**The Weather Obsession** Lawrie Zion,2018-02-08 We have come a long way since the days when weather information could only be found in the back pages of newspapers. The Weather Obsession takes the temperature of modern weather media and investigates how it has fuelled our fascination with all things climatic. Weather information now pervades everything from our mobile devices to online news and social media, while the Bureau of Meteorology is a daily destination for millions of us. What has made weather so much more than a mere talking point? What happens when this data becomes big business? And what is at stake when it comes to how the media frames our understanding of the relationship between extreme weather and climate change? The Weather Obsession lifts the lid on our insatiable appetite for meteorological media and shows that while we might not have stopped worrying about the forecast, almost all of us have learnt to love the BOM.

The Privatization of Everything Donald Cohen,Allen Mikaelian,2021-11-23 The book the American Prospect calls “an essential resource for future reformers on how not to govern,” by America’s leading defender of the public interest and a bestselling historian “An essential read for those who want to fight the assault on public goods and the commons.” —Naomi Klein A sweeping exposé of the ways in which private interests strip public goods of their power and diminish democracy, the hardcover edition of *The Privatization of Everything* elicited a wide spectrum of praise: Kirkus Reviews hailed it as “a strong, economics-based argument for restoring the boundaries between public goods and private gains,” Literary Hub featured the book on a Best Nonfiction list, calling it “a far-reaching, comprehensible, and necessary book,” and Publishers Weekly dubbed it a “persuasive takedown of the idea that the private sector knows best.” From Diane Ravitch (“an important new book about the dangers of privatization”) to Heather McGhee (“a well-researched call to action”), the rave reviews mirror the expansive nature of the book itself, covering the impact of privatization on every aspect of our lives, from water and trash collection to the justice system and the military. Cohen and Mikaelian also demonstrate how citizens can—and are—wresting back what is ours: A Montana city took back its water infrastructure after finding that they could do it better and cheaper. Colorado towns fought back well-funded campaigns to preserve telecom monopolies and hamstringing public broadband. A motivated lawyer fought all the way to the Supreme Court after the state of Georgia erected privatized paywalls around its legal code. “Enlightening and sobering” (Rosanne Cash), *The Privatization of Everything* connects the dots across a wide range of issues and offers what Cash calls “a progressive voice with a firm eye on justice [that] can carefully parse out complex issues for those of us who take pride in citizenship.”

**Integrating Social and Behavioral Sciences Within the Weather Enterprise** National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Division on Earth and Life Studies, Board on Human-Systems Integration, Board on Environmental Change and Society, Board on Atmospheric Sciences and Climate, Committee on Advancing Social and Behavioral Science Research and Application Within the Weather Enterprise, 2018-02-05 Our ability to observe and forecast severe weather events has improved markedly over the past few decades. Forecasts of snow and ice storms, hurricanes and storm surge, extreme heat, and other severe weather events are made with greater accuracy, geographic specificity, and lead time to allow people and communities to take appropriate protective measures. Yet hazardous weather continues to cause loss of life and result in other preventable social costs. There is growing recognition that a host of social and behavioral factors affect how we prepare for, observe, predict, respond to, and are impacted by weather hazards. For example, an individual's response to a severe weather event may depend on their understanding of the forecast, prior experience with severe weather, concerns about their other family members or property, their capacity to take the recommended protective actions, and numerous other factors. Indeed, it is these factors that can determine whether or not a potential hazard becomes an actual disaster. Thus, it is essential to bring to bear expertise in the social and behavioral sciences (SBS)—including disciplines such as anthropology, communication, demography, economics, geography, political science, psychology, and sociology—to understand how people's knowledge, experiences, perceptions, and attitudes shape their responses to weather risks and to understand how human cognitive and social dynamics affect the forecast process itself. Integrating Social and Behavioral Sciences Within the Weather Enterprise explores and provides guidance on the challenges of integrating social and behavioral sciences within the weather enterprise. It assesses current SBS activities, describes the potential value of improved integration of SBS and barriers that impede this integration, develops a research agenda, and identifies infrastructural and institutional arrangements for successfully pursuing SBS-weather research and the transfer of relevant findings to operational settings.

**Tap** Anindya Ghose, 2018-09-11 How the smartphone can become a personal concierge (not a stalker) in the mobile marketing revolution of smarter companies, value-seeking consumers, and curated offers. Consumers create a data trail by tapping their phones; businesses can tap into this trail to harness the power of the more than three trillion dollar mobile economy. According to Anindya Ghose, a global authority on the mobile economy, this two-way exchange can benefit both customers and businesses. In Tap, Ghose welcomes us to the mobile economy of smartphones, smarter companies, and value-seeking consumers. Drawing on his extensive research in the United States, Europe, and Asia, and on a variety of real-world examples from companies including Alibaba, China Mobile, Coke, Facebook, SK Telecom, Telefónica, and Travelocity, Ghose describes some intriguingly contradictory consumer behavior: people seek spontaneity, but they are predictable; they find advertising annoying, but they fear missing out; they value their privacy, but they increasingly use personal data as currency. When mobile advertising is done well, Ghose argues, the smartphone plays the role of a personal concierge—a butler, not a stalker. Ghose identifies nine forces that shape consumer behavior, including time, crowdedness, trajectory, and weather, and he examines these how these forces operate, separately and in combination. With Tap, he highlights the true influence mobile wields over shoppers, the behavioral and economic motivations behind that influence, and the lucrative opportunities it represents. In a world of artificial intelligence, augmented and virtual reality, wearable technologies, smart homes, and the Internet of Things, the future of the mobile economy seems limitless.

