CBRNE: Challenges in the 21st Century Peter D.E. Biggins,Deeph Chana,2022-11-21 This book addresses the pertinent issues that will need to be considered by those interested in physical security problems of the future. Specifically, it examines how changes in the accessibility of technology – data, hardware, software – are likely to affect both threat and mitigation considerations for Chemical, Biological, Radiological and Explosive (CBRE) scenarios and how social science can inform us of the human aspects of each. The trend towards an ever more socio-technical society and infrastructures – encapsulated by concepts such as 'smart cities' – is drawn out as a key motivation for adopting more holistic risk approaches to such security problems, than is currently the case.

The Materiality of Color Andrea Feeser,2017-07-05 Although much has been written on the aesthetic value of color, there are other values that adhere to it with economic and social values among them. Through case studies of particular colors and colored objects, this volume demonstrates just how complex the history of color is by focusing on the diverse social and cultural meanings of color; the trouble, pain, and suffering behind the production and application of these colors; the difficult technical processes for making and applying color; and the intricacy of commercial exchanges and knowledge transfers as commodities and techniques moved from one region to another. By emphasizing color's materiality, the way in which it was produced, exchanged, and used by artisans, artists, and craftspersons, contributors draw attention to the disjuncture between the beauty of color and the blood, sweat, and tears that went into its production, circulation, and application as well as to the complicated and varied social meanings attached to color within specific historical and social contexts. This book captures color's global history with chapters on indigo plantations in India and the American South, cochineal production in colonial Oaxaca, the taste for brightly colored Chinese objects in Europe, and the thriving trade in vermilion between Europeans and Native Americans. To underscore the complexity of the technical knowledge behind color production, there are chapters on the 'discovery' of Prussian blue, Brazilian feather techn?and wallpaper production. To sound the depths of color's capacity for social and cultural meaning-making, there are chapters that explore the significance of black ink in Shakespeare's sonnets, red threads in women's needlework samplers, blues in Mayan sacred statuary, and greens and yellows in colored glass bracelets that were traded across the Arabian desert in the late Middle Ages. The purpose of this book is to recover color's complex-and sometimes morally troubling-past, and in doing so,

Free Berlin Briana J. Smith,2022-09-20 An alternative history of art in Berlin, detaching artistic innovation from art world narratives and connecting it instead to collective creativity and social solidarity. In pre- and post-reunification Berlin, socially engaged artists championed collective art making and creativity over individual advancement, transforming urban space and civic life in the process. During the Cold War, the city's state of exception invited artists on both sides of the Wall to detour from artistic tradition; post-Wall, art became a tool of resistance against the orthodoxy of economic growth. In *Free Berlin*, Briana Smith explores the everyday peculiarities, collective joys, and grassroots provocations of experimental artists in late Cold War Berlin and their legacy in today's city. These artists worked intentionally outside the art market, believing that art should be everywhere, freed from its confinement in museums and galleries. They used art as a way to imagine new forms of social and creative life. Smith introduces little-known artists including West Berlin feminist collective Black Chocolate, the artist duo paint the town red (p.t.t.r), and the Office for Unusual Events, creators of satirical urban political theater, as well as East Berlin action art and urban interventionists Erhard Monden, Kurt Buchwald, and others. Artists and artist-led urban coalitions in 1990s Berlin carried on the participatory spirit of the late Cold War, with more overt forms of protest and collaboration at the neighborhood level. The temperament lives on in twenty-first century Berlin, animating artists' resolve to work outside the market and citizens' spirited defenses of green spaces, affordable housing, and collectivist projects. With *Free Berlin*, Smith offers an alternative history of art in Berlin, detaching artistic innovation from art world narratives and connecting it instead to Berliners' historic embrace of care, solidarity, and cooperation.
