**Thousand-Mile Song** David Rothenberg,2010-05 In Thousand Mile Song, musician and philosopher David Rothenberg uses the enigma of whale sounds to explore whether we can truly understand nonhuman minds. Interviewing scholars around the world as they attempt to decipher underwater music, Rothenberg tells the story of scientists and artists confronting an unknown as vast as the ocean. Along the way, he plays his clarinet live with whales in their native habitats, from Russia to Hawaii, making interspecies music that appears on the included CD. Richly detailed and deeply entertaining, Thousand Mile Song is an imaginative look at the most intriguing creatures of the ocean.

**Whale Music** David Rothenberg,2023-02-28 The marvelous sonic world of whales, from the perspective of music and science. Whale song is an astonishing world of sound whose existence no one suspected before the 1960s. Its discovery has forced us to confront the possibility of alien intelligence—not in outer space but right here on earth. Thoughtful, richly detailed, and deeply entertaining, Whale Music uses the enigma of whale sounds to open up whales' underwater world of sonic mystery. In observing and talking with leading researchers from around the globe as they attempt to decipher undersea music, Rothenberg tells the story of scientists and musicians confronting an unknown as vast as the ocean itself. His search culminates in a grand attempt to make interspecies music by playing his clarinet with whales in their native habitats, from Russia to Canada to Hawaii. This is a revised edition of Thousand Mile Song, originally published in 2008. The latest advances in cetacean science and interspecies communication have been incorporated into this new edition, along with added photographs and color whale scores.

**Fluke** Christopher Moore,2009-11-05 Just why do humpback whales sing? That's the question that has marine biologist Nate Quinn and his crew poking, charting, recording and photographing very big, wet, gray marine mammals. That is, until the extraordinary day when a whale lifts its tail into the air to display a cryptic message spelled out in foot-high letters: BITE ME. Trouble is, Nate's beginning to wonder if he hasn't spent just a little too much time in the sun. 'Cause no one else saw a thing- not his longtime partner, Clay Demodocus; not their saucy young research assistant; not even the spliff-puffing white-boy Rastaman Kona (ne Preston Applebaum). But later, when a roll of film returns from the lab missing the crucial tail shot- and his research facility is trashed- Nate realizes something very fishy indeed is going on.

**Listening to Whales** Alexandra Morton,2008-12-30 In Listening to Whales, Alexandra Morton shares spellbinding stories about her career in whale and dolphin research and what she has learned from and about these magnificent mammals. In the late 1970s, while working at Marineland in California, Alexandra pioneered the recording of orca sounds by dropping a hydrophone into the tank of two killer whales. She recorded the varied language of mating, childbirth, and even grief after the birth of a stillborn calf. At the same time she made the startling observation that the whales were inventing wonderful synchronized movements, a behavior that was soon recognized as a defining characteristic of orca society. In 1984, Alexandra moved to a remote bay in British Columbia to continue her research with wild orcas. Her recordings of the whales have led her to a deeper understanding of the mystery of whale echolocation, the vocal communication that enables the mammals to find their way in the dark sea. A fascinating study of the profound communion between humans and whales, this book will open your eyes anew to the wonders of the natural

world.

Summoned to Lead Leonard Sweet, 2009-12-15 Leadership Re-Visioned Cast a vision, set a strategy, rally the troops, and take the hill—you don't need another book to rehash the well-worn principles of modern leadership. But if you're looking for something different, something that . . . approaches leadership as an art as well as a science inspires hope and expectation in those of us who aren't born leaders challenges those with leadership roles to explore new possibilities. . . then Leonard Sweet wants to help you discover a very different kind of leadership vision. It's one you hear if your ears are open, and it could summon you at any time. When you respond, the puzzle pieces of who you are will fit together into a leader others follow because you've answered a call, not trained for a position. "The church has it all wrong. It is trying to train leaders. Instead, it ought to train everyone to listen and to develop their own soundtrack." Leaders don't see a vision, says Sweet, they hear one. "Sound becomes sight. Leaders hear life." For a sonogram of "acoustic leadership," Sweet takes us inside the incredible account of Sir Ernest Shackleton, the celebrated polar explorer who led his entire crew of twenty-seven from disaster in the Antarctic to safety. Called "the greatest leader that ever came on God's earth, bar none," Shackleton objectifies the goals of Sweet's own exploration in search of wisdom for today and tomorrow's truly compelling, voice-activated leaders. Right now, you may be leading many people or just yourself. But who knows what tomorrow—or a minute from now—will call forth in you. Are your ears open?
