political information? What are the effects of blogging? Do readers trust blogs as credible sources of information? The volume includes quantitative and qualitative studies of the blogosphere, its contents, its authors, and its networked connections. The readers of blogs are another focus of the collection: how are blog readers different from the rest of the population? What consequences do blogs have for the lives of everyday people? Finally, the book explores the ramifications of the blog phenomenon on the future of traditional media: television, newspapers, and radio.
