China's Media Go Global Daya Kishan Thussu, Hugo de Burgh, Anbin Shi, 2017-11-27 As part of its 'going out' strategy, China is using the media to promote its views and vision to the wider world and to counter negative images in the US-dominated international media. China's Media Go Global, the first edited collection on this subject, evaluates how the unprecedented expansion of Chinese media and communications is changing the global media landscape and the role of China within it. Each chapter examines a different dimension of Chinese media's globalization, from newspapers, radio, film and television, to social media and journalism. Topics include the rise of Chinese news networks, China Daily as an instrument of China's public diplomacy and the discussion around the growth of China's state media in Africa. Other chapters discuss entertainment television, financial media and the advertising market in China. Together, this collection of essays offers a comprehensive evaluation of complex debates concerning the impact of China on the international media landscape, and makes a distinctive addition to Chinese media studies, as well as to broader global media discourses. Beyond its primary readership among academics and students, China's Media Go Global is aimed at the growing constituency of general readers, for whom the role of the media in globalization is of wider interest.

The Belt and Road Fei Xu, 2018-07-24 Addressing the unprecedented international interest in China's high-speed railways, this book adopts a global perspective to examine the success of the system and probes into its going-global strategy in the context of the "Belt and Road" initiative, providing readers around the world a better understanding of infrastructure construction under the "Belt and Road"

plan, as well as the global vision of communication and mutual exchange and prosperity among the countries along the Belt and Road route. The previous American President, Barack Obama, once told President Xi Jinping that there were two things about China that he particularly admired: the high-speed railway system, and the mathematics education. The Belt and Road, and the Global Strategy of China's High-speed Rail provides scholarly researchers and those generally interested in China's High-speed rail excellent insight into this impressive and rapid development.

Battle of the Spheres Melita Tessa, 2016-10-17 What would you do if you disappear into the earth's Core to find a new civilization? A civilization with plans to use you, to annihilate humanity? What if it was too late to realize that you were taking bullets for the one behind the trigger? Would you sacrifice what you must-who you must? How will you choose between what you know, and what you feel? "I can't live a lie. I can't run from my life." Jacelyn and the Cruman Prince and the Mantlanian Princess choose to stand and fight. To change what must be changed, save what must be saved...and destroy what must be destroyed in the Earth. Will they remain like stars that never saw the sky? Or will they become legends whose names will never die?

A Cross-Cultural Study of Commercial Media Discourses Wenhui Yang, 2020-10-20 This book decodes commercial news discourses from the perspective of cognitive semantics. It attaches considerable importance to the bodily experientialism and linguistic embodiment advocated in discourse analysis and cognitive linguistics and explores the complex yet thought-provoking

correlation between overt language and covert cognition by focusing on contrastive analyses of metaphors, image schemas, and stance markers in texts. On the basis of the analyses, the author discusses the linguistic applications, lexical devices and personal experiences, along with their embodied mechanisms, revealing the linguistic strategies, embodied cognitive linguistic actions and constructive thoughts used in media discourses on product promotion, human resources deployment, and commodity problem resolution. In turn, this sheds light on how linguistic selections and cognitive mechanisms are used in composing media news and on how public cognition on certain social and business issues might be framed. The combination of cognitive semantics and commercial discourse analysis offers comprehensive and rewarding insights into the cross-cultural research of both cognitive actions and linguistic behavior reflected in news reports and highlights the correlation between the use of wording and cognitive construction in discourses, which broadens the scope of discourse analysis, cognitive linguistics, applied linguistics, and sociolinguistics. Further, the use of analytical measures and the effective integration of discourse analysis and cognitive semantics lend the book additional analytical authenticity, providing an empirical foundation for cross-cultural communication studies.

Power Electronics in Renewable Energy Systems

Teuvo Suntio, Tuomas Messo, 2019-06-24 This book offers a collection of 30 scientific papers which address the problems associated with the use of power electronic converters in renewable energy source-based systems. Relevant problems associated with the use of power electronic converters to integrate renewable energy systems to the power grid are presented. Some of the covered topics relate to the integration of photovoltaic and

wind energy generators into the rest of the system, and to the use of energy storage to mitigate power fluctuations, which are a characteristic of renewable energy systems. The book provides a good overview of the abovementioned topics.

