Indian Army List January 1919 — Volume 1 Army

Headquarters, India, 2012-02-03 Volume 1 of 4. The January and July issues of the Indian Army List contain not only the distribution of officers on the active list of the Army in India, including officers of British army regiments, battalions etc stationed in India, but are supplemented by the addition of Orders of Knighthood, Honours and Awards, including Foreign Orders, by the non-effective officer list and the War Services of officers of the Indian Army. Details of each officer include dates of birth (except for wartime commissioned officers), date of first commission, of appointment to the Indian Army and dates of promotion. Officers are grouped according to their rank and by seniority within that rank, and are again shown under their regiments/battalions. In the case of British units, their date of arrival in India is shown, and with Indian units their date of formation and changes in title since, plus details of the backgrounds of men recruited, e.g. Sikhs, Punjabis, Dogras, Rajputs, etc. This army list also includes all native Viceroy Commissioned Officers - Subadar Majors, Subadars and Jemadars - and their war services, Major HQs and their staffs, divisional and brigade commanders and their staffs, schools, colleges, Administrative Departments of the Army are all shown. Non-regular Indian Defence Force units such as 22nd Bengal and North-Western railway Battalion, and the Indian Army Reserve of Officers are all there, along with British Warrant Officers serving in departments of the Indian Army. In 1914 there were 116 Indian and 10 Gurkha Regiments, all with one battalion apart from the cavalry, 32 Indian and one Gurkha regiment had been formed and the majority of the original regiments had raised second and sometimes third battalions. This splendid four-volume work reflects the tremendous contribution made by the Indian Army to the Empire's war effort. A full index is included.

Transforming Urban Transport Diane E. Davis, Alan Altschuler, 2018-11 Transforming Urban Transport brings into focus

the origins and implementation pathways of significant urban transport innovations that have recently been adopted in major, democratically governed world cities that are seeking to advance sustainability aims. It documents how proponents of new transportation initiatives confronted a range of administrative, environmental, fiscal, and political obstacles by using a range of leadership skills, technical resources, and negotiation capacities to move a good idea from the drawing board to implementation. The book's eight case studies focus on cities of great interest across the globe--Los Angeles, Mexico City, New York, Paris, San Francisco, Seoul, Stockholm, and Vienna--many of which are known for significant mayor leadership and efforts to rescale power from the nation to the city. The cases highlight innovations likely to be of interest to transport policy makers from all corners, such as strengthening public transportation services, vehicle and traffic management measures, repurposing roads and other urban spaces away from their initial function as vehicle travel corridors, and turning sidewalks and city streets into more pedestrian-friendly places for walking, cycling, and leisure. Aside from their transformative impacts in transportation terms, many of the policy innovations examined here have altered planning institutions, public-private sector relations, civil society commitments, and governance mandates in the course of implementation. In bringing these cases to the fore, *Transforming Urban Transport* advances understanding of the conditions under which policy interventions can expand institutional capacities and governance mandates, particularly linked to urban sustainability. As such, it is an essential contribution to larger debates about what it takes to make cities more environmentally sustainable and the types of strategies and tactics that best advance progress on these fronts in both the short- and the long-term.

Modern Israeli Tanks and Infantry Carriers 1985-2004

Marsh Gelbart, 2012-05-20 Over the last two decades, the Israel Defence Force (IDF) has introduced a variety of new AFVs. Old

models such as the M48 and M60 have been improved beyond recognition, in the form of the Magach 7. The performance of Israel's indigenous Merkava tank has been similarly enhanced with new variants and the new Merkava 4 MBT has recently entered service. Israeli infantry have also received machines such as the Achzarit assault carrier, the Puma combat engineer vehicle and the Nagmachon and Nakpadon (tank-based carriers intended for low intensity conflicts). This book examines the design, modification and combat history of these formidable fighting machines.

Disneyfying Ile De France? Anne-Marie d'Hauteserre, 2020-11-17 The book captures the history, as well as the meaning and the value of the on-going partnership between the French state and the Walt Disney Company, remembering that it involved from the start more than a tourism project. It examines

how the combined aspirations of the French state and the American Company transformed Val d'Europe as the sole potential location in Europe for the Company's theme parks while allowing the state to retain its egalitarian ideals. Most critics believed the French state had caved into every demand of the Company. No one ever mentioned profits of the state that it would then invest to support other projects. The first part of the book investigates the encounter between the partners and the reasons why a welfarist state encouraged penetration by a capitalist enterprise, alongside the Company's reasoning. The second section reveals the continued cooperation between the two entities in the management of the urbanization of Val d'Europe from the opening of the first Park and the start of a new major tourism development, in spite of criticisms and fluctuating attendance in the parks. The third part highlights more recent actions of the partners to create a formidable urban tourism pole that will attract ever more visitors, while still critically examining their effectiveness and sustainability.

The Vietnamese City in Transition Patrick Gubry, Frank Castiglioni, Jean-Michel Cusset, Nguyen Thi Thieng, Pham Thuy Huong, 2010 Since the Doi Moi policy of economic renovation was introduced in 1986, Vietnam has undergone deep transformations as a result of the transition to a socialist-oriented market economy. Social and urban transition has taken place in parallel, as urban dynamics were spurred on by Vietnamese public and private stakeholders, and by external agents such as international organizations and international solidarity organizations, experts, consultants and bilateral aid organizations. Here are the resu...

