Handbook of Research on Consumption, Media, and Popular Culture in the Global Age Ozgen, Ozlen,2019-05-15 The mass production and diversification of media have accelerated the development of popular culture. This has started a new trend in consumerism of desiring new consumption objects and devaluing those consumption objects once acquired, thus creating a constant demand for new items. Pop culture now canalizes consumerism both with advertising and the marketing of consumerist lifestyles, which are disseminated in the mass media. The Handbook of Research on Consumption, Media, and Popular Culture in the Global Age discusses interdisciplinary perspectives on media influence and consumer impacts in a globalizing world due to modern communication technology. Featuring research on topics such as consumer culture, communication ethics, and social media, this book is ideally designed for managers, marketers, researchers, academicians, and students.

InTraders 2019: Academic studies in social, human and administrative sciences Hakan Murat ARSLAN,Adriana BURLEA-SCHIOPOIU,Liza ALILI SULEJMANI,2020-01-29 The present study is an analysis of the connections established between the intercultural phenomenon and trade. Both intercultural contacts and commerce appeared and developed due to humans' mobility and their basis was exchange (either spiritual or material). Since the dawn of history people travelled a lot and exchanged knowledge and goods (for instance, silk was brought to Europe by two Byzantine monks from China, in 550 C.E.), so, travel generated interculturality and trade. Intercultural contacts can be positive (trade, for example) or negative (wars). One can say that interculturality is a trait of the human species. Many innovations in different fields spread due to intercultural exchange, globalisation is also based on cross-cultural or intercultural contacts. The Industrial Revolution and colonialism represented the main causes of the intensification of intercultural contacts which generated an increase in international trade. In contemporary human society, this kind of relationships is essential for development in any activity field. The globalised trade in nowadays world was generated by interculturality and World Trade Organization was founded to facilitate it and to create an international network; the technological evolution and the modern means of transport enhanced the relations between different cultures. Interculturality is an umbrella concept covering a diversity of domains: communication, religion, education, anthropology, literature etc. In this paper, we try to answer to the following question: "How can interculturality influence trade or vice versa?" by pointing out the main aspects of the analysed phenomena and their links. To accomplish this task we shall make use of the historical method and imagology.

Global Politics of Celebrity Mehdi Semati,Kate Zambon,2023-06-20 In the age of networked publics and global viral publicity, celebrity is transnational. Its circulation illuminates global, national, and local dynamics of power and resistance. Celebrity shapes concepts of race, gender, class, and national identity on a global scale. Governments use transnational celebrity as evidence of their country's cultural power, transmuting cultural influence into economic and political power. Meanwhile, celebrities who cross borders become potent and contested icons of national identity. At the grassroots level, citizens in diverse geographic contexts are becoming increasingly fluent in the global language of celebrity and are mobilizing it in new ways for personal and political projects. Reaching beyond the Global North, this book showcases research on transnational celebrity as a technology of soft power and counter-hegemonic organizing, and as a driver of discourses of race and migration. It also explores self-presentation and self-branding in the globalized attention economy. This book demonstrates the need for a renewed politicized treatment of the topic of celebrity in its transnational and globalizing reach. The chapters in this book were originally published in the journal Popular Communication.

Television in Turkey Yeşim Kaptan,Ece Algan,2020-09-03 This edited collection takes a timely and comprehensive approach to understanding Turkey's television, which has become a global growth industry in the last decade, by reconsidering its geopolitics within both national and transnational contexts. The Turkish television industry along with audiences and content are contextualised within the socio-cultural and historical developments of global neoliberalism, transnational flows, the rise of authoritarianism, nationalism, and Islamism. Moving away from Anglo-American perspectives, the book analyzes both local and global processes of television production and consumption while taking into consideration the dynamics distinctive to Turkey, such as ethnic and gender identity politics, media policies and regulations, and rising nationalistic sentiments.