Economic Analysis of High Speed Rail in Europe

,2012-07-02 Este informe pretende contribuir al análisis económico de los proyectos de inversión en alta velocidad ferroviaria. La evaluación económica de proyectos puede ayudar a los gobiernos a formarse una idea más precisa sobre los beneficios esperados de distintas líneas de actuación que absorben dinero público para resolver un mismo problema de transporte. En este informe se trata de determinar las circunstancias en las que la inversión en alta velocidad es socialmente deseable y en que otras la sociedad gana posponiendo la inversión. La red de alta velocidad puede construirse gradualmente, añadiendo nuevas líneas una vez que la evaluación económica muestra una rentabilidad social positiva.

Shinkansen Christopher Hood,2006-04-18 The image of the shinkansen – or ‘bullet train’ – passing Mount Fuji is one of the most renowned images of modern Japan. Yet, despite its international reputation for speed and punctuality, little is understood about what makes it work so well and what its impact is. This is a comprehensive account of the history of the shinkansen, from its planning during the Pacific War, to its launch in 1964 and subsequent development. It goes on to analyze the reasons behind the bullet train’s success, and demonstrates how it went from being simply a high-speed rail network to attaining the status of iconic national symbol. It considers the shinkansen’s relationship with national and regional politics and economic development, its financial viability,

the environmental challenges it must cope with, and the ways in which it reflects and influences important aspects of Japanese society. It concludes by considering whether the bullet train can be successful in other countries developing high-speed railways. Overall, this book provides a thorough examination of the phenomenon of the shinkansen, and its relationship with Japanese society.

Here Erred Einstein Hans H. Sallhofer,Dennis Radharose,Radha,2001 The emergence of modern physics in the first three decades of the 20th century was accompanied by a loss of determinism. That loss is embodied in the Copenhagen interpretation and the theory of relativity. The development of physics-based technologies, both constructive and destructive, occurred shortly thereafter at so dizzying a rate that scientists rarely took a critical look at the logical foundations of the Copenhagen interpretation and the theory of relativity, or at the consequences of the loss of determinism. This book contains a dialogue between a physicist and a philosopher on that issue. The dialogue is strongly contextualized with respect to the main players in physics during the first sixty years of the 20th century, and to the prevailing political conditions in Western Europe and the USA. It was galvanized by the debate and the subsequent abandonment of the Superconducting Super Collider, and also affords a lively understanding of Greek epistemology. Questioned by the philosopher,the physicist provides an account of the directions taken by physicists and the roads not traveled,

as well as his own understanding of the nature of matter.

Taiwan 101 Matthew B. Christensen, Henrietta Yang, 2024-01-09 This book provides a practical, up-to-date, guide to navigating life in Taiwan. Unprecedented David Ray Griffin, 2015-01-04 This book combines (1) the most extensive treatment of the causes and phenomena of climate change in combination with (2) an extensive treatment of social obstacles and challenges (fossil-fuel funded denialism, media failure, political failure, and moral, religious, and economic challenges), (3) the most extensive treatment of the needed transition from fossil-fuel energy to clean energy, and (4) the most extensive treatment of mobilization. It provides the most complete, most up-to-date treatment of the various kinds of clean energy, and how they could combine to provide 70% clean energy by 2035 and 100% before 2050 (both U.S. and worldwide).

Examples & Explanations for Antitrust Christopher L. Sagers, 2021-02-24 Examples and Explanations for

Antitrust Law, Third Edition is a relentlessly accessible introduction to a body of law that seems foreign and complex but does not at all have to be. By capturing the bigger picture without sacrificing any detail, introducing antitrust economics in a purely intuitive way appropriate for users at any level of economic sophistication, and extensively explaining the real-world context and institutions of antitrust practice, the book brings the law within reach for students of all backgrounds. New to the Third Edition: Incorporation of all significant judicial and legislative developments since 2011 In-depth new coverage of the “two-sided” or “platform” market theory introduced in the Supreme Court’s seminal 2018 decision in *Ohio v. American Express* Revised coverage of conspiracy, monopolization, and merger law in light of key lower-court decisions, like *United States v. AT&T*, *New York v. T-Mobile*, *Steves & Sons v. JELD-WEN*, *Viamedia v. Comcast*, *SC Innovations v. Uber Technologies*, and the Alston NCAA litigation Expanded treatment of advanced antitrust economic theory in a substantially revised Appendix, including a full examination of bargaining theory and other developing models, and their performance before the courts. Professors and students will benefit from: Extensive attention to real-world context Heavy emphasis on accessibility in language and explanation, but backed up with support for economic and legal study by more advanced readers (for example, the Appendix on advanced antitrust economics) A two-step introduction to antitrust economics accessible without any prior background in economics, built on a purely intuitive and non-quantitative introduction supplemented by more formal explanation for more advanced readers
