Post-COVID Tourism and Hospitality Dynamics Umendra Narayan Shukla, Sharad Kumar Kulshreshtha, 2024-01-09 This new volume takes an in-depth look at the post-COVID tourism and hospitality scenario and how the industry has adapted to the new normal. With chapters from authors from over a dozen countries, the book shares information and experiences on how diverse hospitality and tourism sectors are navigating the post-COVID era. The book offers analyses of post-COVID trends in the travel, tourism, and hospitality sector along with case studies and COVID tourism recovery strategies. It discusses post-COVID safety protocols, sustainable tourism practices, post-COVID-19 public policies for tourism, and more. Specific tourism and hospitality sectors are also considered, including wine tourism, MICE (meetings, incentives, conferences, and exhibitions) tourism, regional tourism, food delivery services, and others. The book also explores innovations and digital solutions for tourism and hospitality in the COVID-19 pandemic.

**Average Joe** Shawn Livermore, 2020-09-09 The book covers numerous tech entrepreneurial founders and software developers, and the exciting brands or products that they created. It goes deep on a handful of them, narrowly divulging exactly how a few software developers and startup founders created breakthrough tech products like Gmail, Dropbox, Ring, Snapchat, Bitcoin, Groupon, and more. It highlights and unpacks the general hero-worship that the media and our own minds practice about tech founders and tech

entrepreneurs. This idealization of tech success can create a paradox, preventing average tech professionals from their own successful journeys. This book provides hard evidence that anyone in tech can create, and anyone on the peripheral of tech can break through to the center where innovation, creativity, and opportunity meet. The anecdotes, stories, evidence, facts, arguments, logic, principles, and techniques provided in this book have helped individuals and businesses engage in slow creation cycles, improve the morale of their development teams, and increased their delivery potential of their technology solutions overall. Average Joe covers: Genius - The systematic deconstruction and debunking of the commonly held assumptions in the tech industry around supreme intelligence, and how that intelligence has been worshipped and sought after, despite the facts. Slow Creation - How to force-manufacture creative ideation. How conscious and subconscious cycles of patterns, details, and secrets can lead to breakthrough innovations, and how those P.D.S. cycles, and systematic mental grappling, can be conjured and repeated on a regular basis. Little-C Creativity - The conscious and miniature moments of epiphany that leak into our active P.D.S. cycles of Slow Creation. Flow - Why it's great, but also - why it's completely unreliable and unnecessary. How to perpetually innovate without relying on a flow state. Team Installation - How teams and companies can engage their employees in Slow Creation to unlock dormant ideas, stir up creative endeavors, and jumpstart fragile ideas into working products. User Manipulation - How tech

products are super-charged with tricks, secret techniques, and neural transmitters like Dopamine, Oxytocin, and Cortisol; how those products leverage cognitive mechanisms and psychological techniques to force user adoption and user behaviors. Contrarianism - How oppositional and backward-thinking leaders create brand-new categories and the products which dominate those categories. Showmanship - How tech players have presented their ideas to the world, conjured up magic, manufactured mystique, and presented compelling stories that have captured their audiences. Sustainable Mystique Triad – A simple model for capturing audiences consistently without relying on hype and hustle.

**Virus Outbreaks and Tourism Mobility** Sharad Kumar Kulshreshtha, 2021-09-06  
Virus Outbreaks and Tourism Mobility: Strategies to Counter Global Health Hazards uses innovative and cutting-edge research to map out the background and impacts of national, regional and international viral outbreaks focusing on new viewpoints to help build effective strategic responses to global health hazards.

