*I Like My Car* Michael Robertson,2018-10-23 Cars, colors, and funny animals abound in this simple Level B I Like to Read book for young readers. The rhino loves his red car . . . which just happens to have a rhino-horn hood ornament. And the alligator loves her green car that has sharp teeth and spikes just like hers! The shark's car has a fin and a tail. The funny animals in this book match their equally funny cars as they all make their way to a party! With very simple text and detailed, cartoonish illustrations, this is a great read-aloud for kids who love cars-- and an ideal book for beginning readers just learning to read on their own. The award-winning I Like to Read® series focuses on guided reading levels A through G, based upon Fountas and Pinnell standards. Acclaimed author-illustrators--including winners of Caldecott, Theodor Seuss Geisel, and Coretta Scott King honors--create original, high-quality illustrations that support comprehension of simple text and are fun for kids to read again and again with their parents, teachers or on their own! Level B books, suitable for kindergarten readers, feature short sentences and high-frequency words. The illustrations provide clues to word meanings. When Level B is mastered, follow up with Level C.

*Where Is My Flying Car?* J. Storrs Hall,2021-11-30 From an engineer and futurist, an impassioned account of technological stagnation since the 1970s and an imaginative blueprint for a richer, more abundant future The science fiction of the 1960s promised us a future remade by technological innovation: we'd vacation in geodesic domes on Mars, have meaningful conversations with computers, and drop our children off at school in flying cars. Fast-forward 60 years, and we're still stuck in traffic in gas-guzzling sedans and boarding the same types of planes we flew in over half a century ago. What happened to the future we were promised? In *Where Is My Flying Car?*, J. Storrs Hall sets out to answer this deceptively simple question. What starts as an examination of the technical limitations of building flying cars evolves into an investigation of the scientific, technological, and social roots of the economic stagnation that started in the 1970s. From the failure to adopt nuclear energy and the suppression of cold fusion technology to the rise of a counterculture hostile to progress, Hall recounts how our collective ambitions for the future were derailed, with devastating consequences for global wealth creation and distribution. Hall then outlines a framework for a future powered by exponential progress—one in which we build as much in the world of atoms as we do in the world of bits, one rich in abundance and wonder. Drawing on years of original research and personal engineering experience, *Where Is My Flying Car?*, originally published in 2018, is an urgent, timely analysis of technological progress over the last 50 years and a bold vision for a better future.

My Car in Managua Forrest D. Colburn, 2010-07-05 Histories of revolutions often focus on military, political, or economic upheavals but sometimes neglect to connect these larger events to the daily lives of ordinary people. Yet the peoples' perception that things are worse than before can topple revolutionary governments, as shown by the recent defeat of the Sandinista regime in Nicaragua and the governments of Eastern Europe. Providing the kind of prosaic, revealing details that more formal histories have excluded, *My Car in Managua* offers an objective, often humorous description of the great difficulties and occasional pleasures of life in Nicaragua during the Sandinista revolution. During a year's work (1985-1986) at the Instituto Centroamericano de Administración de Empresas (INCAE), Forrest Colburn purchased a dilapidated car--and with it an introduction to everyday life in Nicaragua. His discoveries of the length of time required to register the car (approximately six weeks), the impossibility of finding spare parts (except when U.S. dollars were applied to the search), and the fact that anyone getting into a car in Managua can be charged a small fee [for car watching] by anyone else all suggest the difficulties most Nicaraguans faced living in a devastated economy. Drawing on experiences from visits throughout the revolutionary period (1979-1989), Colburn also sheds light on how the Revolution affected social customs and language, gender roles and family relationships, equality and authority, the availability of goods and services, the status of ethnic minorities, and governmental and other institutions. Illustrations by Nicaragua's celebrated political cartoonist Róger Sánchez Flores enliven the lucid text.
