The Fictions of Translation Judith Woodsworth, 2018-02-15 In *The Fictions of Translation*, emerging and seasoned scholars from a range of cultures bring fresh perspectives to bear on the age-old practice of translation. The current movement of people, knowledge and goods around the world has made intercultural communication both prevalent and indispensable. Consequently, the translator has become a more prominent figure and translation an increasingly present theme in works of literature. Embedding translation in a fictional setting and considering its most extreme forms – pseudotranslation or self-translation, for example – are fruitful ways of conceptualizing the act of translating and extending the boundaries of translation studies. Taken together, the various translational fictions examined in this collection yield new insights into questions of displacement, migration and hybridity, all characteristic of the modern world. *The Fictions of Translation* will thus be of interest to practising translators, students and scholars of translation and literary studies, as well as a more general readership.

Translating Feminism Maud Anne Bracke, Julia C. Bullock, Penelope Morris, Kristina Schulz, 2021-09-18 This edited book addresses the diversity across time and space of the sites, actors and practices of feminist translation from 1945-2000. The contributors examine what happens when a politically motivated text is translated linguistically and culturally, the translators and their aims, and the strategies employed when adapting texts to locally resonating discourses. The collection aims to answer these questions through case studies and a conceptual rethinking of the process of politically engaged translation, considering not only trained translators and publishers, but also feminist activists and groups, NGOs and writers. The book will be of interest to students and researchers in the fields of translation studies, gender/women's studies, literature and feminist history.

The Translator's Approach Radegundis Stolze, 2011-01-01 Contents The book presents the hermeneutical theory of translation focusing on the translator as a person. Translation is a dynamic task to be performed on the basis of a deep understanding of the original and an adequate strategy for authentic reformulation in another language. The theoretical foundations of hermeneutics laid by Schleiermacher, and later on developed by Heidegger, Gadamer and the phenomenologist Husserl, are presented, combined with a critical discussion of current theories in Translation Studies. The theoretical presentation is complemented by a collection of twelve text examples from various genres for a description of the practical translation process in the English and the German language, when one applies the hermeneutical categories of orientation. Thus the book is not only an introduction to translational hermeneutics but may also be used as a handbook for translator training. The Author Radegundis Stolze (*1950), Dr. phil., M.A., Dipl.-bers., lecturer at the University of Technology Darmstadt, visiting professor, seminar-leader, academic author and accredited practical translator. Long-term member of EST (European Society for Translation Studies) and BD (German Translators Association).

A Translator's Handbook on the Gospel of Luke J. Reiling, J.L. Swellengrebel, 2023-04-17 This handbook, like others in this series, concentrates on exegetical matters that are of prime importance for translators, and it attempts to indicate possible solutions for translational problems that may arise because of language or culture. In this respect the Handbook attempts to deal with the full range of information important to translators. However, the authors do not attempt to provide help that other theologians and scholars may be seeking but which is not directly useful for the task of translating. It is assumed that such information is available elsewhere.

The Translator's Visibility Heather Cleary, 2020-12-10 At the intersection of translation studies and Latin American literary studies, *The Translator's Visibility* examines contemporary novels by a cohort of writers – including prominent figures such as Cristina Rivera Garza, César Aira, Mario Bellatin, Valeria Luiselli, and Luis Fernando Verissimo – who foreground translation in their narratives. Drawing on Latin America's long tradition of critical and creative engagement of translation, these novels explicitly, visibly, use major tropes of translation theory – such as gendered and spatialized metaphors for the practice, and the concept of untranslatability – to challenge the strictures of intellectual property and propriety while shifting asymmetries of discursive authority, above all between the original as a privileged repository of meaning and translation as its hollow emulation. In this way, *The Translator's Visibility* shows that translation not only serves to renew national literatures through an exchange of ideas and forms; when rendered visible, it can help us reimagine the terms according to which those exchanges take place. Ultimately, it is a book about language and power: not only the ways in which power wields language, but also the ways in which language can be used to unseat power.

Medical Translation Step by Step Vicent Montalt, Maria González-Davies, 2014-07-16 Statistics on the translation market consistently identify medicine as a major thematic area as far as volume or translation is concerned. Vicent Montalt and Maria Gonzalez Davis, both experienced translator trainers at Spanish universities, explain the basics of medical translation and ways of teaching and learning how to translate medical texts. *Medical Translation Step by Step* provides a pedagogical approach to medical translation based on learner and learning-centred teaching tasks, revolving around interaction: pair and group work to carry out the tasks and exercises to practice the points covered. These include work on declarative and operative knowledge of both translation and medical texts and favour an approach that takes into account both the process and product of translations. Starting from a broad communication framework, the book follows a top-down approach to medical translation: communication → genres → texts → terms and other units of specialized knowledge. It is positively focused in that it does not insist on error analysis, but rather on ways of writing good translations and empowering both students and teachers. The text can be used as a course book for students in face-to-face learning, but also in distance and mixed learning situations. It will also be useful for teachers as a resource book, or a core book to be complemented with other materials.

Literary Translator Studies Klaus Kaindl, Waltraud Kolb, Daniela Schlager, 2021-04-15 This volume extends and deepens our understanding of Translator Studies by charting new territory in terms of theory, methods and concepts. The focus is on literary translators, their roles, identities, and personalities. The book introduces pertinent translator-centered approaches in four sections: historical-biographical studies, social-scientific and process-oriented methods, and approaches that use paratexts or translations to study literary translators. Drawing on a variety of concepts, such as identity, role, self, posture, habitus, and voice, the various chapters showcase forgotten literary translators and shed new light on some well-known figures; they examine literary translators not as functioning units but as human beings in their uniqueness. *Literary Translator Studies* as a subdiscipline of Translation Studies demonstrates how exploring the cultural, social, psychological, and cognitive facets of translatorial subjects contributes to a holistic understanding of translation.

Institutional Translator Training Tomáš Svoboda, Łucja Biel, Vilemini Sosoni, 2022-12-30 This collection surveys the translator training landscape in international organizations on a global scale, offering a state-of-the-art view on institutional translator training research and practical takeaways for stakeholders. The volume's focus on training brings a unique perspective to existing research on institutional translation, which has tended to single out such themes as agency, professionalism, and quality. The book is divided into three sections, with the first outlining the competences required of institutional translators, the second exploring training practices at the university level and on the job, for novices and professionals, across a range of settings, and the third providing a synthesis of the above. Contributions draw on findings from studies in both institutional desiderata and existing training programmes from diverse geographic contexts towards situating the discussion through a global lens. In linking together competences and training practices, the book enhances collective knowledge of institutional translation and provides valuable insights for universities and institutions that work with translators on both international and national scales. This book will be key reading for scholars in translation studies, particularly those interested in institutional translation and translator training, as well as active professionals. Beyond the Translator's Invisibility Peter J. Freeth, Rafael Treviño, 2024-01-08 The question of whether to disclose that a text is a translation and thereby give visibility to the translator has dominated discussions on translation throughout history. Despite becoming one of the most ubiquitous terms in translation studies, however, the concept of translator (in)visibility is often criticized for being vague, overly adaptable, and grounded in literary contexts. This interdisciplinary volume therefore draws on concepts from fields such as sociology, the digital humanities, and interpreting studies to develop and operationalize theoretical understandings of translator visibility beyond these existing criticisms and limitations. Through empirical case studies spanning areas including social media research, reception studies, institutional translation, and literary translation, this volume demonstrates the value of understanding the visibilities of translators and translation in the plural and adds much-needed nuance to one of translation studies' most pervasive, polarizing, and imprecise concepts.