**Handbook of Applied Journalism** Leon Barkho,  
**The Political Economy of Education Reforms in Vietnam** Minh Quang Nguyen, James Albright, 2022-08-15 This book, drawing on a political economic perspective of education development, is a comprehensive account of the question why some education systems flourish while others falter. It provides a state-of-the-art review of the Vietnamese way of education development,

figuring out the pitfalls, challenges and opportunities of neoliberal reform. It also sheds new light on the rise of neoliberal capitalism in contemporary Vietnam as the country intensifies its market-oriented economic transition. Starting from educational development concerns, this book differentiates the growth and development concepts in education. While growth with limited development is well reflected in many developing education systems, the Vietnamese experience of education development stands to provide readers with unique insights about education in developing economies, especially in understanding how a socialist-oriented education system is struggling to thrive in the times of neoliberal capitalism. Authored by scholars specialising in Vietnamese education and politics, the chapters address key issues pertaining to the political economy of education reform in Vietnam and the government's enduring efforts to drive education toward international standards through its costly market-infused education reforms. This book will appeal to postgraduate students, educators, educational policy-makers and scholars interested in Vietnamese studies, Vietnam education reforms, education governance, education for sustainability, internationalisation of education and the politics of education reforms.

*Trade Unions and Labour Movements in the Asia-Pacific Region* Byoung-Hoon Lee, Ng Sek-Hong, Russell D. Lansbury, 2019-09-16 Recent developments in the world economy, including deindustrialisation and the digital revolution, have led to an increasingly individualistic relationship between workers and

employers, which in turn has weakened labour movements and worker representation. However, this process is not universal, including in some countries of Asia, where trade unions are closely aligned with the interests of the dominant political party and the state. This book considers the many challenges facing trade unions and worker representation in a wide range of Asian countries. For each country, full background is given on how trade unions and other forms of worker representation have arisen. Key questions then considered include the challenges facing trade unions and worker representation in each country, the extent to which these are a result of global or local developments and the actions being taken by trade unions and worker representative bodies to cope with the challenges. This book is dedicated to the memory of Professor Keith Thurley, London School of Economics.

*Pandemics and Resilience: Lessons we should have learned from Zika* David M. Berube, 2023-05-05 The aim of the book was to produce the most comprehensive examination of a pandemic that has ever been attempted. By cataloging the full extent of the Zika pandemic, this book will be the most complete history and epistemic contextualization ever attempted to date. The work should function as the primary source for students, researchers, and scholars who need information about the Zika pandemic. This book examines the technical literature, digital and popular literature, and online materials to fully contextualize this event and provide a bona fide record of this event and its

implications for the future. It is somewhat serendipitous that while this work was underway, we are going through another pandemic. One of the primary lessons we did not learn by Zika was pandemic events will return repeatedly, and we need to learn from each one of them to prepare the planet for the next one. Just because Zika seemed to have died out does not make it less important. We were lucky that the virus evolved into what seemed to be a less virulent version of itself, and the vector mosquitoes were concentrated elsewhere. Finally, this book represents a tour de force in scholarship involving nearly 4,000 sources of information and does not shy from a detailed examination of the controversies, conspiracies, and long-term consequences when we avoid learning from outbreaks, such as Zika.

Justifying Digital Repression via "Fighting Fake News" SOC052000, Dien Nguyen An Luong, 2022-08-04 Southeast Asian autocracies of Cambodia, Myanmar, Thailand and Vietnam have politicized vague definitions of "fake news" to justify diverse tactics of digital repression. In these countries, what constitutes falseness in "fake news" has hardly been clearly articulated. The governments instead focus on the grave threats the dissemination of "fake news" could pose to national security, public disorder or national prestige. As the governments are vested with the power to bend the labelling of "fake news" to their will, they can criminalize those accused of circulating such information to safeguard public interests. There are at least four methods by which the governments have tightened the screws on cyberspace under the

banner of curbing “fake news”: (i) prosecute Internet users, journalists and dissidents in particular; (ii) pressure Internet Service Providers and social media platforms to block and remove content; (iii) expand and deepen social media monitoring; and (iv) shut down the Internet altogether. All four countries have used “fake news” allegations to penalize critics. Cambodia, Thailand and Vietnam are inclined to use such allegations to strong-arm tech companies into removing content at the behest of the governments. Thailand and Vietnam tend to exploit such allegations to beef up online surveillance. Myanmar is the only country that turns to Internet shutdowns. The interplay between the methods of digital repression that exploit the pretext of cracking down on “fake news” and the manipulation of online discourse through the deployment of cyber troops would merit further research and in-depth examination.