Alternative Tourism in Turkey Istvan Egresi,2016-12-08 This book takes inventory of and evaluates the available resources for the development of alternative tourism in Turkey. It examines the role of alternative tourism in future tourism development plans and proposes public policies necessary to assure sustainability. Although tourism started later in Turkey than in the Western Mediterranean countries it has grown very rapidly during the last three decades and today the country ranks among the top ten countries in the world in terms of both arrivals and receipts. However, most of the tourism development has been in the mass tourism sector or the so-called sun-sea-sand tourism. While crucial for the economic development of Turkey, mass tourism, in the absence of proper planning, has happened in a haphazard manner leading to numerous environmental and socio-cultural problems. This book argues that, in order to mitigate these problems, Turkey should encourage the development of alternative forms of tourism.

Maintaining International Relations Through Digital Public Diplomacy Policies and Discourses Elita?, Türker,2022-11-04 Communication technologies have become an important tool for instantaneous effects and reactions both individually and collectively. The fact that traditional discourses become digital by transferring them through tools heralded a new understanding of digital in individual and social networks. The tendency to use these features offered by communication technologies in international relations, rather than just individual use, has emerged as a result of being built over digital in their discourse on diplomacy. However, the concepts of transparency and public offering, which do not exist in classical democracy, clearly show themselves in digital public diplomacy. Maintaining International Relations Through Digital Public Diplomacy Policies and Discourses reveals the tendencies of countries, institutions, and their representatives to use communication technologies as a diplomatic tool in international relations practices. It reveals the difference between the discourses built on digital media and classical diplomacy. Covering topics such as crisis management, new media platforms, and international relations, this premier reference source is an excellent resource for government officials, diplomats, social media managers, communications professionals, students and faculty of higher education, libraries, researchers, and academicians.

Its foreign policy is becoming more complex, making sophisticated public diplomacy an essential tool. This volume - the first in English about the subject - examines this rising power's path toward being a more consequential global player.

Multidisciplinary Perspectives on Media Fandom Dunn, Robert Andrew, 2020-05-08 Leisure time today is driven by fandom. Once viewed as a social pariah, the fan and associated fandom as a whole has transformed into a popularized social construct researchers are still attempting to understand. Popular culture in the modern era is defined and dominated by the fan, and the basis of fandom has established its own identity across several platforms of media. As some forms of fandom have remained constant, including sports and cinema, other structures of fandom are emerging as the mass following of video games and cosplay are becoming increasingly prominent. Fandom has been established as an important facet in today's society, and necessary research is required for understanding how fandom is shaping society as a whole. *Multidisciplinary Perspectives on Media Fandom* is a pivotal reference source that provides vital research that reviews some of the most exigent facets of today's fandom and highlights understudied cultures of fandom as well as emerging intricacies of established fandom. While promoting topics such as esports, influencer culture, and marketing trends, this publication explores both qualitative and quantitative approaches as well as the methods of social science and critical perspectives. This book is ideally designed for marketers, media strategists, brand managers, consumer behavior analysts, researchers, academics, and students.

Young Minds Rethinking the Mediterranean, 2011 Throughout history, much has been written on why wars and crises occur and why human beings kill each other or are often so ready to do so. While some blame human nature, state structures or the anarchic order within the international system, others hold prejudices and the othering or dehumanizing of those different from us as being responsible. The region in which we live has particularly suffered a great deal from these violent processes. Nationalist ideologies, most of which were defined in opposition to one another, alienated others, abstracted them from their humanity, and made them subject to various kinds of tyranny. Turks, Bulgarians, Greeks and many others had their share in this process of mutual alienation. Across the Euro-Mediterranean region throughout history immigrations have been imposed, publics extorted, crises fomented, and interventions and wars suffered through. The study in your hands sheds light on the processes of othering and alienation in large part responsible for this troubled history. It serves as a tool through which the past and the future can be understood. And it examines prejudice, the largest obstacle facing Turkey on its path to EU membership, while touching on various issues such as minority rights, the notion of culture, the role of symbols and other visual images in politics, the narration of culture within the capitalist order and its political outcomes, and finally the EU's Mediterranean politics.

