The Characters of Creation Daniel Darling,2022-06-07 Most Christians are familiar with the opening words of Genesis: "In the beginning, God created the heavens and the earth." But push beyond those iconic words, and sometimes the details get a little hazy. And strange. God walked around in a garden? Eve was made from Adam's rib? A talking serpent? And what the in the world were the "Nephilim"? In *The Characters of Creation*, Daniel Darling re-introduces readers to the story they thought they knew. He explains the Bible's story of how we got here and how things got messed up, and gives fresh insights into the first people in God's unfolding plan of redemption—from Adam and Eve, The Serpent, Cain and Abel, and Noah.

Creation Stories Anthony Aveni,2021-04-20 An accessible exploration of how diverse cultures have explained humanity's origins through narratives about the natural environment Drawing from a vast array of creation myths-- Babylonian, Greek, Aztec, Maya, Inca, Chinese, Hindu, Navajo, Polynesian, African, Norse, Inuit, and more--this short, illustrated book uncovers both the similarities and differences in our attempts to explain the universe. Anthony Aveni, an award-winning author and professor of astronomy and anthropology, examines the ways various cultures around the world have

attempted to explain our origins, and what roles the natural environment plays in shaping these narratives. The book also celebrates the audacity of the human imagination. Whether the first humans emerged from a cave, as in the Inca myths, or from bamboo stems, as the Bantu people of Africa believed, or whether the universe is simply the result of Vishnu's cyclical inhales and exhales, each of these fascinating stories reflects a deeper understanding of the culture it arose from as well as its place in the larger human narrative.

Origins Jim Baggott, 2018-06-06 What is life? Where do we come from and how did we evolve? What is the universe and how was it formed? What is the nature of the material world? How does it work? How and why do we think? What does it mean to be human? How do we know? There are many different versions of our creation story. This book tells the version according to modern science. It is a unique account, starting at the Big Bang and travelling right up to the emergence of humans as conscious intelligent beings, 13.8 billion years later. Chapter by chapter, it sets out the current state of scientific knowledge: the origins of space and time; energy, mass, and light; galaxies, stars, and our sun; the habitable earth, and complex life itself. Drawing together the physical and biological sciences, Baggott recounts what we currently know of our history, highlighting the questions science has yet to answer.