Cultural Changes in Instructional Practices Due to Covid-19 Stephanie Kelly, Tatiana M. Permyakova, Davide Girardelli, Christopher J. Claus, 2021-08-18

*Leadership During a Crisis* Christian Harrison, 2024-02-20 We live in uncertain times propelled by complex systems, climate change and the use of technology which possess various threats. At times of crisis, leadership that permits quick reactions to the changing organisational environment becomes necessary. However, there has been limited studies that provide a road map of leading during a crisis. What is required of leaders during a crisis? How can you develop the required leadership expertise during such turbulent periods?

What are the challenges leaders will have to combat? Through this book, these questions are answered. It is no exaggeration therefore to claim that this book opens a new chapter as it seeks to advance discussions about how to lead during crisis. Drawing on empirical and conceptual evidence from the perspective of renowned authors in leadership research, it offers a robust and engaging overview of the field of leadership and leadership development in turbulent and dynamic environments. The chapters in the book support the personal and professional development of aspiring and experienced leaders and managers. The readers will be able to display critical awareness of current developments in both the theory and practice of leadership and leadership development and its importance in modern organisations.

*Vietnam* Bill Hayton, 2020-11-24 A much-needed behind-the-scenes survey of an emerging Asian power The eyes of the West have recently been trained on China and India, but Vietnam is rising fast among its Asian peers. A breathtaking period of social change has seen foreign investment bringing capitalism flooding into its nominally communist society, booming cities swallowing up smaller villages, and the lure of modern living tugging at the traditional networks of family and community. Yet beneath these sweeping developments lurks an authoritarian political system that complicates the nation's apparent renaissance. In this engaging work, experienced journalist Bill Hayton looks at the costs of change in Vietnam and questions whether this rising Asian power is really heading toward capitalism and democracy. Based

on vivid eyewitness accounts and pertinent case studies, Hayton's book addresses a broad variety of issues in today's Vietnam, including important shifts in international relations, the growth of civil society, economic developments and challenges, and the nation's nascent democracy movement as well as its notorious internal security. His analysis of Vietnam's "police state," and its systematic mechanisms of social control, coercion, and surveillance, is fresh and particularly imperative when viewed alongside his portraits of urban and street life, cultural legacies, religion, the media, and the arts. With a firm sense of historical and cultural context, Hayton examines how these issues have emerged and where they will lead Vietnam in the next stage of its development.

**Beyond Straw Men** Phaedra C. Pezzullo, 2023-08-22 Addressing plastics can feel overwhelming. Guilt, shame, anger, hurt, fear, dismissiveness, and despair abound. *Beyond Straw Men* moves beyond "hot take" or straw man fallacies by illustrating how affective counterpublics mobilized around plastics reveal broader stories about environmental justice and social change. Inspired by on- and offline organizing in the Global South and the Global South of the North, Phaedra C. Pezzullo engages public controversies and policies through analysis of hashtag activism, campaign materials, and podcast interviews with headline-making advocates in Bangladesh, Kenya, the United States, and Vietnam. She argues that plastics have become an articulator of crisis and an entry point into the contested environmental

politics of carbon-heavy masculinity, carceral policies, planetary fatalism, eco-ableism, greenwashing, marine life endangerment, pollution colonialism, and waste imperialism. Attuned to plastic attachments, *Beyond Straw Men* illustrates how everyday people resist unsustainable patterns of the plastics-industrial complex through imperfect but impactful networked cultures of care.