Kosovo Mary Buckley, Sally Cummings, 2001-01-01 Nato intervention in Kosovo marked a major turning point in post cold war international relations. While some western commentators argued that it was the first war to be fought on purely moral grounds, Serbian, Russian and Chinese assessments were sharply different. This highly original addition to the literature on Kosovo highlights the importance of perspective to an understanding of both the causes and consequences of war. It makes clear that the conceptual lenses, paradigms or frameworks through which political actors view reality in turn affect their understanding of the behaviour of others and their reactions to it. The authors, a team of regional experts on the countries covered, examine the way the war has been understood in countries involved in and peripheral to the conflict. Their aim is to provide a broad yet highly nuanced picture of this focal point of Balkan unrest. The book opens with an introduction to the historical and regional context of the conflict. The authors go on to present twelve case-studies, ranging from Serbia, and the other former Yugoslav republics, to the USA and to China. These detailed regional studies highlight the considerable variation in the key states' perceptions of their national interest and their perceptions of what constitutes legality or legitimacy. In each case, domestic constraints are explored and the ways in which differing perspectives of political and military leadership fed into the crisis are examined. Further thematic chapters determine the war's consequences and the lessons to be drawn in terms of the wider issues of refugees, humanitarian intervention, European security, and geopolitics.

TV Drama in the Multiplatform Era Trisha Dunleavy, Elke Weissmann, 2024-01-16 This edited collection examines a new phase in the creation of transnational high-end drama in television's current multiplatform era. Fuelled by the wider international exposure that internet distribution has brought to TV shows, this phase for high-end drama is one of unprecedented budgets and costs, frequent transnational coproduction and increased cultural diversification. While this drama continues to be facilitated by national broadcasters, fuelling the above trio of influences upon it has been the commissioning activity of multinational subscription-video-on-demand (SVoD) providers. This book showcases leading examples of transnational TV drama, produced outside the US, yet involving collaboration with US-owned SVoDs. It foregrounds some new potentials for drama creation in the context of its strategic importance to providers as different as national broadcasters and multinational SVoDs. This book helps to explain why today's high-end dramas are demonstrating new elements of cultural specificity despite their common objective to engage a diverse international audience.

Greece from Junta to Crisis Dimitris Tziouvas, 2021-06-17 Winner of the 2021 European Society of Modern Greek Studies Book Prize Shortlisted for the 2022 Runciman Award The recent economic crisis in Greece has triggered national self-reflection and prompted a re-examination of the political and cultural developments in the country since 1974. While many other books have investigated the politics and economics of this transition, this study turns its attention to the cultural aspects of post-dictatorship Greece. By problematizing the notion of modernization, it analyzes socio-cultural trends in the years between the fall of the junta and the economic crisis, highlighting the growing diversity and cultural ambivalence of Greek society. With its focus on issues such as identity, antiquity, religion, language, literature, media, cinema, youth, gender and sexuality, this study is one of the first to examine cultural trends in Greece over the last fifty years. Aiming for a more nuanced understanding of recent history, the study offers a fresh perspective on current problems.

International Aspects of Recent Phenomena in Media and Culture Martin A. M. Gansinger, Ayman Kole, 2021-12-21 The volume provides an updated perspective on international aspects of various developments in media and culture. It includes discussions on how the digital environment contributes to the transformation and re-interpretation of existing phenomena, such as violence-on-demand in online movies, the internet appeal of virtual gangsta rappers, or the revived battle rap tradition, which operates outside the commercial limitations of the music industry and generates more views on social media than most recording artists. The book offers a new consideration of long-term trends and developments, and demonstrates in various examples how formerly marginal practices like gaming or the previously shunned Turkish movie industry have turned into influential tools of social change. In addition, the reciprocity of media content and political settings is underlined in a focus on the Arab world and the reconstruction of impulses from transnational media outlets to recent forms of citizen journalism, as well as in the case of governments' approaches to media policy in response to the COVID-19 pandemic. The book places the spotlight on pressing issues, such as the ongoing enforcement of information control in the

name of public health or the local politics and practices that hinder the process of democratization in authoritarian systems.

