**Big Data Intelligence on Skills Demand and Training in Umbria** OECD,2023-11-20 The COVID-19 pandemic had a severe impact on the Umbrian economy, and despite recovery of labour demand, the region faces challenges related to digitalisation, tight labour markets, and volatile demand for low-skilled jobs. To address these issues, the OECD and the Umbrian regional agency for active labour market policies (ARPAL) have collaborated to investigate the labour and skills demand of the region using big data techniques applied to online job postings.

International Perspectives on Maladministration in Education Eugenie A. Samier,Peter Milley,2018-04-19 This volume develops a theoretical and critical foundation for understanding maladministration—the phenomena of harmful administrative and organisational behaviours in educational systems. Chapter authors provide theoretical and practice-based perspectives across international contexts regarding common destructive practices that occur in educational organisations, such as negligence and mistreatment of people, professional dishonesty, fraud and embezzlement, abuse of power, and corrupt organisational cultures. International Perspectives on Maladministration in Education shines a light on this complex topic by examining various practices at individual, group, organisational, and system levels; the contexts and influences that give rise to them; and potential remedies to ensure more accountable, just, and safe institutions.

*Love, Work and Death* Ariel Toaff, 2020 The latter part of the thirteenth century is regarded as a key period in the history of Italian Jewry. During that time many Jewish communities sprang up in the regions of central and northern Italy. Their appearance marked a turning-point in the history of Jews in the Italian peninsula as the Jewish presence had previously been focused on Rome and the south. This acclaimed study, originally published in Italian, captures all the intricacies of everyday life in the medieval Jewish communities of Umbria. The text characterizes in detail the defining features of Jewish life in the region at that time and shows clearly how the

common stereotype of a single, undifferentiated Jewish community does not reflect the reality.

**Ancient Umbria** Guy Bradley, 2000-12-21 How should we understand the ways in which the regions of Italy were affected by Roman imperialism? This book, which is the first full-scale treatment of ancient Umbria in any language, takes a balanced view of the region's history in the first millennium BC, focusing on local actions and motivations as much as the effect of outside influences and Roman policies. Through a careful reading of all the types of evidence it provides an important challenge to traditional treatments emphasising the 'Romanization' of the region, arguing that this is a poor explanation for the complexity of local societies in the late Republican period. Instead it proposes that other trends, particularly the organization of states, help to explain the fascinating plurality of identities that are evident in the imperial period and allow us to appreciate the diversity of local societies that emerged in both mountain and lowland areas of Umbria.

**Apennine Crossings** Nick Havely, Emeritus Professor of English and Related Literature Nick Havely, 2024-08-23 This innovative exploration of the literature, history, and culture of the Apennines links a twenty-first century journey along the walking trail of the 'Great Apennine Excursion' to accounts and discussions of past travellers--including pilgrims, merchants, tourists, soldiers, partisans, and poets--from the Medieval period up to World War Two.

**The Etruscan World** Jean MacIntosh Turfa, 2014-11-13 The Etruscans can be shown to have made significant, and in some cases perhaps the first, technical advances in the central and northern Mediterranean. To the Etruscan people we can attribute such developments as the tie-beam truss in large wooden structures, surveying and engineering drainage and water tunnels, the development of the foresail for fast long-distance sailing vessels, fine techniques of metal production and other pyrotechnology, post-mortem C-sections in medicine, and more. In art, many technical and iconographic developments, although they certainly happened first in Greece or the Near East, are first seen in extant Etruscan works, preserved in the lavish tombs and goods of Etruscan aristocrats. These include early portraiture, the first full-length painted portrait, the first perspective view of a human figure in monumental art, specialized techniques of bronze-casting, and reduction-fired pottery (the bucchero phenomenon). Etruscan contacts, through trade, treaty and intermarriage, linked their culture with Sardinia, Corsica and Sicily, with the Italic tribes of the peninsula, and with the Near Eastern kingdoms, Greece and the Greek colonial world, Iberia, Gaul and the Punic network of North Africa, and influenced the cultures of northern Europe. In the past fifteen years striking advances have been made in scholarship and research techniques for Etruscan Studies. Archaeological and scientific discoveries have changed our picture of the Etruscans and furnished us with new, specialized information. Thanks to the work of dozens of international scholars, it is now possible to discuss topics of interest that could never before be researched, such as Etruscan mining and metallurgy, textile production, foods and agriculture. In this volume, over 60 experts provide insights into all these aspects of Etruscan culture, and more, with many contributions available in English for the first time to allow the reader access to research that may not otherwise be available to them. Lavishly illustrated, *The Etruscan World* brings to

life the culture and material past of the Etruscans and highlights key points of development in research, making it essential reading for researchers, academics and students of this fascinating civilization.

**Sustainable Construction** Víctor Yepes,Tatiana García-Segura,2021-05-20 Construction is one of the main sectors that generates greenhouse gases. This industry consumes large amounts of raw materials, such as stone, timber, water, etc. Additionally, infrastructure should provide service over many years without safety problems. Therefore, their correct design, construction, maintenance, and dismantling are essential to reducing economic, environmental, and societal consequences. That is why promoting sustainable construction has recently become extremely important. To help address and resolve these types of questions, this book explores new ways of reducing the environmental impacts caused by the construction sector, as well promotes social progress and economic growth. The chapters collect the papers included in the “Sustainable Construction” Special Issue of the Sustainability journal. The papers cover a wide spectrum of issues related to the use of sustainable materials in construction, the optimization of designs based on sustainable indicators, the life-cycle assessment, the decision-making processes that integrate economic, social, and environmental aspects, and the promotion of durable materials that reduce future maintenance.