**Knowledge Economy and Sustainable Economic Development** Thanh Tuyen Nguyen, 2010-09-22 In this book, the author focuses on the intersection of two major bodies of policy and practice: knowledge economy and ICTs on one hand, and sustainable economic development on the other. It aims to provide a broad-ranging account of the social and economic terrain demarcated by this intersection in order to reach conclusions and offer guidelines for policy development. Although based on the case of a developing country (Vietnam) its analyses, arguments and conclusions are of universal relevance. Key features comprehensive picture of a society from the perspective of knowledge for development Intersection of ICTs (Information and Communications Technology), knowledge, and sustainable economic development Can be used in courses of sociology, political economy, development economics, knowledge economics, information and telecommunication technology, sustainable development, and public administration.

**The Labour Politics of App-Based Driving in Vietnam** Joe Buckley, 2023-10-19 Over the past decade, app-based driving services like ride-hailing and

delivery have become an integral part of business, employment and daily life in Vietnam. This growth, however, has been accompanied by tensions and conflicts between ride-hailing platforms and traditional taxi companies, xe ôm (motorbike taxi drivers), the authorities and the drivers working for these platforms. Most drivers on these services are male and work long hours for low wages. Their working conditions are precarious because platforms classify them as partners rather than employees, denying them basic rights and benefits. Although platforms offer bonuses, organize events to celebrate drivers' contributions, and provide training courses, these do not address the fundamental exploitation in the employment relationship. The Ministry of Labour, Invalids and Social Affairs (MOLISA) has not taken sufficient action to protect drivers or taken a stance on whether they should be classified as contractors or employees. The Vietnam General Confederation of Labour (VGCL) is working towards securing social protection for drivers and increasing their representation in labour associations. While some members of the VGCL have argued that app-based drivers are actually workers and should be afforded the same rights and benefits as all workers, this is as yet not the formal position of the confederation. Drivers have taken to organizing strikes and protests to demand better treatment from the platforms. Their methods of activism are rooted in both traditional Vietnamese labour activism and global trends of platform protest. The emergence of the gig economy in Vietnam is a challenge to sustainable development. Policymakers and

practitioners are called upon to ensure that platform work contributes to improved livelihoods and decent lifestyles for all.

**Defeating the Dictators** Charles Dunst, 2023-02-02 ' Charles Dunst's deeply researched, timely and powerful book offers a blueprint for how democracies should fight back.' - Sir Kim Darroch 'Remarkable. A thoughtful and perceptive book.' - Rt. Hon. Jeremy Hunt, MP The world is currently experiencing the lowest levels of democracy we have seen in over thirty years. Autocracy is on the rise, and while the cost of autocracy seems evident, it nevertheless remains an attractive option to many. While leaders like Viktor Orbán disrupt democratic foundations from within, autocrats like Xi Jinping and Vladimir Putin do so from abroad, eroding democratic institutions and values and imperilling democracies that appear increasingly fragile. There are even those who, disillusioned with the current institutions in place, increasingly think authoritarianism can deliver them a better life than democracy has or could. They're wrong. Autocracy is not the solution - better democracy is. But we have to make the case for it. We have to combat institutional rot by learning from one another, and, at times, from our rivals. And we have to get our own houses in order. Only then can we effectively stand up for democratic values around the world and defeat the dictators.

**Energy Policy for Peace** Daniel Kammen, Hisashi Yoshikawa, Kensuke Yamaguchi, 2023-08-25 Though sustainable development goals and other

international initiatives have insisted on the importance of energy access in peace building, there is still little understanding about the extent to which energy systems themselves can contribute to or mitigate structural violence. While there are ample relevant examples globally from a diverse literature and increasing body of case studies, this knowledge has not been systematically organized to show theoretical alternatives to current energy systems or deliver practical policy advice in building such alternatives. Informed by the contributions of a multidisciplinary global author pool, *Energy Policy for Peace* provides both a new foundation for researchers and practitioners exploring how energy systems can be changed to build positive peace, and a toolkit for redressing structural violence. The work opens by reviewing how unequal energy access strengthens structural violence. It argues that increasing access to energy access may be an important tool in mitigating structural violence. It concludes with practical policy recommendations and institutional reforms designed to mitigate the structural violence embedded in many energy systems and develop energy strategies for peace building. Reviews the characteristics of energy systems that enable positive peace Discusses practical recommendations to achieve positive peace through energy strategy and policies Draws on an array of real-world case studies drawn from an exemplary team of international practitioners Provides a toolkit of policy options for stakeholders interested in redressing structural violence

