Types of Naval Officers Alfred Thayer Mahan,2014-04-28 Although the distinguished seamen, whose lives and professional characteristics it is the object of this work to present in brief summary, belonged to a service now foreign to that of the United States, they have numerous and varied points of contact with America; most of them very close, and in some instances of marked historical interest. The older men, indeed, were during much of their careers our fellow countrymen in the colonial period, and fought, some side by side with our own people in this new world, others in distant scenes of the widespread strife that characterized the middle of the eighteenth century, the beginnings of world politics; when, in a quarrel purely European in its origin, black men, to use Macaulay's words, fought on the coast of Coromandel, and red men scalped each other by the great lakes of North America. All, without exception, were actors in the prolonged conflict that began in 1739 concerning the right of the ships of Great Britain and her colonies to frequent the seas bordering the American dominions of Spain; a conflict which, by gradual expansion, drew in the continent of Europe, from Russia to France, spread thence to the French possessions in India and North America, involved Spanish Havana in the western hemisphere and Manila in the eastern, and finally entailed the expulsion of France from our continent. Thence, by inevitable sequence, issued the independence of the United States. The contest, thus completed, covered forty-three years.

Types of Naval Officers Drawn from the History of the British Navy (Esprion Classics) A. T. Mahan,2021-12-02 Alfred Thayer Mahan (1840-1914) was a United States Navy officer, geostrategist, and educator. His ideas on the importance of sea power influenced navies around the world, and helped prompt naval buildups before World War I. Despite his success in the Navy, his skills in actual command of a ship were not exemplary, and a number of vessels under his command were involved in collisions. On the other hand, the books he wrote ashore made him arguably the most influential naval historian. In 1885, he was appointed lecturer in naval history and tactics and the Naval War College. Before entering on his duties, Mahan was pointed to write his future studies and lectures on the influence of sea power. He organized his lectures into his most influential books, *The Influence of Sea Power upon History, 1660-1783* (1890).
