*Vietnam Studies - The Role Of Military Intelligence 1965-1967 [Illustrated Edition]* Major General Joseph A. McChristian, 2014-08-15 [Includes 13 charts, and 46 illustrations] This book forms part of the "Vietnam Studies" series produced by various senior commanders who had served in the U.S. Army during the Vietnam War; each officer was chosen for their knowledge of the number of specialized subjects that were covered by the series. The challenge facing the General McChristian in 1965 was exceptionally daunting, as deputy head of General Westmoreland's Intelligence section his orders were clear he was told that he must Find the enemy!. A daunting task in a country filled with insurgents, uniformed enemy using other countries to move toward their targets, double agents, spies and a South Vietnamese Intelligence service to be integrated into his plans. As he himself put it: "I knew that finding the enemy was only part of the challenge. Our soldiers would have to fix and fight him. They would need to know enemy strength, capabilities, and vulnerabilities as well as information on the weather and terrain. Such intelligence had to be timely, accurate, adequate, and usable. It was to be my job to build an organization to meet that challenge." It is remarkable that he achieved a good measure of success in his task in only two years in a country with so many endemic issues, and even more so that he was able to distil his story and of his department in to this detailed but very readable exposition of the Intelligence services in Vietnam. A complex and engaging study of a very difficult job done well.

**Vietnam: A Natural History** Eleanor Jane Sterling, Martha Maud Hurley, Le Duc Minh, 2008-10-01 A country uncommonly rich in plants, animals, and natural habitats, the Socialist Republic of Vietnam shelters a significant portion of the world's biological diversity, including rare and unique organisms and an unusual mixture of tropical and temperate species. This book is the first comprehensive account of Vietnam's natural history in English. Illustrated with maps, photographs, and thirty-five original watercolor illustrations, the book offers a complete tour of the country's plants and animals along with a full discussion of the factors shaping their evolution and distribution. Separate chapters focus on northern, central, and southern Vietnam, regions that encompass tropics, subtropics, mountains, lowlands, wetland and river regions, delta and coastal areas, and offshore islands. The authors provide detailed descriptions of key natural areas to visit, where a traveler might explore limestone caves or glimpse some of the country's twenty-seven monkey and ape species and more than 850 bird species. The book also explores the long history of humans in the country, including the impact of the Vietnam-American War on plants and animals, and describes current efforts to conserve Vietnam's complex, fragile, and widely threatened biodiversity.

*America's Last Vietnam Battle* Dale Andrade, 2000-12-31 In the spring of 1972, North Vietnam launched a massive military offensive designed to deliver the coup de grace to South Vietnam and its rapidly disengaging American ally. But an overconfident Hanoi misjudged its opponents who, led by American military advisers and backed by American airpower, were able to hold off the North's onslaught in what became the biggest battle of a very long war. Dale Andrade rescues this epic engagement from its previous neglect to tell a riveting tale of heroism against great odds. Originally published in cloth in 1995 as *Trial by Fire* and drawing upon recent Vietnamese-language sources, this new paperback edition will finally allow a true classic on the war to reach the wide readership it deserves.

**United States Marine Reconnaissance in the Vietnam War** Leo J. Daugherty III, 2024-03-19 Tracing the history of U.S. Marine Force and Battalion Reconnaissance from its formation in 1898 through its operations during the Vietnam War (1963-1971), this book provides insight into Force Recon's selection, training and deployment. Emphasis on actions with the South Vietnamese ARVN highlights important lessons for today's Special Forces community, illustrating the inter-service cooperation of Recon operations. Firsthand accounts of Marines who served are included, along with photographs, maps and appendices.

The Weather Factor Erik Durschmied, 2014-12-17 From the author of *The Hinge Factor* comes a thrilling, page-turning series of dramatic historical re-creations revealing how the fate of humankind has often been decided by the uncontrollable, unpredictable power of weather. From the doomed campaigns of the Roman legions and Napoleon to the fate of US forces in the South Pacific and Vietnam, torrential rain, brutal winters, monster typhoons, and killer hurricanes have had far-reaching—and often terrifying—consequences. As Erik Durschmied vividly describes in heart-stopping vignettes, the elements have influenced human history even more than the spear, bullet, or atomic bomb. Drawing upon extensive research, as well as the author's own experiences in Vietnam, *The Weather Factor* gives a fascinating account of the inevitable collision between weather fronts and human conflict.

Vietnam War Vinh Truong, 2010 The author discusses the three Axioms in the dominant interpretation of the U.S.-Vietnam War that were established by the invisible permanent government right after the National Security Council meeting on September 21, 1960. They are: - There was never a legitimate non-communist government in Saigon (dissolution GVN) - The U.S. had no legitimate reason to be involved in Vietnamese affairs (Tonkin-Gulf-Incident) - The U.S. could not have won the war under any circumstances (U.S. troops honorable withdrawal) There are many reasons why the author decided to write this book, *The New Legion*. He felt compelled to write it for the longest time; after spending thirteen years in the Communists' so-called reeducation camp. He escaped from a canal in the Mekong Delta and drifted in a rickety old boat similar to a child's toy from South Vietnam for fourteen days until he reached the nearest Pacific island, Palawan Islands, Philippines. He knew the pain that all the people who were involved suffered yet he thought that perhaps it might be best to let it become a not-so-distant memory. Now, he has finally decided to write the truth at last. It is the story of loyalty, duty, honor, and love.