**Law and Society in Vietnam** Mark Sidel, 2008-02-21 This book is a unique analysis of the struggle to build a rule of law in one of the world's most dynamic and vibrant nations - a socialist state that is seeking to build a market economy while struggling to pursue an ethos of social equality and opportunity. It addresses constitutional change, the assertion of constitutional claims by citizens, the formation of a strong civil society and non-profit sector, the emergence of economic law and the battles over who is benefited by the economic regulation, labor law and the protection of migrant and export labor, the rise of lawyers and public interest law, and other key topics. Alongside other countries, comparisons are made to parallel developments in another transforming socialist state, the People's Republic of China.

**Maritime Cooperation and Security in the Indo-Pacific Region** , 2022-12-12 This definitive volume assembles more than twenty leading Indo-Pacific maritime scholars and emerging experts to deliver fresh perspectives on maritime cooperation and security. Topics include naval activities, law of the sea, environmental protection, international cooperation, and sub-regional maritime agendas.

**Legal Reforms in China and Vietnam** John Gillespie, Albert H.Y. Chen, 2010-09-13 Although the adoption of market reforms has been a key factor leading to China's recent economic growth, China continues to be governed by a communist party and has a socialist-influenced legal system. Vietnam,

starting later, also with a socialist-influenced legal system, has followed a similar reform path, and other countries too are now looking towards China and Vietnam as models for development. This book provides a comprehensive, comparative assessment of legal developments in China and Vietnam, examining similarities and differences, and raising important questions such as: Is there a distinctive Chinese model, and/or a more general East Asian Model? If so, can it be flexibly applied to social and economic conditions in different countries? If it cannot be applied to a culturally and politically similar country like Vietnam, is the model transportable elsewhere in the world? Combining 'micro' or interpretive methods with 'macro' or structural traditions, the book provides a nuanced account of legal reforms in China and Vietnam, highlighting the factors likely to promote, change or resist the spread of the Chinese model.

**Impacts of the Covid-19 Pandemic** Nadav Morag, 2022-09-28 IMPACTS OF THE COVID-19 PANDEMIC Enables Readers to Understand the Impact of International Legislative and Policy Responses to the COVID-19 Pandemic The wide array of legal and policy responses to the COVID-19 pandemic have significant implications regarding the functioning of countries and their respective societies. This book addresses the impact of international legislative and policy responses to the COVID-19 pandemic in a range of countries. To aid the reader in understanding country-specific developments, each chapter focuses on a specific country and addresses the legal frameworks and policy

approaches used to support measures to prevent transmission and otherwise reduce the impact of the virus on society and the economy. Sample topics discussed in the work include: The effect certain policies may have on civil liberties, such as due process, and the right to privacy in specific countries The provision of public goods in the face of the pandemic Policymakers in public health agencies and other branches of government, along with academics studying global pandemic response, homeland security, and emergency management will be able to use this book as a comprehensive resource to understand the current state of COVID-19 policies around the world and the potential future effects of these policies.

### The Enigmatic Realm of **Vnexpressnews**: Unleashing the Language is Inner Magic

In a fast-paced digital era where connections and knowledge intertwine, the enigmatic realm of language reveals its inherent magic. Its capacity to stir emotions, ignite contemplation, and catalyze profound transformations is nothing short of extraordinary. Within the captivating pages of **Vnexpressnews** a literary masterpiece penned by way of a renowned author, readers embark on a transformative journey, unlocking the secrets and untapped potential embedded within each word. In this evaluation, we shall explore the book is core themes, assess its distinct writing style, and delve into its lasting

effect on the hearts and minds of those who partake in its reading experience.