**Breaking the Sound Barrier** Amy Goodman, 2009 Amy Goodman, award-winning host of the daily internationally broadcast radio and television program Democracy Now!, breaks through the corporate media's lies, sound bites, and silence in this wide-ranging new collection of articles. Amy Goodman has taken investigative journalism to new heights of exciting, informative, and probing analysis.--Noam Chomsky You can learn more of the truth about Washington and the world from one week of Amy Goodman's Democracy Now! than from a month of Sunday morning talk shows. Make that a year of Sunday talk shows. That's because Amy, as you will discover on every page of this book, knows the critical question for journalists is how close they are to the truth, not how close they are to power.--From the Preface by Bill Moyers In place of the usual suspects--the experts who, in Goodman's words, know so little about so much, explain the world to us, and get it so wrong--this accessible, lively collection allows the voices the corporate media exclude and ignore to be heard loud and clear. From community organizers in New Orleans, to the courageous American soldiers who've said No to Washington's wars, to the victims of torture and police violence, we are given the extraordinary opportunity to hear ordinary people standing up and speaking out. Written with all of the fierce intelligence and passion for truth that millions have come to expect from Amy Goodman's reportage, Breaking the Sound Barrier proves the power that independent journalism can play in the struggle for a better world, one in which ordinary citizens are the true experts of their own lives and communities. Amy Goodman is an award-winning investigative journalist and syndicated columnist, author and the host/executive producer of Democracy Now! airing on nearly 800 stations worldwide. Goodman is the first journalist to receive the Right Livelihood Award, widely known as the 'Alternative Nobel Prize' for developing an innovative model of truly independent grassroots political journalism that brings to millions of people the alternative voices that are often excluded by the mainstream media.. Goodman is the co-author with her brother, journalist David Goodman, of three New York Times bestsellers: Standing Up to the Madness, Static, and The Exception to the Rulers.

*Partly Sunny* Alan Fields,1994 The American public has always taken delight in second-guessing mass-media meteorologists. Partly Sunny not only vindicates their efforts, but arms them with forecasting tools and information far more sophisticated than Uncle Henry's storm-sensitive bunions. 30 photos and line drawings.

**A Tribe Reborn** George Christian Pappas,2019-02-19 For almost fifty years, the Cleveland Indians were a joke. They had won the 1948 World Series with one of the greatest teams of all time, but had not been to the playoffs since 1954 (losing to the New York Giants in the World Series). Even the Major League movies poked fun at their inadequacy. That all changed in the 1990s, when the Indians became one of the most dominant teams of the decade. A Tribe Reborn tells the story of a failing franchise, from “The Mistake by the Lake” to “The Curse of Rocky Colavito,” and how a laughingstock team that was on the verge of relocating changed its ways to become a dominant franchise. With the building of the state-of-the-art Jacobs Field (which the Indians sold out a record 455 consecutive games, from 1995–2001) to changes in how their scouting, front office, and locker room were run, the team that nobody cared about became front-page news across the country. With interviews from Jim Thome, Omar Vizquel, Mike Hargrove, John Hart, and many more, A Tribe Reborn is a fantastic look inside how a losing franchise changed its ways to become a perennial powerhouse. While the Indians of the ’90s never won a World Series (appearing twice in 1995 and 1997), they are still remembered for their hard play, amazing talent, and rabid fan base.

**Innovative State** Aneesh Chopra,2014-05-06 “As the . . . first Chief Technology Officer, Aneesh Chopra did groundbreaking work to bring our government into the 21st century.” —President Barack Obama Over the last twenty years, our economy and our society, from how we shop and pay our bills to how we communicate, have been completely revolutionized by technology. As Aneesh Chopra shows in Innovative State, once it became clear how much this would change America, a movement arose around the idea that these same technologies could reshape and improve government. But the idea languished, and while the private sector innovated, our government stalled, trapped in a model designed for the America of the 1930s and 1960s. The election of Barack Obama offered a new opportunity. In 2009, Aneesh Chopra was named the first Chief Technology Officer of the United States federal government. Previously the Secretary of Technology for Virginia and managing director for a health care think tank, Chopra was tasked with leading the administration’s initiatives for a more open, tech-savvy government. In Innovative State, Chopra offers an absorbing look at how open government can establish a new paradigm for the Internet era and allow us to tackle our most challenging problems, from economic development to affordable health care. “With inspiring stories and clear insights, [Chopra] provides a playbook for open innovations that work both in the public and the private sector.” —Walter Isaacson, #1 New York Times–bestselling author of Steve Jobs