*The Vietnam Veterans Memorial at Angel Fire* Steven Trout, 2020-04-07 A great white angel spreading her wings across the Moreno Valley: this is how one visitor described the memorial standing atop a windswept prominence in the Sangre de Cristo Mountains near Taos, New Mexico. A de-facto national Vietnam veterans memorial, built by one family more than a decade before the Wall in Washington, DC, and without aid or recognition from the US government, the chapel at Angel Fire is a testament to one young American's sacrifice—but also to the profound determination of his family to find meaning in their loss. In *The Vietnam Veterans Memorial at Angel Fire*, Steven Trout tells the story of Marine Lieutenant David Westphall, who was killed near Con Thien on May 22, 1968, and of the Westphall family's subsequent struggle to create and maintain a one-of-a-kind memorial chapel dedicated to the memory of all Americans lost in the Vietnam War and to the cause of world peace. Focused primarily on a life lost amid our nation's most controversial conflict and on the Westphalls' desperate battle to keep their chapel open between 1971 and 1982, the book's brisk and moving narrative traces the memorial's evolution from a personal act of family remembrance to its emergence as an iconic pilgrimage destination for thousands of Vietnam veterans. Documenting the chapel's shifting messages over time, which include a momentary (and controversial) recognition of the dead on both sides of the war, *The Vietnam Veterans Memorial at Angel Fire* spotlights one American soldier's tragic story and the monument to hope and peace that it inspired.

*The Typhoon Truce, 1970* Robert Curtis, 2015-10-19 It wasn't rockets or artillery that came through the skies one week during the war. It was the horrific force of nature that suddenly put both sides in awe. As an unofficial truce began, questions and emotions battled inside every air crewman's mind as they faced masses of Vietnamese civilians outside their protective base perimeters for the first time. Could we trust them not to shoot? Could they trust us not to drop them off in a detention camp? Truces never last, but life changes a bit for all the people involved while they are happening. Sometimes wars are suspended and fighting stops for a while. A holiday that both sides recognize might do it, as happened in the Christmas truce during World War I. Weather might do it, too, as it did in Vietnam in October 1970. The typhoon truce was just as real, and the war stopped for three days in northern I Corps--that area bordering the demilitarized zone separating South Vietnam from the North. The unofficial typhoon truce came because first, Super Typhoon Joan arrived, devastating all the coastal lowlands in I Corps and further up into North Vietnam. Then, less than a week later came Super Typhoon Kate. Kate hit the same area with renewed fury, leaving the entire countryside under water and the people there faced with both war and natural disaster at the same time. No one but the Americans, the foreign warriors fighting throughout the country, had the resources to help the people who lived in the lowlands, and so they did. For the men who took their helicopters out into the unending rain it really made little difference. Perhaps no one would shoot at them for a while, but the everyday dangers they faced remained, magnified by the low clouds and poor visibility. The crews got just as tired, maybe more so, than on normal missions. None of that really mattered. The aircrews of the 101st Airborne went out to help anyway, because rescuing people was now their mission. In this book we see how for a brief period during an otherwise vicious war, saving life took precedence over bloody conflict.

**Vietnam's High Ground** J. P. Harris, 2016-09-12 During its struggle for survival from 1954 to 1975, the region known as the Central Highlands was the strategically vital high ground for the South Vietnamese state. Successive South Vietnamese governments, their American allies, and their Communist enemies all realized early on the fundamental importance of this region. Paul Harris's new book, based on research in American archives and the use of Vietnamese Communist literature on a very large scale, examines the struggle for this region from the mid-1950s, tracing its evolution from subversion through insurgency and counterinsurgency to the bigger battles of 1965. The rugged mountains, high plateaus, and dense jungles of the Central Highlands seemed as forbidding to most Vietnamese as it did to most Americans. During 1954 to 1965, the great majority of its inhabitants were not ethnic Vietnamese. Ngo Dinh Diem's regime initially supported an American counterinsurgency alliance with the Highlanders only to turn dramatically against it. As the war progressed, however, the Central Highlands became increasingly important. It was the area through which most branches of the Ho Chi Minh Trail passed. With its rugged, jungle-clad terrain, it also seemed to the North Vietnamese the best place to destroy the elite of South Vietnam's armed forces and to fight initial battles with the Americans. For many North Vietnamese, however, the Central Highlands became a living hell of starvation and disease. Even before the arrival of the American 1st Cavalry Division, the Communists were generally unable to win the decisive victories they sought in this region. Harris's study culminates with an account of the campaign in Pleiku province in October to November—a campaign that led to dramatic clashes between the Americans and the North Vietnamese in the Ia Drang valley. Harris's analysis overturns many of the accepted accounts about NVA, US, and ARVN performances.