Combined Arms Warfare in Israeli Military History David Rodman, 2018-12-07 Combined arms warfare (CAW) -- the integration of different arms on the battlefield (e.g., armor,

infantry, artillery, aircraft, and engineers) in order to achieve maximal efficiency there -- is as old as war itself. Every army across both time and space that has engaged in combat has practiced one version or another of CAW, whether consciously or otherwise. The Israel Defense Forces (IDF) has been no exception to the rule. This book traces the Israeli experience with CAW from the country's War of Independence in 1947-49 (against a coalition of Arab states) through Operation Protective Edge in 2014 (against a coalition of Hamas-led terrorist/insurgent groups). It describes and analyzes the IDF's practice of CAW in each interstate war (IW), asymmetrical war (AW), and low-intensity conflict (LIC) that Israel has fought since the country's establishment in the mid-twentieth century. The book also highlights the Israeli approach to CAW in respect of special operations (SPEC OPS). With no end in sight to the Arab-Israeli conflict, and with further hostilities between Israel and its neighbors virtually assured in the future, Combined Arms Warfare in Israeli Military History constitutes an essential addition to the literature about Middle Eastern warfare. This book is aimed primarily at the academic and research community, but it is fully accessible to anyone with an interest in Israeli military history.

Electrocatalysis for Membrane Fuel Cells Nicolas Alonso-

Vante, Vito Di Noto, 2023-09-06 Electrocatalysis for Membrane Fuel Cells Comprehensive resource covering hydrogen oxidation reaction, oxygen reduction reaction, classes of electrocatalytic materials, and characterization methods Electrocatalysis for Membrane Fuel Cells focuses on all aspects of electrocatalysis for energy applications, covering perspectives as well as the low-temperature fuel systems principles, with main emphasis on hydrogen oxidation reaction (HOR) and the oxygen reduction reaction (ORR). Following an introduction to basic principles of electrochemistry for electrocatalysis with attention to the methods to obtain the parameters crucial to characterize these systems, Electrocatalysis for Membrane Fuel Cells covers sample topics such as: Electrocatalytic materials and electrode configurations, including precious versus non-precious metal centers, stability and the role of supports for catalytic nano-objects; Fundamentals on characterization techniques of materials and the various classes of electrocatalytic materials; Theoretical explanations of materials and systems using both Density Functional Theory (DFT) and molecular modelling; Principles and methods in the analysis of fuel cells systems, fuel cells integration and subsystem design. Electrocatalysis for Membrane Fuel Cells quickly and efficiently introduces the field of electrochemistry, along with synthesis and testing in prototypes of materials, to researchers and professionals

interested in renewable energy and electrocatalysis for chemical energy conversion.

The Making of Grand Paris Theresa Enright, 2023-09-19 A critical examination of metropolitan planning in Paris—the “Grand Paris” initiative—and the building of today's networked global city. In 2007 the French government announced the “Grand Paris” initiative. This ambitious project reimagined the Paris region as integrated, balanced, global, sustainable, and prosperous. Metropolitan solidarity would unite divided populations; a new transportation system, the Grand Paris Express, would connect the affluent city proper with the low-income suburbs; streamlined institutions would replace fragmented governance structures. Grand Paris is more than a redevelopment plan; it is a new paradigm for urbanism. In this first English-language examination of Grand Paris, Theresa Enright offers a critical analysis of the early stages of the project, considering whether it can achieve its twin goals of economic competitiveness and equality. Enright argues that by orienting the city around growth and marketization, Grand Paris reproduces the social and spatial hierarchies it sets out to address. For example, large expenditures for the Grand Paris Express are made not for the public good but to increase the attractiveness of the region to private investors, setting off a real estate boom, encouraging gentrification, and leaving many residents still unable to get from here to there. Enright describes Grand Paris as an example of what she calls “grand urbanism,” large-scale planning that relies on infrastructural megaprojects to reconfigure urban regions in pursuit of speculative redevelopment. Democracy and equality suffer under processes of grand urbanism. Given the logic of commodification on which Grand Paris is based, these are likely to suffer as the project moves forward.

Israeli Counter-Insurgency and the Intifadas Sergio Catignani, 2008-01-24 This volume analyzes the conduct of the Israel Defence Forces’ (IDF) counter-insurgency operations during the two major Palestinian uprisings (1987-1993 and 2000-2005) in

the Territories of the West Bank and Gaza Strip. It employs primary and secondary resources to produce a comprehensive analysis on whether or not the IDF has been able to adapt its conventional conduct of warfare to the realities of the Israeli-Palestinian low-intensity conflict and achieve any sort of victory over the Palestinian insurgents. Sergio Catignani provides new insights into how conventional armies struggle with contemporary insurgency by looking in particular at the strategic, operational, tactical and ethical dilemmas of the IDF over the last two decades. By examining the way in which the IDF and the Israeli security doctrine were formed and developed over time, he explores the extent to which Israeli security assumptions, civil-military relations, the organizational culture, command and control structure, and conduct of the IDF have affected its adaptation to the contemporary Israeli-Palestinian low-intensity conflict. Israeli Counter-Insurgency and the Intifadas will be of much interest to students of low-intensity conflict and counter-insurgency, the Israeli army, the Middle Eastern conflict and strategic studies in general.