Whose City Is That? Culture, Design, Spectacle and Capital in Istanbul Dilek Özhan Koçak,Orhan Kemal Koçak,2014-06-26 *Whose City is That?* shows that Istanbul is produced not only by strong and systematic efforts, corporate influences and/or marketing activities, but also by individual contributions and coincidences. As such, the primary purpose of this book is to find the answer of to whom Istanbul does belong, presenting the reader with the richness of human experience and the practice of everyday life. The chapters in this book are therefore focused on the physical and economic dimensions, as well as the imaginary, fictional and hyper-real dimensions, expressing the concern of bringing the real and imaginary borders of the city together. The book provides an understanding that for each inhabitant there is another city, another Istanbul. Each person living in the city creates or lives in another city which is made of their own personal and particular experiences. In addition, the Istanbul the authors understand and describe turns into something different moment by moment, which cannot be defined or identified because of its very nature as a megacity. However, its flow is not aimless and non-directional, and each sign is not causeless or dateless. In this context, in order to make the possibilities of the city visible, the contributors to this volume ask: “Istanbul, whose city is it?” The title of the book enables different academics to ask the same question using different methodologies and subjects. The question “Whose City is That?” and the necessity of studying Istanbul using multidisciplinary perspectives brought many researchers from different fields together, because the city is larger than one approach and the constraints of one “unique” field. Gathering researchers and academics from various disciplines, such as communication studies, cultural studies, cinema/media studies, literature, the fine arts, city and regional planning, political science, social and economic geography, anthropology, and architecture enables each to think about the city alone and together, so as to create new forms of thought and discourse about Istanbul.

Turkey’s Return to the Western Balkans Branislav Radeljić,Mustafa Cüneyt Özşahin,2022-11-01 This volume sheds new light on the interaction between Turkey and the Western Balkans. Written from a multidisciplinary perspective, the contributions decode the essence of bilateral relations by analyzing various aspects of regional diplomacy, including official initiatives for cooperation and the impact of different interstate exchanges. In addition to the political aspect, the book highlights the economic dimensions of Turkey’s involvement in the Western Balkans, by exploring trade linkages and prospects for future partnership arrangements. Finally, socio-cultural components of bilateral relations are examined, with some contributors focusing on the role of art, religion, and cultural heritage in Turkish foreign policy toward the Western Balkans. While providing detailed analysis and reflections on Turkey’s direction and policy preferences, this unique collection appeals to scholars of international relations, Balkan and Turkish studies, and other neighboring disciplines, as well as to policymakers and general readership interested in the region and international collaboration.

European Television Crime Drama and Beyond Kim Toft Hansen,Steven Peacock,Sue Turnbull,2018-12-05 This book is the first to focus on the role of European television crime drama on the international market. As a genre, the television crime drama has enjoyed a long and successful career, routinely serving as a prism from which to observe the local, national and even transnational issues that are prevalent in society. This extensive volume explores a wide range of countries, from the US to European countries such as Spain, Italy, the Scandinavian countries, Germany, England and Wales, in order to reveal the very currencies that are at work in the global production and circulation of the TV crime drama. The chapters, all written by leading television and crime fiction scholars, provide readings of crime dramas such as the Swedish-Danish *The Bridge*, the Welsh *Hinterland*, the Spanish *Under Suspicion*, the Italian *Gomorrah*, the German *Tatort* and the Turkish *Cinayet*. By examining both European texts and the ‘European-ness’ of various international dramas, this book ultimately demonstrates that transnationalism is at the very core of TV crime drama in Europe and beyond.
